## Mill Construction Contract Award – Kirkalocka Gold Project

---

MACA Limited ('MACA') (ASX: MLD) is pleased to advise that it has been awarded a construction project through its subsidiary MACA Interquip, for Adaman Resources (a privately-owned resource company). The scope of work will include a new semi-autogenous grinding (SAG) mill installation and refurbishment of an existing mineral processing plant at the Kirkalocka Gold Project near Mt Magnet in Western Australia.

The value of the contract works is approximately \$28 million and will commence in Feb 2019 with a duration of eight months and employ a workforce of approximately 40 personnel. The contract follows early contractor involvement with the management team at Adaman Resources. This has enabled an advancement in the design process and the submission of orders for long lead time capital items. Commencement of the project remains subject to finalisation of Adaman's Project Finance documentation.

Operations Director Geoff Baker said 'We look forward to working with the team at Adaman Resources. MACA Interquip has an excellent record of successful refurbishment delivery. Our alliance with NCP International, who manufacture grinding mills and install complete comminution circuits globally, as an installation partner will provide MACA Interquip with further exposure as an integrated mineral processing supplier. The recent contract awards for MACA Interquip demonstrates the success of the MACA strategy to diversify its services within the resource industry'.

This new contract ensures a strong order book for MACA Interquip for the 2019 calendar year when added to the letter of intent for the refurbishment of the gold processing plant for Echo Resources. Other recent and ongoing work on processing plants includes the Savannah nickel project for Panoramic Resources and the Degruessa copper project for Sandfire Resources.
