Survey Project Awards

Veris is pleased to announce the following awards for the provision of Surveying Services on two major infrastructure projects.

WestConnex M4 – M5 Link Tunnels

The Lendlease Samsung Bouygues Joint Venture (LSBJV), comprising Lendlease Engineering, Samsung C&T Corporation and Bouygues Construction was selected to design and construction the M4-M5 Link tunnels. The LSBJV has awarded Veris the survey works on this project.

The M4-M5 Link Tunnels design and construct contract includes delivery of twin tunnels which will link the New M4 at Haberfield with the New M5 at St Peters. This will allow the full benefits of WestConnex to be realised by creating a western bypass of the Sydney CBD.

It is expected that the works carried out by Veris on the project will be performed over 3 years, with initial works to be completed over a 12-month period.

Parramatta Light Rail Stage 1 Enabling Works

Diona Ward Civil JV has awarded Veris the utilities service locating and survey works on this project, expected to run over a 1 – 2 year period.

The purpose of the works is to minimise disruption to the flow of traffic during the construction and operation of the Parramatta Light Rail which is expected to open in 2023 and will be achieved by increasing the capacity of the surrounding road.

Veris' engagement on these projects is based on a schedule of rates depending on the project and subject to the scope of works and any potential subsequent engagements or variations.

Commenting on Veris' awards, Managing Director Adam Lamond said:

"These awards are meaningful long term contacts for the surveying division and continues to demonstrate Veris' exposure to the large-scale, long-term project opportunities, driven predominately through the East Coast infrastructure expenditure. Veris reputation in the market continues to grow and this is reflective in the quality of the clients we are partnering with in servicing these projects."
