ASX code: **K2F**

K2fly Signs Infoscope Agreement

Highlights

- Mineral Resources Limited to implement Infoscope enterprise software package
- Deployment will commence immediately focused on stakeholder relations
- Licence numbers anticipated to grow as further modules are implemented

K2fly Limited (ASX: K2F) (**K2fly** or the **Company**) is pleased to announce that they have recently signed an agreement with mining services provider, Mineral Resources Limited, to provide and implement the Company's Infoscope enterprise software package.

K2fly has been engaged to implement the Infoscope Land Management System (**LMS**) to assist in meeting the requirement for managing land operations with an initial focus on stakeholder engagement. The Infoscope LMS significantly reduces operational risk whilst improving efficiency by enabling project operators to gather and share critical information with all stakeholders, including regulators.

The contract is for an annual software agreement and implementation services. Nic Pollock, Chief Commercial Officer of K2fly said, "While we expect revenue for this contract to be less than \$150k per annum, we are extremely pleased to be able to implement our Infoscope application for Mineral Resources Limited and look forward to demonstrating the interconnectivity benefits that can be gained across a diverse operation. We are certainly looking forward to working with them to deliver a great outcome."

Implementation will commence immediately.

ENDS
