West Perth WA 6005

### HIGHLIGHTS

- Following re-evaluation of recent geological information, the Company has resumed diamond drilling KCD\_DD\_001, located on the Korong Central Domal Prospect in Botswana.
- KCD\_DD\_001 is currently at 304.47m downhole, with the diamond drill rig set up to re-enter the hole and extend it for a further 200-300m depth.
- A total of 3,698.15m of drilling has been completed to date on the Korong Dome.
- The extension of KCD-DD-001 is expected to be complete by mid-June 2019.
- The Korong Central Domal Prospect is located within the Company's 100% owned Botswana Ghanzi West licence group.

**Kopore Metals Limited (ASX: KMT, “Kopore” or the “Company”)** is pleased to announce the recommencement of drilling at the Botswana Korong Central Domal Prospect. As previously announced<sup>1</sup>, the Company had received a reinterpretation of its 2017 airborne electromagnetic (EM) survey results, prompting an RC and diamond drilling program, which was completed in late Q4 2018.

Following a detailed re-evaluation of the EM survey results and geological review of the drill core, including a peer review, the Company has now re-entered hole KCD\_DD\_001 at Korong Central.

The objective of the drilling program will be to further test the lower D’Kar/Ngwako Pan Formation contact position. The lower D’Kar Formation is known as the host for copper-silver mineralisation across the Kalahari Copper Belt.

The hole will be extended by 200-300m or until the contact position is intersected.

Drilling to date at the Korong Dome in Botswana has achieved a total of 3,698.15m with RAB/RC accounting for 3,452.6m, (RAB = 1,155 & RC = 2,297.6m) and diamond drilling totalling 245.55m.

Commenting, Simon Jackson, Managing Director said *“We are excited to be drilling again in Botswana at Korong Central and will keep the market informed as we target the D’Kar/Ngwako Pan contact. Kopore remains focused on its goal of finding the next copper deposit on the Kalahari Copper Belt.”*

**COMPETENT PERSONS STATEMENT**

The information in this announcement that relates to exploration results is based on information compiled by Mr David Catterall, a Competent Person and a member of a Recognised Professional Organisations (ROPO). David is engaged by Kopore as a consultant Exploration Manager. David Catterall has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC 2012). David Catterall is a member of the South African Council for Natural Scientific Professions, a recognised professional organisation.

David Catterall consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

**ABOUT KOPORE**

Kopore Metals Limited (ASX: KMT) is a public company listed on the Australian Securities Exchange (ASX) and is actively exploring its copper-silver prospects on the emerging world class Kalahari Copper Belt, located in the Republic of Botswana and Namibia.

Kopore continues to explore for stratabound copper-silver deposits across its sixteen 100% owned prospecting licenses in Botswana and eight prospecting licences in Namibia, for a total of 14,363 square kilometres on the world class Kalahari Copper Belt. Kopore believes the Kalahari Copper Belt can provide

the potential for large scale discovery, as demonstrated by neighbouring resource development companies.

The directors and management of Kopore have strong complimentary experience with over 20 years of Australian and International technical, legal and executive roles in exploration, resource development, mining, legal and resource fields.

Botswana and Namibia are stable, pro-mining jurisdictions, supportive of mineral exploration and development. According to the most recent Fraser Institute Annual Mining Survey, Botswana and Namibia are ranked #1st and #6th respectfully for “investment attractiveness” in Africa, in addition to their highly ranked global position.
