ASX RELEASE

11 April 2019

Appendix 4C and Company Update

4DS Memory Limited (ASX:4DS) (**4DS** or the **Company**) is pleased to provide its Quarterly Report for the quarter ended 31 March 2019, along with a Company update.

imec Collaboration

During the quarter, the Company made a number of significant announcements in relation to the progress the Company has been making with its development partner, imec.

In late January 2019, 4DS announced that imec had fabricated functional 300mm wafers on the same multi-million dollar state-of-the-art production equipment used by high volume manufacturers of memory. The wafers were subsequently relocated to 4DS's facilities in Silicon Valley where they underwent extensive analysis.

On 20 February 2019, 4DS announced that imec had produced 23 testable 300mm wafers, with minor changes in process conditions for each wafer so as to identify the impact of such changes on the desired memory characteristics for Storage Class Memory. Wafer "D17" demonstrated the best characteristics with respect to endurance and retention – two core characteristics for Storage Class Memory on which the testing and analysis was focussed.

- Endurance analysis has shown that the Company can cycle its Interface Switching ReRAM memory cells into the millions of cycles, a first for the Company; and
- Retention analysis has shown the best retention results the Company has been able to produce outside of its own facilities.

This was a significant achievement for the Company as it was the first time the Company had been able to replicate and improve certain characteristics on the same multi-million dollar state-of-the-art production equipment used by high volume/high density manufacturers of memory.

On 2 April 2019, 4DS announced that imec had commenced the processing of the next lot of 300mm wafers, being variations of wafer D17. The speed with which 4DS and imec have been able to determine the process conditions for this next lot of wafers, and commence their manufacture, is due to the invaluable data obtained from previous iterations.

Processing of this next lot of wafers remains on track and results from their analysis will be available in Q2 2019, as previously reported.

In addition, members of 4DS' management and technical team are planning to be in Belgium during the week beginning 27 May 2019 for meetings with imec.

About 4DS

4DS Memory Limited (ASX: 4DS), with facilities located in Silicon Valley, is a semiconductor development company of non-volatile memory technology, pioneering Interface Switching ReRAM (Non-Filamentary ReRAM), for next generation gigabyte Storage Class Memory. Established in 2007, 4DS owns a patented IP portfolio, comprising 20 granted US patents and 3 patents pending, which has been developed in-house to create high density Storage Class Memory. 4DS has a joint development agreement with Western Digital subsidiary HGST, a global storage leader, which accelerates the evolution of 4DS' technology. 4DS also collaborates with imec, the world's #1 independent semiconductor development institute.

About imec

imec is the world-leading research and innovation hub in nanoelectronics and digital technologies. The combination of our widely acclaimed leadership in microchip technology and profound software and ICT expertise is what makes us unique. By leveraging our world-class infrastructure and local and global ecosystem of partners across a multitude of industries, we create ground breaking innovation in application domains such as healthcare, smart cities and mobility, logistics and manufacturing, energy and education.

As a trusted partner for companies, start-ups and universities we bring together close to 3,500 brilliant minds from over 75 nationalities. Imec is headquartered in Leuven, Belgium and also has distributed R&D groups at a number of Flemish universities, in the Netherlands, Taiwan, USA, China, and offices in India and Japan. In 2016, imec's revenue (P&L) totalled 496 million euro. Further information on imec can be found at www.imec-int.com.

imec is a registered trademark for the activities of IMEC International (a legal entity set up under Belgian law as a "stichting van openbaar nut"), imec Belgium (IMEC vzw supported by the Flemish Government), imec the Netherlands (Stichting IMEC Nederland, part of Holst Centre which is supported by the Dutch Government), imec Taiwan (IMEC Taiwan Co.) and imec China (IMEC Microelectronics (Shanghai) Co. Ltd.) and imec India (Imec India Private Limited), imec Florida (IMEC USA nanoelectronics design center).

Notes

- The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
- If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
