December 2018 Quarterly Report

PERTH, AUSTRALIA, 31 January 2019: UltraCharge Limited (**ASX: UTR**, "UltraCharge" or "the Company") is pleased to provide its shareholders and the market with an overview of its operational activities during the past three-month period to 31 December 2018.

A key aspect for the Company during the Quarter has been attracting additional customers across the two-wheel and three-wheel markets for UTR's LNMO battery product. New sales are anticipated in the coming months.

The Company has received and delivered an initial order for a government institution in Israel for NRE project that is based on two stages, stage one have been delivered successfully and invoiced, the amount is \$75K AUD and stage two will be delivered in Q1 2019 totalling the same amount. The future potential for the supply of these batteries isn't certain at this stage.

The Company has progressed numerous business development opportunities with potential customers / partners in the electric vehicle (EV) market that have expressed interest in UTR's combined LNMO/TiO2 solution for ultrafast charging EV's.

One of these customers will provide a small NRE order for development of a battery to the Electric Car he delivers to customers, this project could lead into a big opportunity in the EV market using the combination of LNMO & Tio2.

The Company's cost reduction effort has led to a change in the lease agreement to new location in December 2019, the reduction in cost is significant and reduced the cost by \$150K annually.

Other notable Company achievements during the past Quarter have included:

- Ongoing work to finalise the first battery pack for testing in Blitz Motors' scooters had small difficulty with a design change in the battery pack requested from Blitz that has postponed the work, the new change in the design of pack will now postpone the delivery to later this quarter, we will advise once the new date for deliver is confirmed.
- Roadix have placed a small order for 100 Battery packs, total order isn't significant and we review the delivery capabilities for this order via our strategic partnership. Additional supply of 100 packs will be confirmed soon.

UltraCharge's Chief Executive Officer Kobi Ben-Shabat said: "We believe the key to achieving widespread adoption of electric vehicles is the production of ultra, fast-charging batteries.

"UltraCharge holds two proprietary chemistries that produce ultra, fast-charging batteries.

"The Company is committed to its long-term objective of commercialising and maximising the full potential of our technologies that will enable ultra, fast-charging batteries for electric vehicles."

About UltraCharge Limited (www.ultra-charge.net)

UltraCharge is an Israel-based company that is a global leader in identifying, acquiring and developing battery technologies that offer superior qualities and new solutions for the lithium ion and flow battery markets.

UltraCharge has established a battery facility to develop its platform technologies and customising solutions to meet end user requirements, and subsequently meet global market demand.

The Company offers a full lithium ion battery solution with the following suite of intellectual property:

- **Anode for Lithium Ion Batteries:** The technology will replace graphite in anodes (negative pole) with nanotube fibers made from titanium dioxide. This has the potential to revolutionise the market for lithium batteries by producing a battery that is safe, has a longer lifetime and is fast charging.
- **Cathode for Lithium Ion Batteries:** The technology contains a high voltage LiMnNio cathode that is half the cost of commercial cathodes and can offer a battery solution that has advantages in terms of the voltage, energy capacity and power capacity.
- **Electrolyte for Lithium Ion Batteries:** Low cost, high performing electrolyte solution. The intellectual property is around producing a more superior electrolyte salt – LiFSI - which can increase battery lifespan and performance at high and low temperatures.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
