

# AGM Presentation

16 November 2018

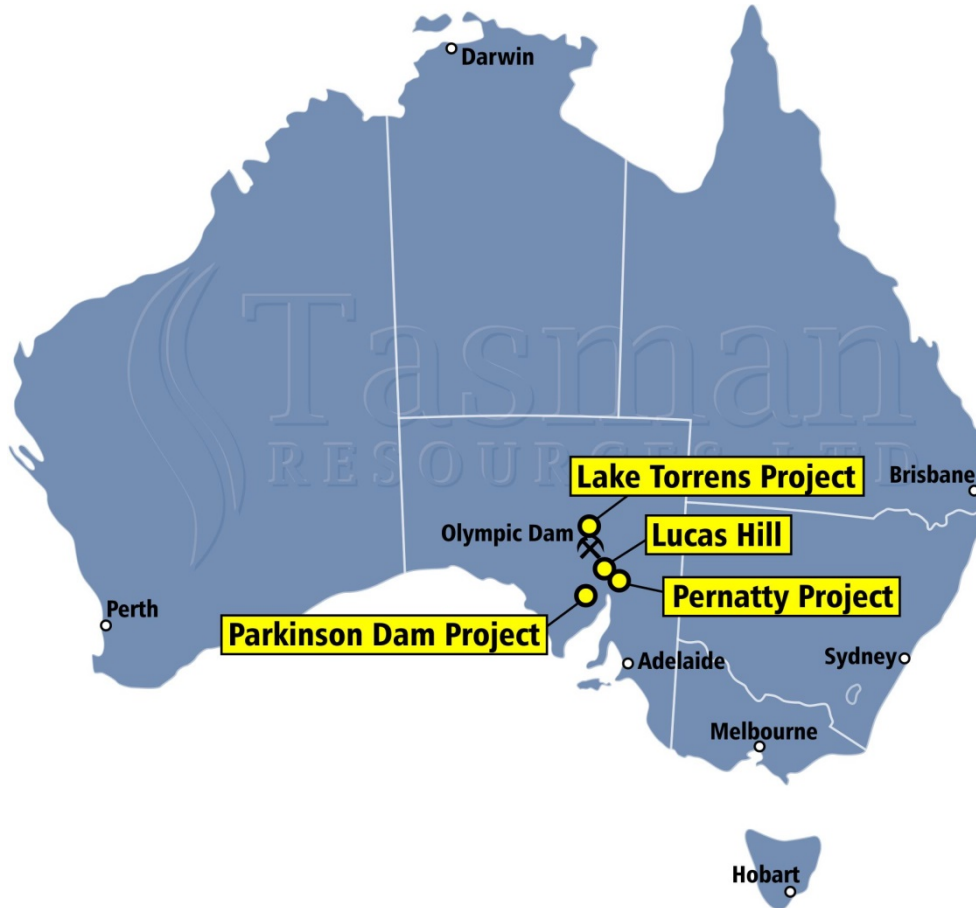

## Investment in Eden Innovations Ltd (ASX:EDE)

- **Tasman holds 594 million shares (39%) in the issued capital of Eden.**
- **Market value of Eden holding - \$49 million\***
- **Current Market Capital of Tasman - \$31 million\***
- **Tasman cash at bank - \$1,470,000\***

**\* As at 15 November 2018**

# Tasman Project Locations

## **IOCGU**

**Lake Torrens (1079 km<sup>2</sup>)**

**Lucas Hill (150 km<sup>2</sup>)**

**Pernatty (193 km<sup>2</sup>)**

## **Epithermal Au –Ag**

**Parkinson Dam (107 km<sup>2</sup>)**

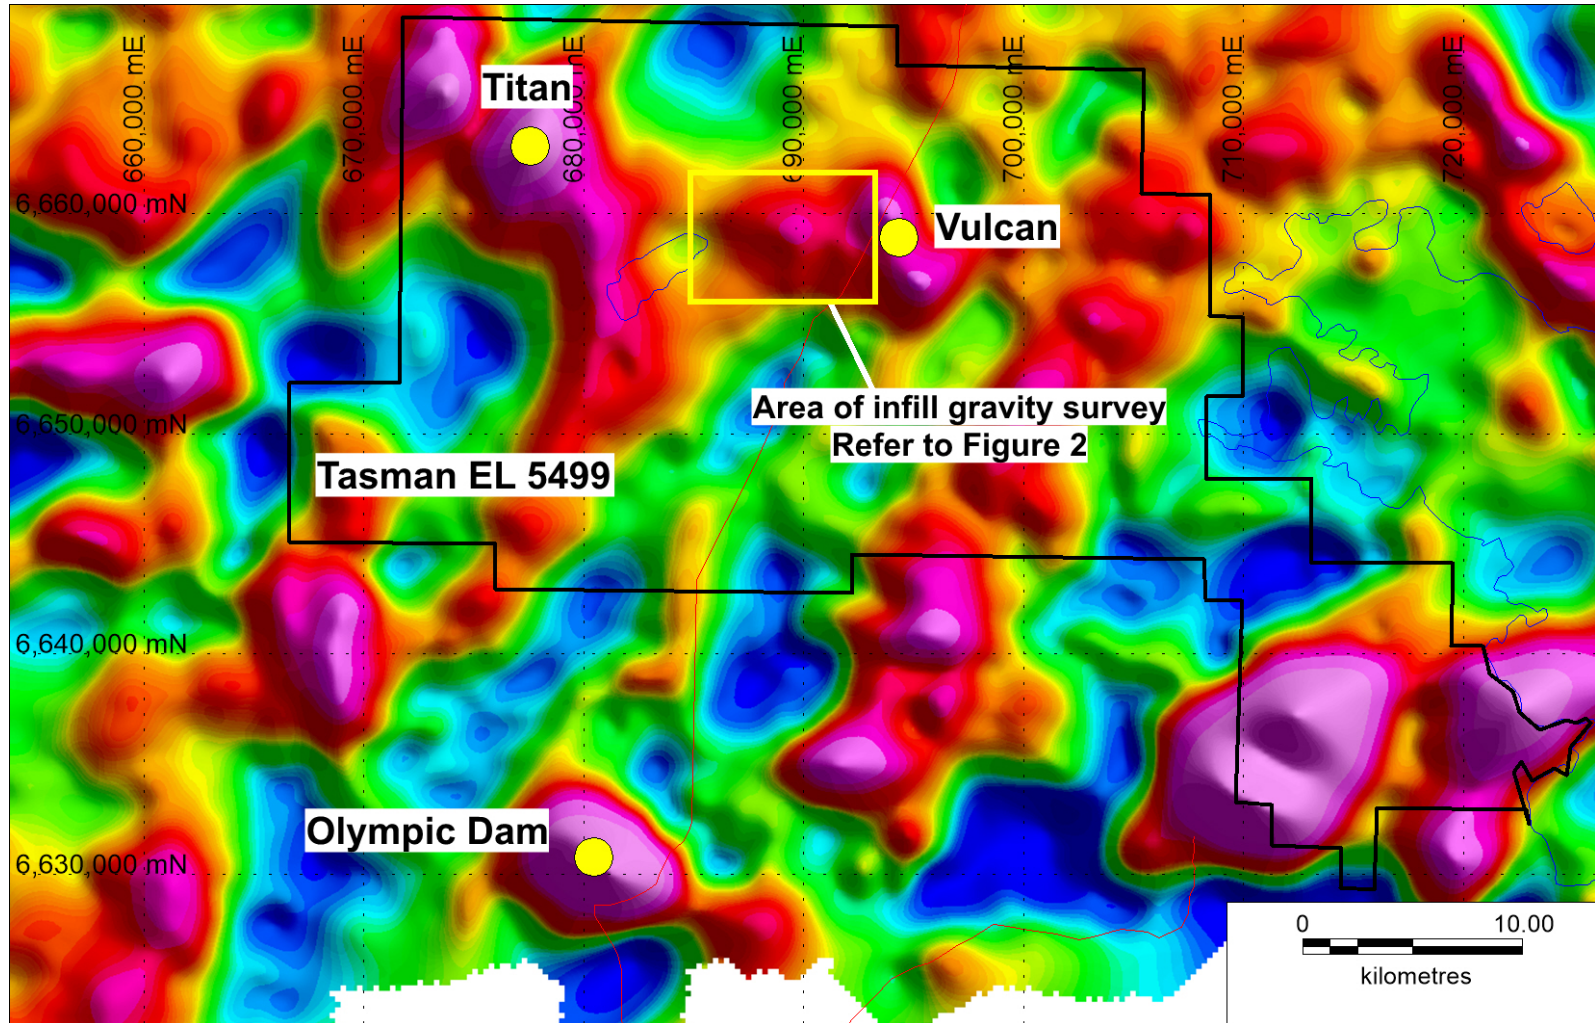

**Lake Torrens IOCGU  
Including Vulcan, Vulcan  
West prospects**

# Lake Torrens Project

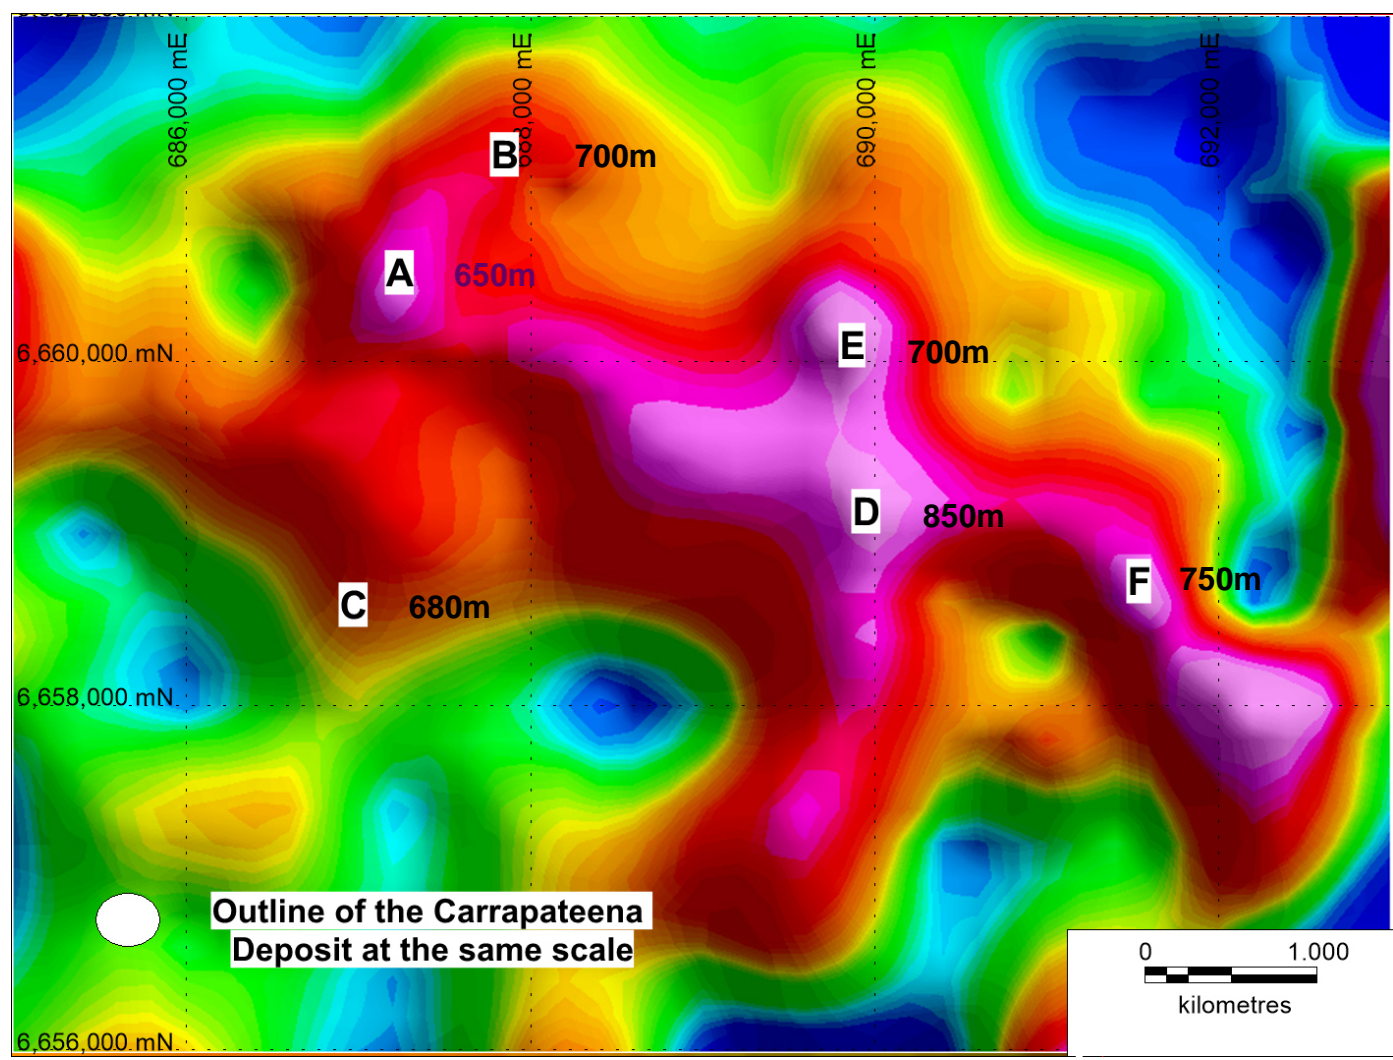

## Residual gravity image

# Vulcan West

## Residual Gravity with Prospective Targets and Modelled Depths

# Vulcan, Vulcan West, Zeus Prospects

## Current Strategy

- **Geophysical modelling completed in large area (approx. 50km<sup>2</sup>) between Vulcan and Zeus prospects. Follow up, more detailed gravity and modelling completed in areas of interest**
- **Prospective, shallower drill targets than Vulcan identified**
- **Initial discussions in relation to a possible joint venture have commenced.**

# Vulcan IOCGU Prospect

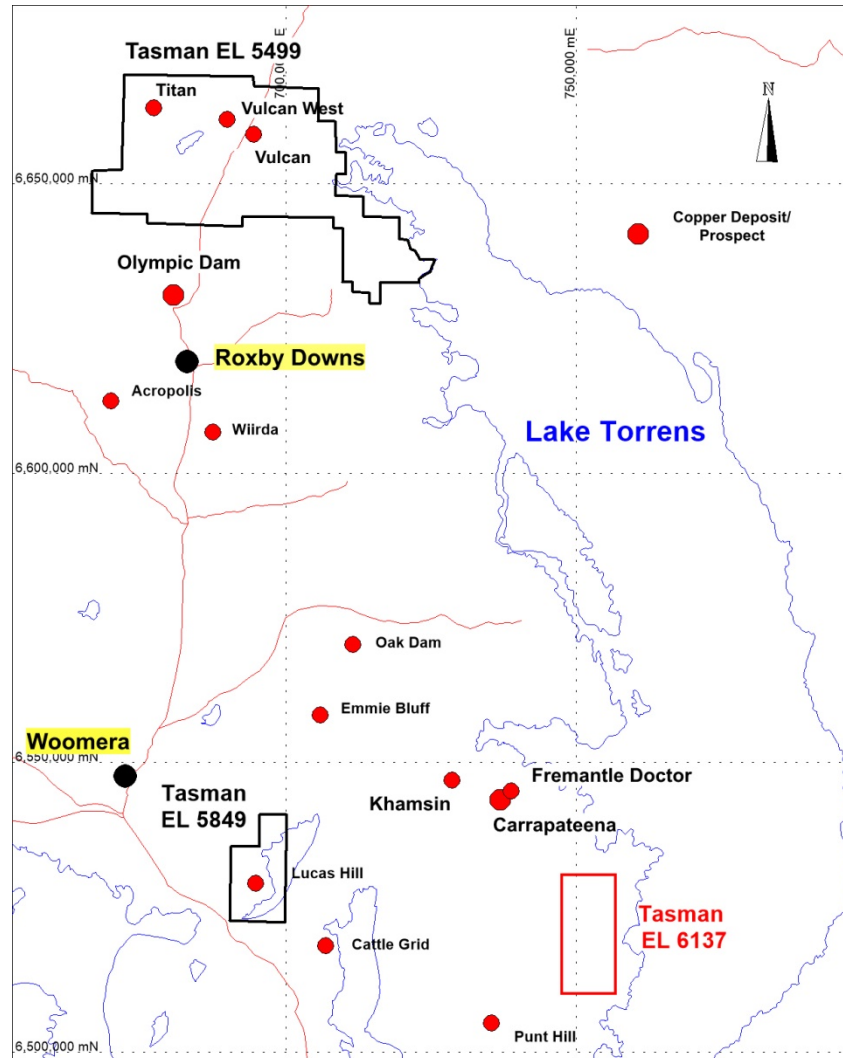

## Residual gravity image & drilling and priority targets

# Pernatty Prospect: Tenement Location

# Pernatty Prospect

**Initial prospectivity identified by Tasman based on:**

- **Regional geophysical data (magnetics and gravity)**
- **Possibility of reasonable basement depth (< 500m)**
- **Regional synthesis of IOCGU systems by Tasman**
- **Proximity to the Carrapateena deposit (20km)**

# Pernatty Prospect

## Current Strategy

- **Preliminary geophysical modelling completed**
- **Follow up detailed infill gravity completed (360 new stations)**
- **Further gravity modelling in progress – detailed infill gravity being considered for selected target areas**
- **Tasman to drill test any attractive targets or seek JV**

# Disclaimer

The interpretations and conclusions reached in this presentation are based on current geological theory and the best evidence available to the authors at the time of writing. It is the nature of all scientific conclusions that they are founded on an assessment of probabilities and, however high these probabilities might be, they make no claim for complete certainty.

Any economic decisions that might be taken on the basis of interpretations or conclusions contained in this report will therefore carry an element of risk.

It should not be assumed that the reported Exploration Results will result, with further exploration, in the definition of a Mineral Resource.

## Competent Person's Statement

The information in this presentation that relates to Exploration Results is based on and fairly represents information compiled by Robert N. Smith, Competent Person who is a member of the Australian Institute of Geoscientists. Mr Smith is a part-time employee of the company and a shareholder.

Mr Smith has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Smith consents to the inclusion in the report of the matters based on their information in the form and context in which it appears.

Note: Part of the information in this presentation for both the Parkinson Dam and Lake Torrens prospects was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported.
