CHANGE OF SHARE REGISTRY DETAILS

Pursuit Minerals Limited (ASX: PUR) advises that as of Monday 26 November 2018, Pursuit Minerals Limited will change its provider for shareholder registry services from Security Transfer Australia Pty Ltd to Automic.

Shareholders can easily and efficiently manage their holdings via Automic's secure and highly accessible online Investor portal. Automic's portal provides among other things an online interface to update and manage shareholder details, view balances and transaction history.

Shareholder registration online

Shareholders that are not already a user of Automic's Investor portal may visit <https://investor.automic.com.au> and signup to register their details using the two simple steps provided in the setup process.

Should shareholders have any queries in relation to their holding with Pursuit Minerals Limited, please contact Automic at:

Email: hello@automic.com.au

Telephone: 1300 288 664 (within Australia) or
+61 2 9698 5414 (outside Australia)

About Pursuit Minerals

Pursuit Minerals (ASX:PUR) listed on the ASX in August 2017 following the completion of acquisition of a portfolio of projects from Teck Australia Pty Ltd, which remains Pursuit's largest shareholder. Led by a Board and Management team with a wealth of experience from all sides of minerals transactions, Pursuit Minerals understands how to generate and capture the full value of minerals resource projects. From local issues to global dynamics, Pursuit Minerals knows how to navigate project development and deliver returns to shareholders and broader stakeholders.

Pursuit's project portfolio is focussed on the emerging Energy Metal, vanadium. In 2018, through compilation and interpretation of historical data, Pursuit applied for and was subsequently granted Exploration Tenements in Sweden and Project Reservations in Finland, covering projects with historical deposits of vanadium and extensive confirmed areas of vanadium mineralisation. Finland has in the past produced up to 10% of the world's vanadium and is currently rated the number one jurisdiction globally for developing mineral projects. Sweden has a long mining history and culture and was the second country in the world where vanadium was recognised as a metal. With its Sweden and Finland projects very well placed to take advantage of Scandinavia's world-class infrastructure, cost effective power and stable legislative frameworks, Pursuit is looking to accelerate assessment and potential development of its quality vanadium project portfolio.

With Europe rapidly transforming its energy grid to renewable energy, which will require large increases in battery storage, Pursuit's projects are well positioned to participate in the energy revolution underway in Europe.
