ASX: TMX

Wild Viper 382-shear Trenching Program New Gold Exploration Program

Terrain Minerals Limited (ASX: TMX) is pleased to announce that a Program of Works (POW) has been submitted to conduct a trenching program across the 382-shear zone, comprising of four trenches for a total length of ~640 meters (Refer to diagram 1).

This new target was generated from the recent reconnaissance mapping program which confirmed several other target areas. Most notably along the 382-shear south of the Great Western Gold deposit, with one grab sample returning **4.67 g/t gold** over a small part of the exposed structure which is mainly under shallow cover. The exposed area has exposed a 3-4 meters wide structure of multiple stock work structures.

The first program over the 382-shear will consist of trenching, mapping and sampling along the structure to identify potential drill target locations. Work is expected to be carried out mid-year 2019 once work permits have been approved. This trenching program is seen as the most efficient and cost-effective technique available to assess and define drill targets.

Both Great Western and Wild-viper tenements exploration work and associated expenditure is currently in order and further exploration will continue to maintain the lease's in good standing.

27/03/2019 – Great Western Gold Project Update & New Exploration Program.

Great Western Gold Project – Project Overview

The 100% owned project is located 76km north of Leonora and 1km from the Goldfields Highway on Weebo pastoral leases and forms part of the historic Wilsons Patch mining area. Terrain considers it as an advanced opportunity which has the potential to extend down plunge and along strike. Additional information on Terrain 100% owned Great Western deposit (JORC) can be found at www.terrainminerals.com.au and from past ASX market announcements.

ABOUT TERRAIN MINERALS LIMITED:

Terrain Minerals Limited (ASX:TMX) is a minerals exploration company with a Western Australian based asset portfolio consisting of:

- **Great Western** (Includes Wild-viper tenement) 100% TMX (Au)- near term development opportunity, resource estimation and economic study has shown positive outcomes. Work is now underway to prepare data and work towards getting all mining approvals. New follow up exploration is underway at the adjacent tenement known as wild-viper, if successful it has the potential to add valuable ounces to the Great Western project.
- **Great Western advancement process** is underway with multiple groups who have registered interest in Great Western. These groups have indicated various agendas that included full or partial sale, joint venture and funding arrangements. The board will consider all proposals and has not ruled out mining Great Western itself and continuing regional exploration to add to its gold inventory.
- **Red Mulga** Red Mulga project is situated ~170km NNE of Geraldton in the Yilgarn Craton, Western Australia's Murchison region located on Yallalong station. An RC drill program as conducted in 2018 with exploration work continuing.
- **Project Review:** Terrain Minerals is currently searching and has been assessing potential projects: Gold, Cobalt/copper Lithium and industrial minerals in Australia, Africa, North America and Asia also including other regions. Several jurisdictions of interest have now been identified. All economic commodities are being considered as indicated in previous Quarterly reports. A filed trip to South America was recently conducted by Terrain to assess an historic mining project opportunity.

Compliance Statement:

The Company notes that within the announcement all the information is referenced directly to the relevant original ASX market releases of that technical data.

Terrain would like to confirm to readers that it is not aware of any new information or data that materially affects the information included in the relevant market announcement and, in the case of the estimates of mineral resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

Disclaimer:

Information included in this release constitutes forward looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "continue" and "guidance" or other similar words, and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the company's actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the company operates or may in the future operate environmental conditions including extreme weather conditions, staffing and litigation.

Forward looking statements are based on the company and its management's assumptions made in good faith relating to the financial, market, regulatory and other relevant environments that exist and effect the company's business operations in the future. Readers are cautioned not to place undue reliance on forward looking statements.

Forward looking statements are only current and relevant for the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the company does not undertake any obligation to publicly update or revise any of the forward-looking statements or advise of any change in events, conditions or circumstances on which such statement is based.

Competent Person Statement:

The information in this report that relates to Exploration Results is based on information compiled by Mr. T Bradley, who is a Member of the Australian Institute of Geoscientists and a Non-Executive Director of Terrain Minerals Limited. Mr Bradley has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Bradley consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
