## CHATREE GOLD MINE, Thailand

### Care and Maintenance

Akara Resources Public Company Limited (“Akara”), a subsidiary of Kingsgate, ceased operating the Chatree Gold Mine on 31 December 2016 in accordance with the closure order by the Thai Government. Chatree was placed on Care and Maintenance effective 1 January 2017. Approximately 25 full time staff remain at the Chatree Gold Mine to manage the ongoing Care and Maintenance and rehabilitation works.

At mine closure, approximately US\$6 million of gold and silver inventory in the form of high-grade sludge remained at the Chatree site. Akara is still working towards having the sludge released for sale. However, there can be no guarantee that this will occur.

## NUEVA ESPERANZA PROJECT, Chile

Nueva Esperanza is a feasibility-stage development project with a resource base of approximately 1.9 million ounces gold equivalent (see ‘Notes for Mineral Equivalents’). Kingsgate Consolidated has appointed a corporate advisor to advise and assist it in identifying advantageous options to monetise the project. Expressions of interest continue to be sought from interested parties.

### Feasibility

As stated above, given that Expressions of Interest in the project are currently being sought, work has been suspended on the Definitive Feasibility Study (“DFS”), which remains substantially incomplete, pending the outcome of this process. There is still material modelling/assumptions that require further investigation (both CAPEX and OPEX related) before the DFS can be completed.

### Permitting

Kingsgate is pleased to advise that the Environmental Impact Assessment (“EIA”) for Nueva Esperanza was completed on time and was submitted to the Chilean regulatory agencies on 29 June 2018.

Officers from Laguna Resources attended a meeting of the Atacama Development Corporation (“CORPROA” in Spanish) with the Chilean Minister of Mining in Copiapó in August. The project has good support from Government at all levels with the Mayor of Diego de Almagro publicly expressing his support for the Nueva Esperanza Project.

### Exploration

Exploration during the quarter was limited due to the winter field season. Harsh weather conditions and snow on the ground made surface sampling and geological mapping difficult. It is anticipated that the spring field season will commence this month (October) with the remobilisation of the camp.

## REGIONAL EXPLORATION, CHILE

### Maricunga Generative Program

Kingsgate has been building its regional exploration portfolio in the northern Maricunga Belt. The Company currently has a number of 100% owned licences and areas under application north and south of the Nueva Esperanza Project. The concessions and concession applications typically cover large areas of intense, high-level alteration considered prospective for epithermal precious-metal deposits. The 2018 program is currently underway, evaluating new target areas and prioritising others for more detailed follow-up fieldwork.

## CORPORATE & FINANCE

### Finance

At the end of September 2018, Kingsgate's Group Cash totalled A\$1.5 million excluding US\$6 million of gold and silver inventory in the form of high grade sludge secured at the Chatree mine site.

With reference to its previous advice that on 29 August 2017, Kingsgate executed a \$15.0 million Standby Loan Facility ("SLF"). The Company drew down the SLF in full on 2 May 2018, in order to ensure continuing funding of its activities.

The SLF is on normal commercial terms for a loan of this nature, other than the utilisation fee under the SLF which has been satisfied by the issue of 2,641,003 Kingsgate shares. (See ASX:KCN "Appendix 3B – Issue of Shares" dated 7 May 2018).

The lender has agreed to extend the repayment date to February 2019, and to increase the Facility Limit by \$5.0 million to \$20 million.

The Company continues to prosecute its claims against the Kingdom of Thailand under the Australia Thailand Free Trade Agreement and against Zurich Australia Limited and other named insurers under its Political Risk Insurance Policy.

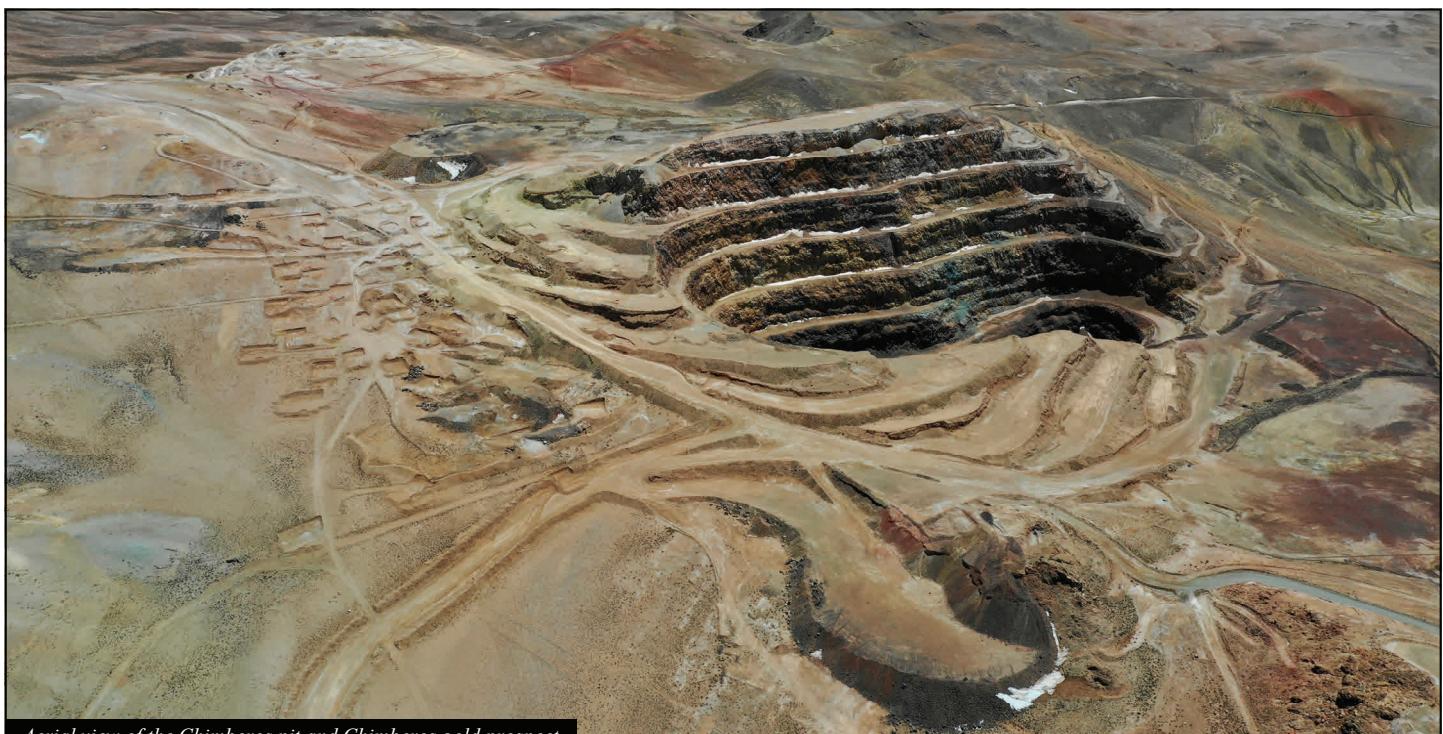

The Company remains open to settlement of both claims.

Kingsgate continues to cut costs and review expenditure across the Group – with staff redundancies in Sydney, relocation of the corporate office, and a number of non-essential service reductions all taking effect during the quarter. Kingsgate is currently undergoing an independent corporate review to identify further cost cutting opportunities in the next quarter.

### Notes for Mineral Equivalents:

The resource base of 1.9 million ounces of gold equivalent is broken down as follows: Measured - 0.08 Moz, Indicated - 1.46 Moz and Inferred - 0.33 Moz. Gold Equivalent is based on the following: AuEq (g/t) = Au (g/t) + Ag (g/t) / 60. Calculated from prices of US\$1200/oz Au and US\$19.00/oz Ag, and metallurgical recoveries of 80% Au and 84% Ag estimated from test work by Kingsgate (See ASX:KCN released titled "Kingsgate Mineral Resources and Ore Reserves 2016" dated 7 October 2016).
