

Boardroom Media interview with Sipa MD, Lynda Burnett

Sipa Resources Limited (ASX: **SRI**) is pleased to advise that its Managing Director, Lynda Burnett, was recently interviewed by Will Canty of Boardroom Media.

In the interview, Ms Burnett discusses the Company's exciting Paterson North Copper-Gold Project in Western Australia and its Kitgum Pader Base Metals Project in Uganda, which is joint ventured with Rio Tinto (ASX: RIO). Key highlights of the interview include:

- An overview of Sipa's first-mover position in one of Australia's current exploration "hot spots", the Paterson Province of WA, where it has secured a strategic 1,000km² ground-holding. The western boundary of Sipa's project lies just 10km from Rio Tinto's recent Winu copper discovery;
- Upcoming exploration activities in the Paterson North including the planned airborne EM survey commencing later this year over its tenements and further drilling planned for later this year at the Obelisk discovery;
- Recent exploration activity at its Kitgum Pader base metal project in Uganda, which is subject to a US\$59 million joint venture with Rio Tinto. Initial assay results from recent diamond drilling at the Akelikongo nickel-copper discovery are expected in the near future; and
- Its recently pegged Barbwire Terrace zinc project in the Lennard Shelf Province of Western Australia, part of its emerging portfolio of generative Australian exploration projects.
