## ASX ANNOUNCEMENT

17 September 2018

### APPOINTMENT / RESIGNATION OF COMPANY SECRETARY

Volt Power Group Limited advises that Mr Ian Sydney has resigned as Company Secretary and Mr Elvio Ruggiero has been appointed as Company Secretary with effect from 17 September 2018.

Mr Elvio Ruggiero is also the Chief Financial Officer of ECM Pty Ltd, the Company's largest shareholder.

**End**

### About Volt

**Volt Power Group Limited (ASX: VPR)** is a transitioning power generation and infrastructure asset / equipment developer and owner. The Company's businesses commercialise proprietary equipment pursuant to a serviced equipment rental business model.

### Business Activity Summary

These activities of our businesses include:

- **ATEN (100%)** – ATEN is a low emission waste heat to electricity generation equipment solution. The ATEN is at an advanced stage of initial commercialisation;
- **Wescone Crushing Equipment (100%)** – the proprietary owner of the Wescone W300 sample crusher predominantly deployed throughout the global iron ore sector. Wescone has operated successfully for 25+ years;
- **EcoQuip (50%)** – a developer and owner a 'best in class' mobile solar / Li-Ion battery enabled powerbox trailer solution incorporating a military specification, telescopic tower capable of LED Lighting, Wi-Fi / LTE repeater and CCTV retrofit; and
- **Acquisition / Development Strategy** - the expansion of its broader renewable and low emission power generation and infrastructure asset / equipment footprint.

**About ATEN Technology** comprises a modular, power generation equipment package capable of harvesting 'low' grade industrial waste heat to generate zero emission electricity. ATEN generated electricity is expected to significantly reduce 'energy intensive' industry operating costs via the displacement of grid sourced electricity or fossil fuel usage associated with electricity generation.

The global industrial complex generally vents 'low' grade waste heat to atmosphere. The quantity of unexploited waste heat created by global industry presents an outstanding opportunity for the commercial roll-out of the ATEN Technology.

The ATEN's simple, high efficiency design and modular configuration - developed to maximise its integration capability - provides a low capex, uniquely compatible and scalable solution for the exploitation of 'low grade' industrial waste heat. Volt's priority target markets for the commercialization of the ATEN Technology include the resources and industrial processing sectors.

## **Major Shareholder (24.3%) & Partner**

**Volt's** largest shareholder is **ECM Pty Ltd (ECM)**. **ECM** is one of Australia's largest, privately owned construction and maintenance companies servicing clients in the mining, oil and gas, infrastructure and power generation sectors. The business has a national footprint with extensive project execution and delivery capability having completed the construction and commissioning of power stations and processing infrastructure across mainland Australia for 30+ years.

The Company's office is co-located at the ECM headquarters and fabrication facility - 20kms south of the Perth CBD in Henderson, Western Australia.
