ASX Announcement

DRAGONTAIL CONTINUES RAPID INSTALLATIONS GROWTH

2 April 2019 (Melbourne): Dragontail Systems Limited (ASX: DTS, the “**Company**” or “**Dragontail**”) is pleased to announce that it continued its monthly installation expansion at a rate of over 300 locations in the month of March. This continues last month's installations momentum in expanding Dragontail's install base.

The Company's operations during the past month also mark a new record of up to 32 installations in one day.

The installations consist of the Company's two flagship products, the ALGO Dispatching Platform and the Artificial Intelligence QT Camera.

As part of the Company's expansion, the installation of Pizza Hut Australia's stores has also begun, after a short and effective integration process, and is expected to complete by the end of the year.

Mr. Ido Levanon, Dragontail's Managing Director, added: "We are excited to experience the fulfillment of Dragontail's potential. The installation of our products in hundreds of stores every month clearly demonstrates our capabilities both in terms of technology and in the operative sense".

About Dragontail Systems

Dragontail is revolutionising the Quick Service Restaurant (QSR) and foodservice industry with its Algo System and computer-vision QT quality system that uses artificial intelligence (AI) machine learning.

The Algo System uses a sophisticated patented algorithm to optimise and manage the entire food preparation process from order to delivery. It is the first system in the world to fully automate and streamline the kitchen flow to deliver an immediate and significant return on investment to fast food and quick service restaurants.

The QT system's sensor and camera automatically monitor the preparation and cooking process in the kitchen to improve the quality and consistency of meals. Using proprietary advanced AI machine-learning technology, the system keeps improving its diagnostics, becoming even more efficient.
