

ASX RELEASE

10 September 2018

CAG RE-INSTATEMENT TO OFFICIAL QUOTATION

The Board of Cape Range Limited (ASX code: CAG) is very pleased to confirm that ASX have advised that they will today lift the ASX imposed suspension on trading in the Company's securities.

This unusually lengthy ASX suspension was imposed by ASX on 30 July 2018 following a rapid rise in the price of the Company's securities. The ASX trading suspension was preceded by the issue of three price and volume queries on 16 July 2018, 23 July 2018 and 30 July 2018.

The suspension was imposed by ASX in accordance with ASX Listing Rule 17.3 and enabled ASX to investigate ASX participant trading in the Company's securities.

Throughout the entire investigation, the Company fully and proactively assisted the regulatory authorities with all of their enquiries. In that regard, the Board confirms that ASX's and ASIC's enquiries related exclusively to the trading activity in the Company's securities.

The CAG Board of Directors confirms that the Company is in compliance with the ASX Listing Rules and, in particular, ASX Listing Rule 3.1.

The Board takes this opportunity to once again express its sincere gratitude for the patience and support received from shareholders throughout the suspension.

Biztrak Online

As announced on 10 July 2018, Phase 1 of the Company's cloud based accounting software package was completed (**Biztrak Online**). The Company is now moving towards the launch of this proprietary accounting software.

Expanding Biztrak's windows-based software applications to cloud-based services allows the Company to shift gears from a Software as a Product model to a Software as a Service (**SaaS**) model, where annual subscription fees replace one off licensing fees.

The new Biztrak Online software is designed to facilitate international scaling of the Company's operations by offering real time access to current financial and business information for individuals and businesses from any access point around the globe.

Specifically, Biztrak Online offers:

- 24/7 access to financial information from any device with internet connection;
- real time access to financial information;

- user data being securely encrypted at source and saved to the cloud;
- no upfront costs; and
- cost free maintenance, with software that is constantly updated.

Biztrak Online's intrinsic appeal to users stems from inbuilt functionality, including:

- Branch Accounting, allowing automatic synchronisation of financial information between branches and head office, ensuring global data fidelity at all times; and
- E-Bridge middleware which facilitates electronic data interchange in multiple formats, providing seamless and automated integration without cross-translation and manual data entry conversion. Providing maximum efficiency and cost minimalisation.

Following completion of Phase 1, the Company has scheduled active promotion and demonstrations of the Biztrak Online services to its existing clients, prospective clients and accountancy firm partnerships via attendance at trade shows, workshops, seminars and numerous product briefing sessions.

In addition and as a consequence of the introduction of Malaysia's new Sales and Service Tax (**SST**), which came into effect on 1 September 2018, the Company's R & D team has been actively developing Version 15 (Update on SST) for a planned launch date of 28 September 2018.
