**ST GEORGE COMPLETES FUNDING FOR NICKEL-COPPER SULPHIDE DRILLING
AT HIGH-GRADE MT ALEXANDER PROJECT**

HIGHLIGHTS:

- **Institutional-led placement completed with the allotment of new shares**
 - **New funding will support an expansion of exploration programmes at the Mt Alexander Project**
 - **Diamond drilling of high-grade nickel-copper sulphide targets is scheduled to commence this week**
-

Growth-focused nickel company St George Mining Limited (ASX: **SGQ**) ("**St George**" or "**the Company**") is pleased to confirm that, further to the ASX Release dated 19 July 2019, it has completed an institutional-led placement that has raised additional funding for its high-grade nickel-copper sulphide project at Mt Alexander located in the north-eastern Goldfields of Western Australia.

The Company has issued 33,000,000 fully paid ordinary shares at \$0.10 per share to raise \$3,300,000 (the "Placement").

John Prineas, St George Mining's Executive Chairman said:

"We appreciate the backing of new and existing shareholders for our upcoming exploration programmes at Mt Alexander – programmes which have the potential to be significant near-term value drivers.

"A diamond drill rig has arrived at Mt Alexander and drilling of a large number of electromagnetic (EM) conductors will start this week. We are confident that this major drill programme will identify additional high-grade mineralisation that could significantly increase the resource potential at our advanced prospects in the Cathedrals Belt.

"Exploration at earlier stage targets will also be accelerated – with a focus on the Fish Hook Prospect in the underexplored eastern extension of the Cathedrals Belt and the West End Prospect near the Ida Fault – both of which offer excellent potential for a new greenfields discovery.

"Its an exciting time to be expanding exploration activities at Mt Alexander with heightened investor interest in the nickel sulphide market."

After the issue of the above securities, the Company has the following listed securities on issue:

Fully Paid Ordinary Shares	368,307,665
Listed Options exercisable at \$0.20 on or before 30 September 2019	24,579,714

The shares issued under the Placement were issued pursuant to the Company's 15% placement capacity under ASX Listing Rule 7.1, and were placed pursuant to Section 708 of the Corporations Act 2001 ("the Act").

The Appendix 3B and Cleansing Notice in respect to the securities issued pursuant to the above follows.

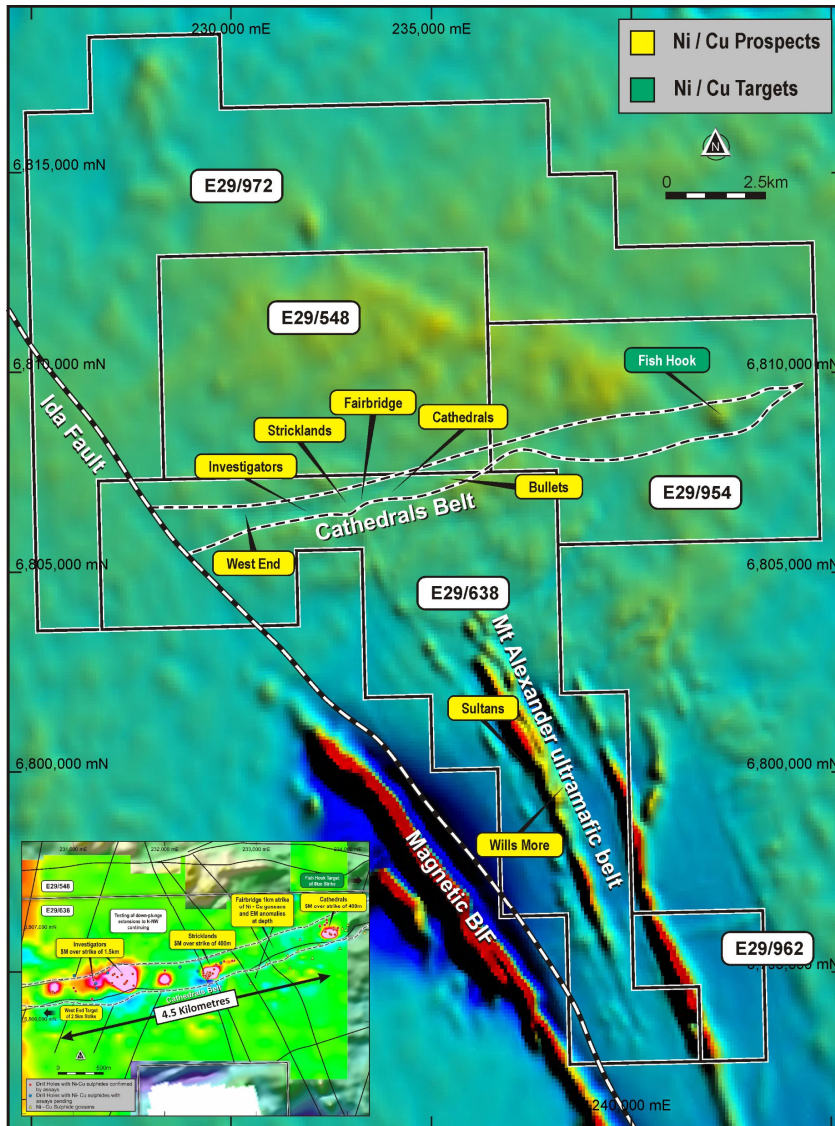

Figure 1 – a map (set against RTB magnetic data) of the Mt Alexander tenement package. 42 EM conductors have been prioritised for drilling at the advanced prospects in the Cathedrals Belt – at Investigators, Stricklands and Cathedrals.

Exploration at earlier stage targets at Fish Hook and West End are also being accelerated with potential to further extend the strike of mineralisation along the 16km Cathedrals Belt.
