

ASX ANNOUNCEMENT | 9 October 2018

MAIDEN LITHIUM SHIPMENT DEPARTS PORT HEDLAND

Altura Mining Limited (ASX: AJM) (“Altura” or “the Company”) is pleased to announce that the maiden cargo of spodumene concentrate from the Altura Lithium Project has departed Port Hedland.

The vessel “MV Clipper Tenacious” was loaded with approximately 5,000 dry metric tonnes of spodumene concentrate and is headed for Altura’s offtake partner Lionergy Limited in China. The vessel was shared with two other exporters.

The focus for Altura is now the ongoing ramp-up of production to the nameplate capacity of 220,000tpa and regular shipments. Arrangements have been made for the next shipment which is expected to occur in late October. Full details of production and shipments will be reported on a quarterly basis.

Altura Mining Managing Director James Brown said the first shipment marked the start of the next stage of the Company’s history.

“We are now producing and exporting lithium concentrate that will become part of the lithium-ion battery revolution,” he said. “A little bit of the Pilbara will now be found in the car, mobile phones and static storage batteries of the future.”

“At this point I’d like to pay tribute to everyone who has supported Altura to get to this point, including staff, contractors, offtake partners, financiers and shareholders.”

About Altura Mining Limited (ASX: AJM)

Altura is a key player in the global lithium market and is leveraging increasing demand for raw materials for manufacturing lithium ion batteries for electric vehicles and static storage uses. Altura owns and operates the world-class Altura Lithium Project at Pilgangoora in WA's Pilbara, which has a production capacity of 220,000tpa of quality spodumene concentrate. The Company has completed a Definitive Feasibility Study on a potential Stage 2 expansion to 440,000tpa, with a Final Investment Decision due in 2018.
