ASX/News Release

AVITA MEDICAL LIMITED (ASX: AVH)
Appendix 3B

Valencia, California, USA, and Melbourne, Australia, 20 May 2019 — Avita Medical Ltd (ASX: AVH) ("AVH" or the "Company") today announces an Appendix 3B which refers to two issues of fully paid ordinary shares following the exercise of a number of unlisted options to an unrelated party.

AVH advises that the Company inadvertently failed to lodge the required Appendix 3B with the ASX within the prescribed time period.

The late lodgement relating to the issue of shares within the attached Appendix 3B arose due to an administrative oversight.

The Company is committed to compliance with ASX Listing Rules. AVH's obligations under these rules have now been clarified and, as such, its internal procedures have been amended to ensure future compliance.

ABOUT AVITA MEDICAL LIMITED

AVITA Medical is a regenerative medicine company with a technology platform positioned to address unmet medical needs in burns, chronic wounds, and aesthetics indications. AVITA Medical's patented and proprietary collection and application technology provides innovative treatment solutions derived from the regenerative properties of a patient's own skin. The medical devices work by preparing a REGENERATIVE EPIDERMAL SUSPENSION™ (RES™), an autologous suspension comprised of the patient's skin cells necessary to regenerate natural healthy epidermis. This autologous suspension is then sprayed onto the areas of the patient requiring treatment.

AVITA Medical's first U.S. product, the RECELL® System, was approved by the U.S. Food and Drug Administration (FDA) in September 2018. The RECELL System is indicated for use in the treatment of acute thermal burns in patients 18 years and older. The RECELL System produces Spray-On Skin™ Cells using a small amount of a patient's own skin, providing a new way to treat severe burns, while significantly reducing the amount of donor skin required. The RECELL System is designed to be used at the point of care alone or in combination with autografts depending on the depth of the burn injury. Compelling data from randomized, controlled clinical trials conducted at major U.S. burn centers and real-world use in more than 7,000 patients globally, reinforce that the RECELL System is a significant advancement over the current standard of care for burn patients and offers benefits in clinical outcomes and cost savings. Healthcare professionals should read the INSTRUCTIONS FOR USE - RECELL® Autologous Cell Harvesting Device for a full description of important safety information including contraindications, warnings and precautions.

In international markets outside of Europe, our products are marketed under the RECELL System brand to promote skin healing in a wide range of applications including burns, chronic wounds and aesthetics. The RECELL System is TGA-registered in Australia, CFDA-cleared in China, and received CE-mark approval in Europe.
