Benchmark Minerals Intelligence Flake Supply - Demand Balance

Montepuez Graphite Project - Phase 1

Montepuez Graphite Project ¹	(First Module)
Capex to complete ⁴	US\$39.5 M
C1 Opex (concentrate/t first 10yrs)	US\$361/t
Grade processed	11% TGC (12% for first 18yrs)
Plant Type and Scale	Modular, ~500ktpa
Projected Payback	<2 years
EBITDA per annum ¹	>US\$30 Mpa
Metallurgical Recovery weathered	80%
Metallurgical Recovery fresh	85%
Mine Life	+50 years
Montepuez Basket Price ³	US\$1,064/t
Graphite Concentrate purity	>96% TGC
Mineral Resource ²	119.6Mt at 8.1% TGC
Current Ore Reserve ¹	42.2Mt at 9.3% TGC

Montepuez Graphite Project - Mozambique Transport Route

- Time to first exports ~ 15 months from finance
- Origin Capital Mandated to deliver project finance, Technical DD complete, lender engagement underway
- Mining Licence granted, port allocation, offtake agreements in place. No regulatory impediments to commencing production and exports
- 1. See ASX announcement on 4 December 2018 for "Increase in Montepuez Graphite Reserve" for detailed disclosure. Ore Reserves prepared by a competent person in accordance with the JORC Code. All material assumptions underpinning the production target in that announcement continue to apply and have not materially changed
- 2. See ASX announcement on 18th October 2018 for "Group Resources Update" for detailed disclosure, Mineral Resources prepared by a competent person in accordance with the JORC Code. All material assumptions underpinning the production target in that announcement continue to apply and have not materially changed
- 3. Based on the 31 October 2018 Benchmark Mineral Intelligence (BMI) FOB China graphite prices (spot prices), the basket price of Montepuez 96% TGC graphite concentrate is US\$1,064.63/t.
- Lapex to complete excludes VAT (which is expected to be refunded after production commences), Australian and Mozambique corporate costs incurred between project finance close and commercial production, project finance and equity funding fees, working capital needed during ramp up and any potential cost overruns.

Battery Minerals - Production Profile

Note 1: Battery Minerals Limited completed a feasibility study and announced a maiden Ore Reserve estimate for its Balama Central Graphite Project in December 2018. The decision to invest in Stage 1 and Stage 2 of the Balama Central Graphite Project will be subject to the completion of all necessary feasibility studies, permit applications, construction, financing arrangements, port access and execution of infrastructure-related agreements.

Note 2: The ramp start date for Montepuez included in this slide are subject to Montepuez project finance being finalised in H1 2019.

Purification and Spheroidisation Testwork

- Progress todate
 - Purification success with Urbix environmentally friendly, low temp
 <80°C, non-HF, process with no impact on flake morphology

Sample Fraction	Initial purity, %TGC	Final Purity, %TGC
-43 micron	95.2	99.95
-150 +43 micron	97.1	99.97
+300 micron	94.3	99.95
-300 +180 micron	93.6	99.98

- Spheroidising testing complete analysis in progress
- Programme completion end 2018

Flake Concentrate

Graphite Concentrate @ ± 95%TGC

Urbix proprietary innovative purification and spheroidisation technology

Purified Spherical Graphite @ +99.95% TGC

Montepuez flake identified with high crystallinity, ultra low Boron content, unique flake morphology and URBIX Purification technology together opening potential new markets

- Nuclear, Concrete, Composites, and military applications
- Montepuez flake used by URBIX in US Department of Energy
- Grant for Nuclear Grade Graphite Development
- Urbix Pilot Plant:
 - Capacity 24,000 tpa+ Purified Flake Graphite
 - High overall recoveries +75% for PSG

Community Engagement - on track

Project Finance progress

- Independent Technical Report completed on Montepuez Graphite Project implementation plan
- 2. Independent Marketing Report completed on graphite market, offtake and price forecasts
- 3. 12 potential financiers (banks and funds) have signed CAs and are reviewing information in a data-room
- 4. Three site visits conducted for potential financiers and investors
- 5. Four <u>non-binding</u> Indicative Terms exchanged so far with potential financiers, more expected to be exchanged
- 6. Next steps in March and June 2019 Quarters include:
 - review of and advice on <u>non-binding</u> indicative terms
 - additional site visits by potential financiers,
 - further due diligence by potential financiers,
 - legal documentation preparation

Next Steps

- 1. Complete Montepuez project finance
- 2. Complete detailed engineering and procurement
- 3. Award remaining construction contracts
- 4. Urbix, Anode and other downstream Scoping Study
- 5. Construct process plant and remaining infrastructure
- 6. Start mining processing and exporting
- 7. Investigate Vanadium and other opportunities
- 8. Complete construction of Montepuez within 12 15 months of project finance being finalised

Description

Montepuez project Summary

Process Engineering	"Lowest Risk" modular design philosophy. DFS + VES + Detailed engineering and advanced execute commenced. Crushing plant already on site and commissioned.
Construction	Construction has started. 100 person village constructed and commissioned. Tailings storage facility constructed. Site roads complete. Plant site earthworks complete.

Mining fleet and plant design structured for conservative delivery of required tonnages. Mining rate and crushing rate achieved comfortably. Expecting lowest quartile

Production costs. Pricing forecasts verified by independent market analysts. Looking to contribute 5-10% of each of the key natural graphite market segments. The company has 4 offtake Product Market agreements with groups which currently supply into each of these segments. 3 offtake customers are global top 10 graphite consumers.

Resource/Reserve Digability resolved through trial mining. Test pit 2,500 tonnes reconciled well with reserve model. Drilled to 50 x 12.5 metre spacings for measured and indicated

contributing > 42Mt Reserve. This is a conversion of 75% of the Measured and Indicated resource.

Granted mining Licence, All environmental approvals granted, Port capacity allocation assigned. No impediments to export and product sales

Haulage route tested with 2,500 tonne bulk sample haulage to Pemba. Port allocation assigned to BAT for 100.000tpa.

Total Capex USD\$51.2M, USD\$13.8M already spent. Only USD\$37.4M in construction spend remaining

Strong mining culture, Vale, South 32, large LNG Projects USD\$140BN in different stages of execution. Strong mining law. Fiscal stability regimes. Strong international arbitration capabilities. Mining Agreement opportunities available to projects over USD\$5M. Currently in progress.

High confidence capital and operating estimate to expand production to 100ktpa for ~USD\$35M.

is a significant achievement for our company.

Company has a spherical plant in USA in JV since 2016. 3 years of purification and spheronisation/spheroidisation testwork completed to date. Identified several non HF toxic acid purification techniques available to the company in addition to completing a PreFeasibility study on production of purified and coated spherical graphite as a

Downstream standalone operation in Reno Nevada USA. Testwork is mature. Community and Independent auditors have verified the project would comply with an audit against United Nations Equator principles as they relate to community and environment. This

BMI - Montepuez Basket Price Jan 16 to Jan 19

Montepuez Graphite Project

- Higher Fines flake product
- Robust basket price of circa US\$1,064/t1

Balama Central Battery Minerals - Flake Graphite Concentrate Sizing

Balama Project Summary

Process Engineering	"Lowest Risk" modular design philosophy. Concept Study, Scoping Study, Feasibility Study complete.
Production	Mining fleet and plant design structured for conservative delivery of required tonnages.

58ktpa, XXX/t OPEX, XXX/t current basket price, Project

Strong mining culture, Vale, South 32, large LNG Projects USD\$140BN in different stages of execution. Strong mining law. Fiscal stability regimes. Strong international

Product Market Pricing forecasts verified by independent market analysts. Exports not earlier than Q1 2021.

High quality resource and reserve estimation completed by independent consultants with benefit of real estimates and technical data from

Mining licence application expected for submission in early 2019.

Construction is yet to commence but will incorporate learnings from the Montepuez project.

Haulage route tested with 2,500 tonne bulk sample haulage to Pemba. We have provided an expression of interest for a supporting port allocation and will advance these discussions more formally in 2019.

arbitration capabilities. Mining Agreement opportunities available to projects over USD\$5M. Negotiation is yet to commence but we expect to be able to benefit from precedents set as part of the Montepuez Mining Agreement

High confidence capital and operating estimate to expand production to 100ktpa.

Opportunities will be examined in due course. Balama specific anode material production test work is currently only at a high level. Downstream

The Graphite resource at Balama contains vanadium. Currently 4-6,000 tpa of vanadium is discharged to the tailings dam as a by product of the graphite concentration process. The company is evaluating production and sale of an upgraded vanadium concentrate. The current vanadium price is >USD\$50,000/t

Vanadium

The company is continuing to collect data and engage with local communities consistent with industry best practice. Environmental Impact Assessment due for Community and completion in December 2018 Environment

Battery Minerals (Balama Central) Opex cost for first eight years of US\$363 per tonne FOB Pemba

^{1.} Based on the latest BMI CIF China graphite prices for 8 years starting 2022, the forecast basket price of Balama Central 96% TGC graphite concentrate in 2022 is \$1,106/t for the weathered material and \$1,275/t for fresh material.

Offtake with Key Graphite Processors in China & USA

Group	Term / Amount	Description	Comments
Qingdao Guangxing Electronic Materials Co. Ltd	3 years 10ktpa	One of China's largest graphite groups Researches & develops, manufactures and sells graphite products including spherical graphite, flake graphite and powdered graphite.	 Annual production: Raw material production: 70ktpa; Purified graphite production: 12ktpa; Processed graphite production: 40ktpa; Investment in 2017 to introduce additional capacity of 30ktpa for flake graphite, 6ktpa tonnes for spherical graphite and 6ktpa of powdered graphite.
Qingdao Black Dragon Graphite Co. Ltd	3 years 10ktpa	One of China's largest consolidated graphite companies five wholly owned or JV subsidiaries. Aggregately, the group operates 3 mining permits, 1 exploration permit, 2 diversified graphite plants, 2 graphite sheet plants and 1 flake graphite plant.	Annual production:Flake graphite: 60ktpa;Spherical graphite: 2.4ktpa
Qingdao Keshuo New Materials Technology Co. Ltd	3 years 10ktpa	Private Chinese processor of graphite for the anode market associated with Qingdao Taihelong New Energy Materials Co. Ltd (Taihelong), a spherical graphite manufacturer.	Taihelong's annual spherical graphite production is 6ktpa.
Urbix Resources	3 years and option for +3 years 5ktpa and option for +6ktpa	One of the largest natural graphite providers in the USA. Specializes in all aspects of the graphite value chain. Premier provider of graphite ore, refined graphite powders, graphene, and other advanced graphite products.	

Montepuez - Ore Reserve Estimate

Montepuez Graphite Project - November 2018 Ore Reserve Estimate

Deposit	Ore type	Class	Ore (Mt)	TGC (%)
	Weathered	Probable	3.58	8.31
Buffalo	Fresh	Probable	16.80	10.06
	Subtotal	Probable	20.38	9.75
	Weathered	Probable	2.41	8.39
Elephant	Fresh	Probable	19.41	8.87
	Subtotal	Probable	21.82	8.82
	Weathered	Probable	5.98	8.34
TOTAL	Fresh	Probable	36.21	9.42
	TOTAL	Probable	42.19	9.27

Notes:

- The Ore Reserve estimate was compiled under the supervision of Mr Jon Hudson who is an employee of Snowden Mining Industry Consultants and a Fellow of the South African Institute of Mining And Metallurgy. Mr Hudson has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity that he has undertaken to qualify as a Competent Person as defined in the JORC Code.
- The Ore Reserve was estimated above a cut-off of 3.4% TGC for weathered and 4.3% TGC for fresh.
- All Ore Reserve tonnes have been rounded to the nearest 10,000 tonnes and grade to the nearest 0.01.
- The Ore Reserve estimate includes small amounts of Inferred material in the form of mining edge dilution.

Balama Central Project Reserves

Probable Ore Reserve Estimate (6% TGC cut-off grade)							
Pit	Ore type	Ore (Mt)	TGC (%)				
Lennox	Weathered	3.36	11.09				
	Fresh	8.19	11.70				
	Total	11.55	11.52				
Byron	Weathered	2.08	10.18				
	Fresh	6.02	10.49				
	Total	8.11	10.41				
Total	Weathered	5.44	10.74				
	Fresh	14.21	11.19				
	Total	19.66	11.06				

<u>Total Mineral Resource</u> As of October 2018 for the Montepuez and Balama Central Projects is **152.6Mt** @ **8.5% TGC for 13.03Mt** of graphite reported at a 2.5% and 6% TGC cut-off respectively.

Battery Minerals <u>Group Mineral Resource Estimate¹ (2.5% - Montepuez, 6% - Balama TGC Cut-off)</u>

Billion Dollar Opportunity from Graphite

Disclaimer & Competent Persons Statement

Forward Looking Statements

- Statements and material contained in this Presentation, particularly those regarding possible or assumed future performance, resources or potential growth of Battery Minerals Limited, industry growth or other trend projections are, or may be, forward looking statements. Such statements relate to future events and expectations and, as such, involve known and unknown risks and uncertainties. Such forecasts and information are not a guarantee of future performance and involve unknown risk and uncertainties, as well as other factors, many of which are beyond the control of Battery Minerals Limited. Information in this presentation has already been reported to the ASX.
- Battery Minerals confirms that all the material assumptions underpinning the production targets for its Montepuez and Balama Central graphite projects and any of the forecast financial information derived from these production targets, in the 4 and 12 December 2018 ASX announcements, on these projects continue to apply at the date of release of this presentation and have not materially changed. Battery Minerals confirms that it is not aware of any new information or data that all material assumptions and technical parameters underpinning the estimates in the 4 and 12 December 2018 announcements continue to apply and have not materially changed.

Competent Persons Statement

- All references to future production and production & shipping targets and
 port access made in relation to Battery Minerals are subject to the
 completion of all necessary feasibility studies, permit applications,
 construction, financing arrangements, port access and execution of
 infrastructure-related agreements. Where such a reference is made, it
 should be read subject to this paragraph and in conjunction with further
 information about the Mineral Resources and Ore Reserves, as well as the
 relevant competent persons' statements.
- Any references to Exploration Results, Ore Reserve and Mineral Resource estimations should be read in conjunction with the competent person statements included in the ASX announcements referenced in this presentation as well as Battery Minerals' other periodic and continuous disclosure announcements lodged with the ASX, which are available on the Battery Minerals' website.

- The information in this report that relates to Battery Minerals'
 Mineral Resources or Ore Reserves is a compilation of previously published
 data for which Competent Persons consents were obtained. Their
 consents remain in place for subsequent releases by Battery Minerals of
 the same information in the same form and context, until the consent is
 withdrawn or replaced by a subsequent report and accompanying
 consent.
- The information in this Presentation that relates to Montepuez Mineral Resources and Ore Reserves is extracted from the ASX Announcements dated 18 October 2018 and 4 December 2018 respectively, both of which are available at Battery Minerals website in the ASX announcement page.
- See ASX announcements on the Balama Central Feasibility Study dated 12 December 2018 for details, Table 1 and Competent Person Statement
- Any references to Mineral Resource estimates on the Balama Central Project should be read in conjunction with the competent person statements included in the ASX announcements referenced in this report (See ASX announcement dated 29 March 2018 entitled "Resources double at Balama Central graphite project in Mozambique" for full details and Competent Persons Statement) as well as Battery Minerals' other periodic and continuous disclosure announcements lodged with the ASX, which are available on the Battery Minerals' website.
- The information in this presentation that relates to Battery Minerals'
 Balama Central Mineral Resources is a compilation of previously published
 data for which Competent Persons consents were obtained. Their
 consents remain in place for subsequent releases by Battery Minerals of
 the same information in the same form and context, until the consent is
 withdrawn or replaced by a subsequent report and accompanying
 consent.
- The information in this presentation that relates to Mineral Resources in the ASX announcement dated 29 March 2018 and entitled "Resources double at Balama Central graphite project in Mozambique" which is available at Battery Minerals website at http://www.batteryminerals.com.au in the ASX announcements page.

- Battery Minerals confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the market announcements continue to apply and have not materially changed. Battery Minerals confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.
- Battery Minerals Limited released the results of a DFS on its Montepuez Project on 15 February 2017 & its Value Engineering Study (VES) results for Montepuez on 18 October 2017. These releases are available on Battery Minerals' website & ASX.
