Corporate headquarters have been relocated from Los Gatos, California to Dallas, Texas yielding 45% savings on rent with most personnel in California being replaced with lower salaried personnel in Dallas. In addition, a critical business review was conducted to eliminate less profitable product lines, and reduce inefficiencies and operational overheads.

Connected IO has started moving production from its current manufacturer in China to a turn-key manufacturer in Taiwan to improve profit margins by up to 20%.

Revenue Update

CIO achieved cash receipts from customers for the quarter of \$454,000. In what was an operationally interrupted period due to the corporate restructuring taking place it was a robust achievement to keep revenues relatively consistent throughout the quarter.

Following the completion of the corporate restructuring the Company is focused on operational and sales penetration to grow revenues for the next quarter.

Capital Raise and Restructure

Connected IO Limited has made a number of strategic changes to improve the financial and operational position of the Company for future growth and profitability. The details of these initiatives were announced to the market on 22 August 2018 and included:

1. Connected IO completing a capital raise totalling \$2.53m to provide capital to secure future revenue growth and manufacturing capacity required to meet larger purchase orders.
2. The Company successfully re-negotiating its secured loan facility of \$1.37m which has now been extended to 30 June 2019.
3. Conduct a review of the operating and corporate structure of the Company and reduce expenses and refine sales objectives.

Gold-Asset Appeal

The Company has appealed the decision of a single judge of the Supreme Court to uphold Mr Andrew Paterson's application for judicial review of the Minister for Mines decision to terminate his application for E37/1220 and for the Company to pay Mr Paterson's legal costs

of those proceedings. If the Company is successful in the appeal the Minister's decision will stand and Mr Paterson's E37/1220 will be terminated.

Growing Market Penetration

The Company has continued to penetrate the market via its established relationships and has built new opportunities and avenues for sales and recurring revenues. The results of these initiatives are expected to be reflected in the next quarterly announcements.
