ASX RELEASE

19 March 2019

Orcoda Healthcare Logistics Update

Orcoda Limited (ASX: ODA) ('Orcoda' or 'the Company'), the resources, healthcare, and transport logistics optimisation company, is pleased to announce that its Healthcare Logistics Division has two disclosures:

Community Transport - The Company has successfully completed a paid four-month solution testing process for a large community transport provider which is now progressing to contract. The Orcoda Management System has proven capable of dispatching, recording and providing compliance reporting for passenger movements for people with disabilities and for aged care transport. The solution testing was conducted over four months for a fee of \$30K.

Medical Practice Patient Transport - The Company has entered into a contract with a Brisbane-based medical practice to commence a trial to provide general practice medical centres with high quality patient transportation.

The Company is in the early stage of discussions with a national healthcare provider to fast-track a national roll-out of the Orcoda Medical Practice Patient Transport solution.

"Community Transport is a challenging area for transport providers. When the cargo is a person, it adds complexities and real time feedback not experienced in traditional supply chains. Under the new funding schemes, many not-for-profit providers will struggle to survive unless they become more efficient. Orcoda's optimisation solution improves levels of efficiency and customer service which assists community transport providers to meet their clients' needs in today's more competitive world." Managing Director, Brendan Mason said.
