

AUSTRALIAN SECURITIES EXCHANGE ANNOUNCEMENT

31 July 2019

Quarterly Report for the quarter ended 30 June 2019
Mt Ridley Project, Albany - Fraser Range / Yilgran Craton Orogen

OVERVIEW

Mount Ridley Mines Ltd (ASX: MRD) (or “the Company”) is pleased to provide the following update of activities for the Quarter ended 30 June 2019.

Although there was no material information reported on the Company, the Company has maintained the statutory requirement of its Mount Ridley licenses.

A detailed HP-FLTEM geophysical survey consisting of 17 lines for ~240stns has been planned within the Winston’s target area. This planned area at Winston’s is the remaining area to be adequately covered by this meaningful high-powered geophysical method at Winston’s.

January’s Air Core drilling program identified two priority targets based on their end of hole geochemical ratios, the priority one target lies on private farming land within the Tyrrell’s target area and is currently in a cropping program and can’t be accessed until post-harvest in November. Once this target is again accessible, this will also be included in a HP-FLTEM survey.

The Company also continues to evaluate future opportunities when presented. Should the Company identify a suitable asset, the Company will keep the market informed.
