# **HIGHLIGHTS**

## **Gruyere Gold Project**

- Guidance for 2019 gold production of 100,000 to 120,000 ounces (100% basis)
   at all-in sustaining costs of between \$1,050 and \$1,150 per ounce.
- First gold production remains on target for second half of June 2019 quarter.
   Gold Road is fully funded to first gold production and forecast operational requirements
- Ore stockpiled continues to increase with approximately 800,000 tonnes mined ahead of plant commissioning.

# **Exploration**

Drilling of the 2019 \$20 million prioritised exploration programme commenced in February with follow-up diamond and RC drilling at Gilmour and reconnaissance geochemical drilling at Stock Route

Infill and extensional drilling at Gilmour completed in late 2018 delivered high-grade intercepts including 1.78 metres at 29.68 g/t Au from 290 metres including 0.96 metres at 54.59 g/t Au from 290.82 metres (18WDDD0026); 8 metres at 6.18 g/t Au from 143 metres including 2 metres at 22.27 g/t Au from 147 metres (18WDRC0210) and 3 metres at 13.99 g/t Au from 124 metres including 1 metre at 40.01 g/t Au from 124 metres (18WDRC0199)

# ASX

# Corporate

As at 31 March 2019, cash at bank was \$49 million with \$117 million of undrawn debt facilities.

# **Gruyere Gold Project (50%)**

The development of the Gruyere Gold Project (**Project**) is nearing completion (at 97%) with works in progress across the site and progressive handover to commissioning. The Project schedule remains on budget with first gold on target for the second half of the June 2019 quarter.

Commissioning of the high voltage electrical sub-stations, central control room, SAG mill sub-systems and water systems is complete. Pumping of process water from the Yeo Borefield in the southern section to the main transfer station was successfully delivered ahead of process plant wet commissioning activities. Dry commissioning is in progress including the coarse ore reclaim and mill feed circuits, the grinding area SAG and Ball Mills, CIL, thickeners and reagents areas.

As planned, mining commenced during the quarter with approximately 800,000 tonnes of ore mined and stockpiled. The substantial ore stockpile largely de-risks mining related aspects of the operation through the commissioning and ramp-up phase. During the initial stages of plant commissioning and ramp-up, lower grade stockpiled ore will be processed to reduce gold losses associated with lower recoveries anticipated as plant operations are stabilised. Gold Road confirms previously provided maiden guidance for 2019 forecast gold production at Gruyere of 100,000 to 120,000 ounces (100% basis) at all-in sustaining costs of \$1,050 to \$1,150 per ounce. Gold Road's share of 2019 forecast production will be between 50,000 and 60,000 ounces<sup>1</sup>.

Gruyere's Final Forecast Capital Cost estimate, excluding JV support costs, remains unchanged at \$621 million (100% basis), of which \$284 million is attributable to Gold Road<sup>2</sup>.

# **Exploration**

During the quarter, Gold Road announced a 2019 exploration budget of \$20 million (100% basis) across the Yamarna Greenstone Belt. Exploration will focus on advancing high priority targets through the Project Pipeline with 40,000 to 50,000 metres of diamond and reverse circulation (**RC**) drilling as well as generating new targets to supplement the Project Pipeline stream with up to 75,000 metres of aircore drilling.

Final results from infill and extensional drilling carried out late in 2018 at the Gilmour deposit, in the Southern Project area, were received. The results demonstrate the remarkable internal consistency and deliver extensions to known high-grade mineralisation. The new intersections include:

- 8 metres at 6.18 g/t Au from 143 metres including 2 metres at 22.27 g/t Au from 147 metres (18WDRC0210)
- 3 metres at 13.99 g/t Au from 124 metres including 1 metre at 40.01 g/t Au from 124 metres (18WDRC0199)
- 3 metres at 13.84 g/t Au from 180 metres including 1 metre at 38.23 g/t Au from 180 metres (18WDRC0192).

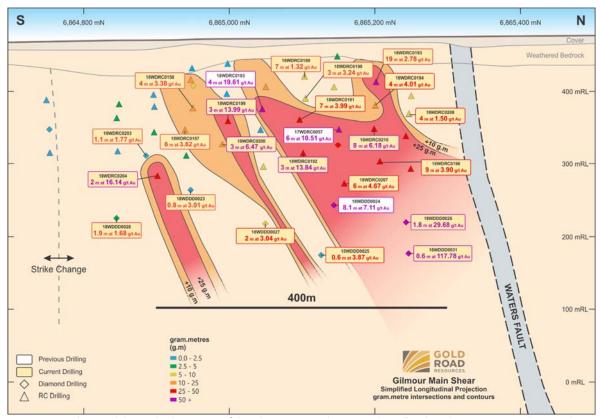

Figure 1: South to north longitudinal projection of the Gilmour Deposit showing geologically selected intersections on the Main Shear

Drilling re-commenced at Gilmour and Morello during the quarter. The priority focus of the programme is stepout drilling to test down dip and strike extensions to known mineralisation, as it remains open in all directions. The campaign includes framework drilling on the Morello Shear, to test stratigraphic equivalents to the mineral system identified at Gilmour. Assay results are expected in the June 2019 quarter.

Planned work for the June 2019 quarter will focus on RC and diamond drilling at Gilmour and Morello, Smokebush and Toppin Hill Camps (Southern Project Area) as well as Stock Route and Bloodwood (Northern Project Area). Planned aircore drilling will continue in the June 2019 quarter focussing on Milestone 1 and 2 targets.

# **Corporate**

#### **Market Recognition**

Gold Road's \$150 million corporate and project syndicated finance facility that supports the Company's ongoing participation in the development of the Gruyere Gold Project and continued exploration at Yamarna won IJGlobal's 2018 Asia-Pacific Metals and Mining Deal of the Year.

PCF Capital Group (as financial advisers) and King and Wood Mallesons (as legal advisers) assisted Gold Road in relation to the transaction. The financing syndicate comprised ING Bank Australia, National Australia Bank and Société Générale Hong Kong.

#### **Financial Update**

As at 31 March 2019, the Company had cash of \$49 million and \$117 million of undrawn debt facilities.

Gruyere expenditure incurred<sup>3</sup> during the quarter was \$47 million on development and \$10 million in JV Support Costs (100% basis). The Company's share of payments for the development of Gruyere including JV Support Costs for the quarter was \$16 million.

Gold Road's share of the Final Forecast Capital Cost estimate is \$284 million 4 and JV Support Costs of \$17.5 million 5. Gold Road anticipates further capital payments of approximately \$27 million 6.

#### **Debt Facilities**

In the June 2019 quarter, Gold Road forecasts increasing total drawings on the Finance Facilities to approximately \$65 million to fund Gruyere development and commissioning activities, operating costs during the initial rampup period and maintain a cash reserve of \$30 to \$50 million.

#### **Current Hedging Position**

Gold Road's existing gold forward sales contracts as at 31 March 2019 are summarised in the table below. No additional production was hedged during the quarter.

| Calendar  | Quarter      | Quarterly Volume | Weighted Average Price |
|-----------|--------------|------------------|------------------------|
| Year      |              | Ounces           | A\$/oz                 |
| 2019      | 30 September | 3,700            | 1,758                  |

| 2021      | 31 March     | 10,800           | 1,810                  |
|           | 30 June      | 10,300           | 1,823                  |
|           | 30 September | 9,800            | 1,836                  |
|           | 31 December  | 8,800            | 1,851                  |
| Sub-Total |              | 39,700           |                        |
| 2022      | 31 March     | 5,800            | 1,894                  |
| Sub-Total |              | 5,800            |                        |
| Total     |              | 110,000          | 1,808                  |

<sup>&</sup>lt;sup>3</sup> For accounting purposes, expenditure is 'incurred' when goods or services have been provided.

<sup>&</sup>lt;sup>4</sup> Level of accuracy range +2%/-2%. Refer ASX announcement dated 30 July 2018

<sup>&</sup>lt;sup>5</sup> These costs include Joint Venture management fees, amortisation of gas and power station capital costs before Project commissioning, and native title and community relations costs. Refer ASX announcement dated 7 November 2016.

<sup>&</sup>lt;sup>6</sup> Gold Fields will fund the costs associated with Cyanide Code compliance and up to \$50.7 million of cost overruns, excluding scope changes and force majeure costs.

#### **Share Capital**

As at 31 March 2019, the Company had 877,977,231 ordinary fully paid shares on issue and 7,487,334 performance rights granted with various vesting and expiration dates.

On 2 April 2019, BlackRock Group announced that it had acquired a 7.54% shareholding in Gold Road. This followed a sustained period of buying on-market by the BlackRock during the quarter. Gold Road is pleased to welcome BlackRock, one of the world's largest asset managers, as one of the Company's top three shareholders.

#### **About Gold Road**

Gold Road is pioneering development of Australia's newest goldfield, the Yamarna Belt, 200 kilometres east of Laverton in Western Australia. The Company holds interests in tenements covering approximately 6,000 km<sup>2</sup> in the region, which is historically underexplored and highly prospective for gold mineralisation. In November 2016, Gold Road entered a 50:50 joint venture with Gold Fields for the Gruyere JV covering 144 km<sup>2</sup>.

The Yamarna leases contain a gold Mineral Resource of 6.6 million ounces, including 5.8 million ounces at the Gruyere Deposit and an Ore Reserve of 3.9 million ounces. All current Mineral Resources and Ore Reserves are contained within the Gruyere JV project areas, of which the Company owns 50%.

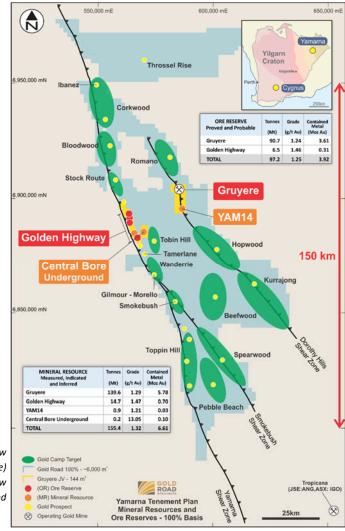

The Current Operational Plan for Gruyere indicates the Project's Ore Reserve supports an average annualised production of 300,000 ounces for at least 12 years. Construction is underway on the Project, with first gold scheduled for the June 2019 quarter.

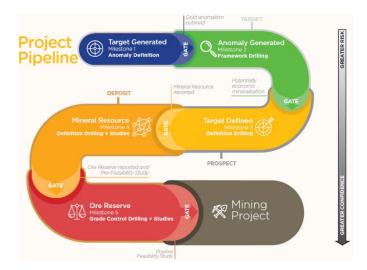

Gold Road continues to explore for multi-million ounce discoveries on its 100%-owned Yamarna tenements, and additional high-value deposits to add mine life to the Gruyere JV.

The Company is focused on unlocking the potential of the Yamarna Belt and has developed an extensive exploration plan focusing on new gold discoveries in the region.

Location and Geology of the Yamarna Tenements (plan view MGA Grid) showing Gold Road's 100% tenements (blue outline) and Gold Road-Gold Fields Gruyere JV tenements (yellow outline), Mineral Resources, Ore Reserves (100% basis) and main Exploration Projects.

Gold Road uses a staged **Project Pipeline** approach to manage, prioritise and measure success of the exploration portfolio. Each target is classified by **Milestone** and ranked using geological and economic criteria. Regular peer review, prioritisation and strategy ensure that the highest quality projects are progressed across all stages of exploration.

#### Notes:

- All Mineral Resources and Ore Reserves are completed in accordance with the JORC Code 2012 Edition
- All figures are rounded to reflect appropriate levels of confidence. Apparent differences may occur due to rounding
- Mineral Resources are inclusive of Ore Reserves
- The Gruyere JV is a 50:50 joint venture between Gold Road and Gruyere Mining Company Pty Limited, a wholly owned Australian subsidiary of Gold Fields Ltd. Figures are reported on a 100% basis unless otherwise specified
- Gold Road holds an uncapped 1.5% net smelter return royalty on Gold Fields' share of production from the Gruyere JV once total gold production from the Gruyere JV exceeds 2 million ounces
- All Open Pit Mineral Resources are reported at various cut-off grades allowing for processing costs, recovery and haulage to the Gruyere Mill. Gruyere 0.30 g/t Au. Attila, Argos, Montagne, Orleans, and Alaric 0.50 g/t Au. YAM14 0.40 g/t Au. All Open Pit Mineral Resources are constrained within a \$1,850/oz optimised pit shell derived from mining, processing and geotechnical parameters from ongoing PFS and operational studies. Underground Mineral Resources at Central Bore are constrained within a 1.5m wide optimised stope with a 3.5 g/t Au cut-off reflective of a \$1,850/oz gold price
- The Ore Reserves are constrained within a \$1,600/oz mine design derived from mining, processing and geotechnical parameters as defined by Pre-feasibility Studies and operational studies. The Ore Reserves are evaluated using variable cut-off grades: Gruyere 0.30 g/t Au. Attila 0.65 g/t Au (fresh), 0.58 g/t Au (transition), 0.53 g/t Au (oxide). Alaric 0.59 g/t Au (fresh), 0.56 g/t Au (transition), 0.53 g/t Au (oxide), Montagne 0.64 g/t Au (fresh), 0.60 g/t Au (transition), 0.58 g/t Au (oxide), Argos 0.66 g/t Au (fresh), 0.64 g/t Au (transition), 0.59 g/t Au (oxide). Ore block tonnage dilution averages and gold loss estimates: Gruyere 4.9% and 0.4%. Attila 14% and 3%. Alaric 20% and 6%. Montagne 9% and 7%. Argos 10% and 12%
- All dollar amounts are in Australian dollars

#### **Competent Persons Statements**

#### **Exploration Results**

The information in this report which relates to Exploration Results is based on information compiled by Mr Justin Osborne, Executive Director-Exploration and Growth for Gold Road. Mr Osborne is an employee of Gold Road, and a Fellow of the Australasian Institute of Mining and Metallurgy (FAusIMM 209333). Mr Osborne is a shareholder and a holder of Performance Rights. Mr Osborne has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Osborne consents to the inclusion in the report of the matters based on this information in the form and context in which it appears

#### Mineral Resources

The information in this report that relates to the Mineral Resource estimation for Gruyere is based on information compiled by Mr Mark Roux. Mr Roux is an employee of Gold Fields Australia, is a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM 324099) and is registered as a Professional Natural Scientist (400136/09) with the South African Council for Natural Scientific Professions. Mr Justin Osborne, Executive Director-Exploration and Growth for Gold Road and Mr John Donaldson, General Manager Geology for Gold Road have endorsed the Mineral Resource for Gruyere on behalf of Gold Road.

- Mr Osborne is an employee of Gold Road and a Fellow of the Australasian Institute of Mining and Metallurgy (FAusIMM 209333).
   Mr Osborne is a shareholder and a holder of Performance Rights.
- Mr Donaldson is an employee of Gold Road and a Member of the Australian Institute of Geoscientists and a Registered Professional Geoscientist (MAIG RPGeo Mining 10147). Mr Donaldson is a shareholder and a holder of Performance Rights.

The information in this report that relates to the Mineral Resource estimation for Attila, Orleans, Argos, Montagne, Alaric, YAM14 and Central Bore is based on information compiled by Mr Justin Osborne, Executive Director-Exploration and Growth for Gold Road, Mr John Donaldson, General Manager Geology for Gold Road and Mrs Jane Levett, Principal Resource Geologist for Gold Road.

 Mrs Levett is an employee of Gold Road and is a Member of the Australasian Institute of Mining and Metallurgy and a Chartered Professional (MAusIMM CP 112232).

Messrs Roux, Osborne and Donaldson and Mrs Levett have sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as Competent Persons as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Messrs Roux, Osborne and Donaldson and Mrs Levett consent to the inclusion in the report of the matters based on this information in the form and context in which it appears.

#### Ore Reserves

The information in this report that relates to the Ore Reserve estimation for Gruyere is based on information compiled by Mr Daniel Worthy. Mr Worthy was an employee of Gruyere Mining Company Pty Ltd and a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM 208354). Mr Max Sheppard, Principal Mining Engineer for Gold Road has endorsed the Ore Reserve estimation for Gruyere on behalf of Gold Road.

 Mr Sheppard is an employee of Gold Road and is a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM 106864).

The information in this report that relates to the Ore Reserve estimation for Attila, Argos, Montagne and Alaric, is based on information compiled by Mr Max Sheppard, Principal Mining Engineer for Gold Road.

Mr Worthy and Mr Sheppard have sufficient experience that is relevant to the style of mineralisation and type of deposits under consideration and to the activity currently being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Worthy and Mr Sheppard consent to the inclusion in this announcement of the matters based on this information in the form and context in which it appears.

#### **New Information or Data**

Gold Road confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources and Ore Reserves that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not materially changed from the original market announcement.

#### Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.

Date: 24 April 2019

- 2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
