

ODYSSEY
ENERGY LIMITED

ASX ANNOUNCEMENT

31 October 2018

SEPTEMBER 2018 QUARTERLY REPORT

The Directors of Odyssey Energy Limited (“**Odyssey**” or “**Company**”) are pleased to present the September 2018 quarterly report.

Activities during the quarter included:

- Odyssey has an acreage position with oil and gas rights in McLean County, Kentucky, USA. The project comprises a 100% working interest in oil and gas leases totalling 710 acres and located adjacent to the Rough Creek Fault System. There is the potential for small new conventional oil and gas pools in the area.
- The Company continues to assess the prospectivity of the existing leases for both conventional and unconventional oil & gas targets, but particularly with regard to the potential of the New Albany Shale as an unconventional oil target. This analysis will define future work, as well as potentially identify opportunities to expand the lease area footprint.
- The Company continues its efforts to identify and acquire suitable new business opportunities in the oil and gas and resources sectors, in the US and in other jurisdictions. The Company will make announcements to the market as appropriate should an acquisition occur.

For enquiries, please contact:

Lachlan Lynch | **Company Secretary**

Operations

McLean County Project – Odyssey 100% WI

The Company has an acreage position with oil and gas rights in McLean County, Kentucky, USA.

The project comprises a 100% working interest in oil and gas leases totalling 710 acres and are located adjacent to the Rough Creek Fault System, which forms the northern boundary of the Rough Creek Graben and is one of the major structural features in Western Kentucky.

Figure 1 shows the location of the Company’s permits in relation to oil and gas field locations and the Rough Creek fault system. Although the majority of production on-trend is historic, there is potential for small new conventional oil and gas pools in the area.

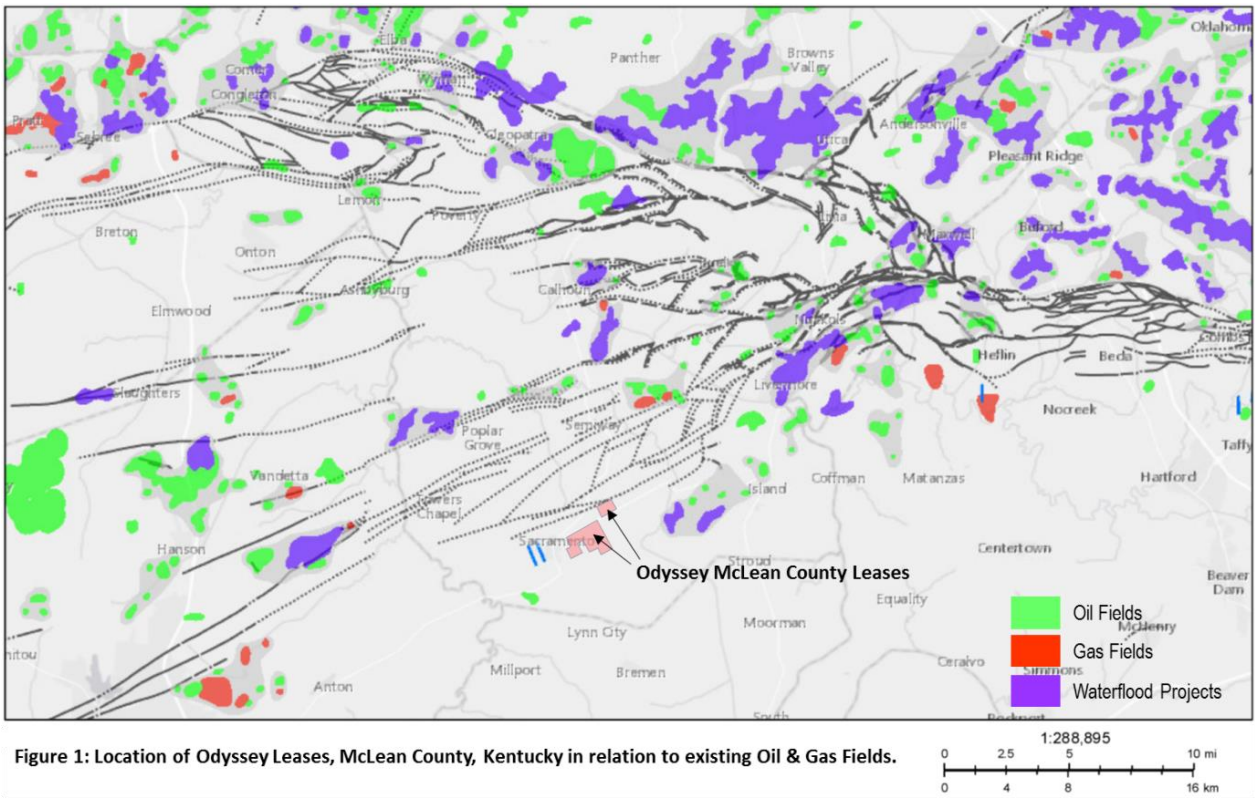

Figure 1: Location of Odyssey Leases, McLean County, Kentucky in relation to existing Oil & Gas Fields.

The leases are also located within the depositional limits of the New Albany Shale, which is the primary source rock for a petroleum system which has produced over 4 Billion Barrels of oil in the Illinois Basin. Figure 2 shows the extent to which this source rock is thermally mature for oil generation and a target for unconventional oil and gas appraisal drilling and evaluation.

The Company is continuing to review the prospectivity of the project area for both conventional and unconventional oil & gas targets, but particularly with regard to the potential of the New Albany Shale as an unconventional oil target. This analysis will define future activities in this project area, which may include expansion of the lease area footprint.

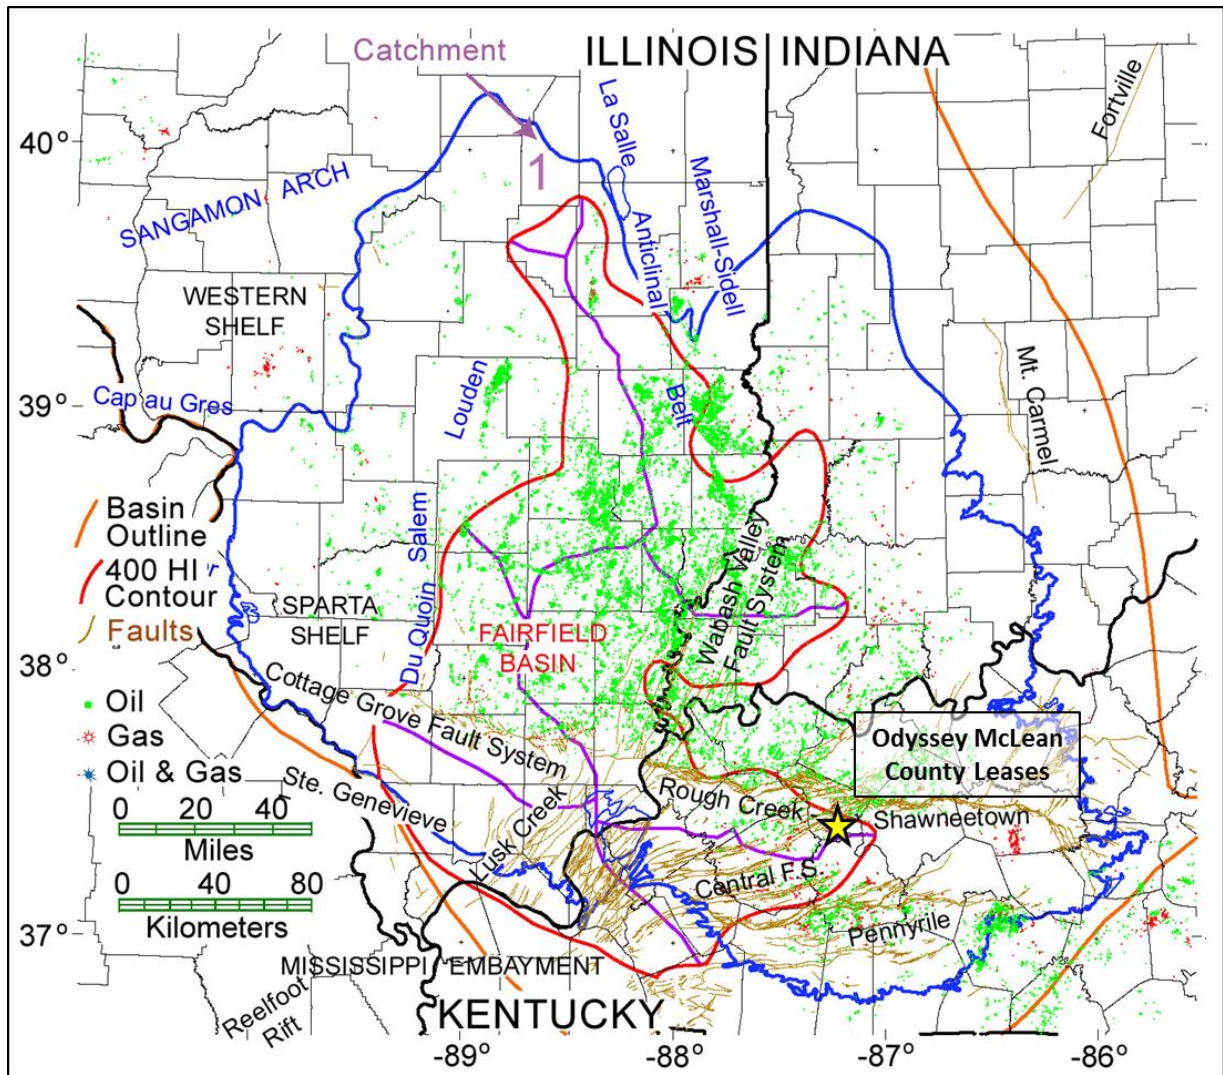

Figure 2: Extent of New Albany Shale mature for oil generation in Illinois Basin (red contour).

As previously advised, the system for obtaining title to gas leases in the USA is complex given that numerous parties may hold the undivided mineral rights to a particular tract of land. This can be a lengthy and expensive process. It is therefore customary that such title opinions are not sought until the Company proposes to conduct a drilling operation and/or expend significant amounts of money on a particular lease. As a result, limited title work has been conducted to date, and further title work will need to be completed before any substantial exploration expenditure is incurred.

Corporate

The Company is well funded with cash on hand at 30 September 2018 of \$14.48 million and no debt.

Change of Company Secretary

Mr Lachlan Lynch has been appointed Company Secretary of the Company following the resignation of Mr Clint McGhie effective today. Mr Lynch is a Chartered Accountant, who commenced his career at a large international accounting firm and is currently a Financial Controller for the Apollo Group.

The board would like to thank Mr McGhie for his excellent service to the Company.

Business Development

Several opportunities have been reviewed during the quarter, and the Company will continue in its efforts to identify and acquire suitable new business opportunities in the oil and gas and resources sectors, both domestically and overseas.

However, no agreements have been reached or licences granted and the Directors are not able to assess the likelihood or timing of a successful acquisition or grant of any opportunities.

Exploration Tenement Information

As at 30 September 2018, the Company has an interest in the following project:

Project	Net Acreage Participation	Odyssey Working Interest
McLean County Project	710	100%

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
