Highlights

- **Full drill program completed;**
- **Further samples sent for analysis;**
- **The first results of fire assay gold determination and results are expected within 1-2 weeks;**
- **Further and final results expected during January.**

Gladiator Resources Ltd (Company) is pleased to advise that its maiden drilling campaign has concluded on the Kroda prospect within the North Arunta Project, a joint venture between the Company and Prodigy Gold (ASX: PRX). The full campaign was completed on time and demobilisation has begun.

The final week of the campaign was dominated by 250 metres of Diamond Drilling with the resulting core being prepared for assay at the earliest convenience. A second batch of samples from the RC program has been selected and sent for fire assay with the third and final batch to be sent in early January. Results from the first batch of samples are expected before Christmas with results for the second and third batch expected in early and late January.

Rehabilitation work has begun on the access tracks which were created during the campaign with final rehabilitation works expected to conclude post-Christmas.

The Company is pleased with the drilling program which was conducted during very trying conditions, the knowledge gained will be invaluable for future programs to be undertaken on North Arunta Project.

The Company will now await the final results before finalising the next work campaign to be undertaken, noting that several prospective sites are under consideration within the greater North Arunta package of tenements.
