

## UPDATE ON DRILLING FOR GOVERNOR BROOME

**Astro Resources NL is an Australian-based mineral resources company focused on the commercial development and production of economically and environmentally sustainable mineral sands deposits, diamonds, gold and other minerals.**

Astro Resources NL (**ARO** or the **Company**) advises that as previously flagged in its Quarterly Activities Statement dated 23 October 2018, drilling for the resource upgrade was meant to be undertaken sometime in mid to late November 2018.

Unfortunately, the Company has only recently received the necessary approvals from various authorities and stakeholders to allow the Company to undertake its Programme of Works. As a result, the drilling programme is not expected to take place until sometime in January 2019. The Company expects to publish the final resource results in April or May 2019.

Further information will be provided as and when available.
