ASX ANNOUNCEMENT

ASX: CGB

QUARTERLY REPORT
JUNE 2019

Executive Chairperson's Report

Pnina Feldman

Executive Chairperson

Cann Global Limited (ASX: CGB)

NEW BEGINNINGS

Dear Shareholders,

"The worst part of life is waiting. The best part of life is having something worth waiting for" - Unknown.

On behalf of the new Board of Cann Global Limited ("ASX: CGB" "the Company"), I am very pleased to report that the ASX has given us formal approval for the relisting and return to Quotation of Securities on the ASX from Friday 23 August 2019. It has been a very intense and extremely complex period of re-compliance, release of two (2) Prospectuses, numerous supplementary prospectuses and two (2) formal EGM's. The Company is delighted that our \$5,950,000 capital raise was oversubscribed, although these funds were held in escrow until approval for the relisting.

We are extremely proud of the accomplishments of our global management team, who since the initial acquisition of MCL 2 years ago, have developed the company from its nucleus of a unique and valuable seed bank with a vision of a Vitahemp food brand, into a global multi division fully vertically integrated corporate with partnerships and alliances with world leaders in the Cannabis industries from Israel, Canada, the United States, Asia and Australia.

Over the past 12 months, during this re-compliance and transformation period, the Company has had to maintain our ongoing business, continue developing deals and relationships, all the while being restricted in what the company could do and invest in while in preparation for the return to trading of securities on the ASX. The company has effectively managed the costs involved to administer a Corporation of its size and magnitude involving three Divisions, 12 subsidiary companies and a mining and exploration business. During the period of re-compliance, the Company has continued to carefully maintain our new businesses and establish opportune and vital relationships. We are also very pleased to report an operating Revenue of over \$1,000,000 (\$1,089,247) whilst under this restricted access to capital during the 12 month period of re-compliance. We are very much looking forward to a period of successful and heightened activity based on a solid foundation with our relisting as the new Cann Global Limited.

GLOBAL CHALLENGES - AUSTRALIA

The company, in discussion with our partners, realised that with the rapidly growing interest in Hemp Food and Medicinal Cannabis, and with the emergence of new players in the Cannabis sector, Cann Global would need to assess its commercial manufacturing timetable, and the proposed use of funds being raised for infrastructure development. Even during our "waiting period" we have continued to assess, strengthen and reaffirm our current business relationships to ensure that we are ready to confidently and aggressively move forward with operations when returned to the market place.

Chairpersons Letter continued...

As part of the assessment, the Board, in discussion with our management team, with export approvals potentially opening up in Israel, took immediate steps to fast track our proposed production schedule by exploring our possible manufacturing options which led us to the broad strategic alliance with Bio Health Pharmaceuticals, a company which is now already producing to the highest quality standards our much sought after Vitahemp hemp seed oil capsules. We have assisted Pharmocann, Israel, to obtain the necessary approvals for a formal visitation by its formulation team to the BioHealth facilities in Sydney, this month.

BIO HEALTH FACILITY VISIT

Dr Benjamin Rosenstein PhD, VP of R&D and lead chemist on the Israeli Pharmocann team, arrived last week to instruct our chemists as to the preparations of his various pharmaceutical formulations. These formulations relate to a new and elegantly designed Hemp Seed Oil and Medical Cannabis cosmetic range of Nutraceuticals and Pharmaceuticals for both men and women. Whilst examining our hemp seed food products, Dr Rosenstein's comment was: *"In Israel, products such as these are not available. The hemp seed products that you produce is of an amazingly high standard. Whilst you will benefit from our expertise, we simultaneously admire and wish to benefit from yours."*

HEMP FARMING - VITASEEDS

Working with our farmers throughout Australia under the guidance and direction of MCL's Technical Director, Andrew Kavasilas, and our Hemp Seed Breeding research management team, led by Malcolm Lamont, we are very confident, utilising Andrew's large cultivar seed bank, to be able to produce high quality Hemp Seed varieties that will be suitable for every state in Australia.

Cann Global's Hemp Seed company, Vitaseeds, notwithstanding the drought, has been able to secure sufficient seeds to support our ongoing production from our farmers who have seen some successful harvests.

HEMP RESEARCH - AUSTRALIA

We have recently begun work on a dedicated Hemp Research project and will be engaging the resources of some of the world's leading Plant Geneticists with the aim of creating seeds that: 1) produce more yield, 2) are drought resistant, 3) are pest resistant, which we hope will be suitable to grow in farms across all of Australia. As we receive more inquiries from Australian farmers, who are aware of our manufacturing abilities, our seed bank genetic research and the quality of our seed and hemp seed oil stock, we need to be ready to meet the challenges of the diverse growing and harvesting conditions that face Australian hemp seed food farming communities. More information will follow on this exciting new Hemp Research project in due course.

AUTO IMMUNE DISEASE RESEARCH - ISRAEL

As reported earlier this year, the discovery on our behalf in Israel, by Prof. David (Dedi) Meiri and his team at the Haifa Technion Cannabis research lab of a unique combination of cannabinoids that has indicated in the lab the potential to significantly control the advancement of the Autoimmune Disease, Multiple Sclerosis. Based on the lab results achieved from the 2018 trials, Prof. Meiri believes that this discovery may prove to have the ability to stop progression of this disease.

Chairpersons Letter continued...

Mice trials have been undertaken, and Prof. Meiri reports that they have had very encouraging results from these first stage trials. We are privileged to be associated with Prof. Meiri and his team who is recognised as the leading medical Cannabis researcher in the world.

Volunteers from Australia have already come forward to participate in the human trial programme. The Company is in discussion with leading local experts in the field to work on this parallel research with the Technion, in Australia.

Prof. Meiri is also currently undertaking research on the MCL seedbank to see what unique properties will be identified to be grown for specific medical applications based on his cutting-edge research in this field.

PHARMOCANN

The company is pleased to report that our Israeli medical Cannabis partner, Pharmocann, continues to move forward to conclude the final stages of its new Nutraceutical R & D product range which will be manufactured and produced at the Bio Health Pharmaceutical facilities here in Sydney, Australia. Cann Global looks forward to updating the market on our plans to begin manufacturing our new Cann Global/Pharmocann Nutraceutical products for the Australian and export markets.

MEDCAN AUSTRALIA – Management partners

Cann Global, in July, was very pleased to report that our medical Cannabis management partner, Medcan Australia, has recently secured its ODC Research License. This should enable the company to further progress its advanced research on our 25 different cultivars and genetics from our seed bank. The team from Medcan, in the new variation of agreement, will be working closely with the Bio Health team to produce and manufacture our new range of pharmaceuticals, therapeutics and nutraceuticals.

CANN GLOBAL'S FOOD DIVISION

We are very excited with the range of new consumable products that have been released to market from the team at T12, Cann Global's new acquisition to its food division. With the Company now re-listing, the revenue of the food division are anticipated to escalate after being in an extended period of re-compliance. During the extended period of re-compliance, the Company was not trading on the ASX platform which meant that the primary funding designated for the food division was held in escrow. The hemp food division management has been dedicated to developing our food division business with its plans for various hemp and other products professionally prepared and presented and have done an excellent job in maintaining and developing the food and nutraceutical division in this interim period under what was relatively difficult market conditions during the re-compliance period.

CANNTAB

Cann Global continues to strengthen and build our relationship with our JV partners, Canntab Therapeutics. We were pleased to see Canntab receive their initial indication of patentability from the IPRP. In Canntab's opinion, this not only means that their formulation is patentable but also novel, non-obvious and useful. National filings have been completed in Canada and Australia. Canntab are now commencing the production of their products and we are expecting to be able to begin importing their products into Australia before the end of 2H 2019.

Chairpersons Letter continued...

BUILDING SOLID FOUNDATIONS

The Board and management of CGB continues to focus on building unique and solid foundations and strengthening business relationships that were formed throughout 2018-2019. We are very proud of what we have been able to achieve over these past 18 months, as the whole team continues to work tirelessly and with all diligence to ensure that the Company is prepared for the challenges and growth that is ahead for Cann Global, in order to achieve the best outcomes for our investors by building shareholder wealth.

On behalf of the Board and management team of Cann Global, I would like to especially thank all our shareholders for their continued loyalty and support through what has been an extremely lengthy and complex re-compliance of business activities. We also wish to take the opportunity to thank retiring Board Director Mr Meyer Gutnick, who has served as Non- Executive Director on the Boards of both Queensland Bauxite Limited and Cann Global Limited. Meyer has greatly assisted the Company in its deal making and in the capital markets, which enabled the company to reach this significant milestone of its development. The Board wishes Meyer well in all his continued significant endeavours.

We take this opportunity to welcome our newly elected directors; Mr John Easterling, Mr David Austin and Mr Jonathan Cohen who add a significant dimension of corporate and industry expertise to our Company. We also warmly welcome Mr Alex Neuling to the Cann Global team as the newly appointed Company Secretary.

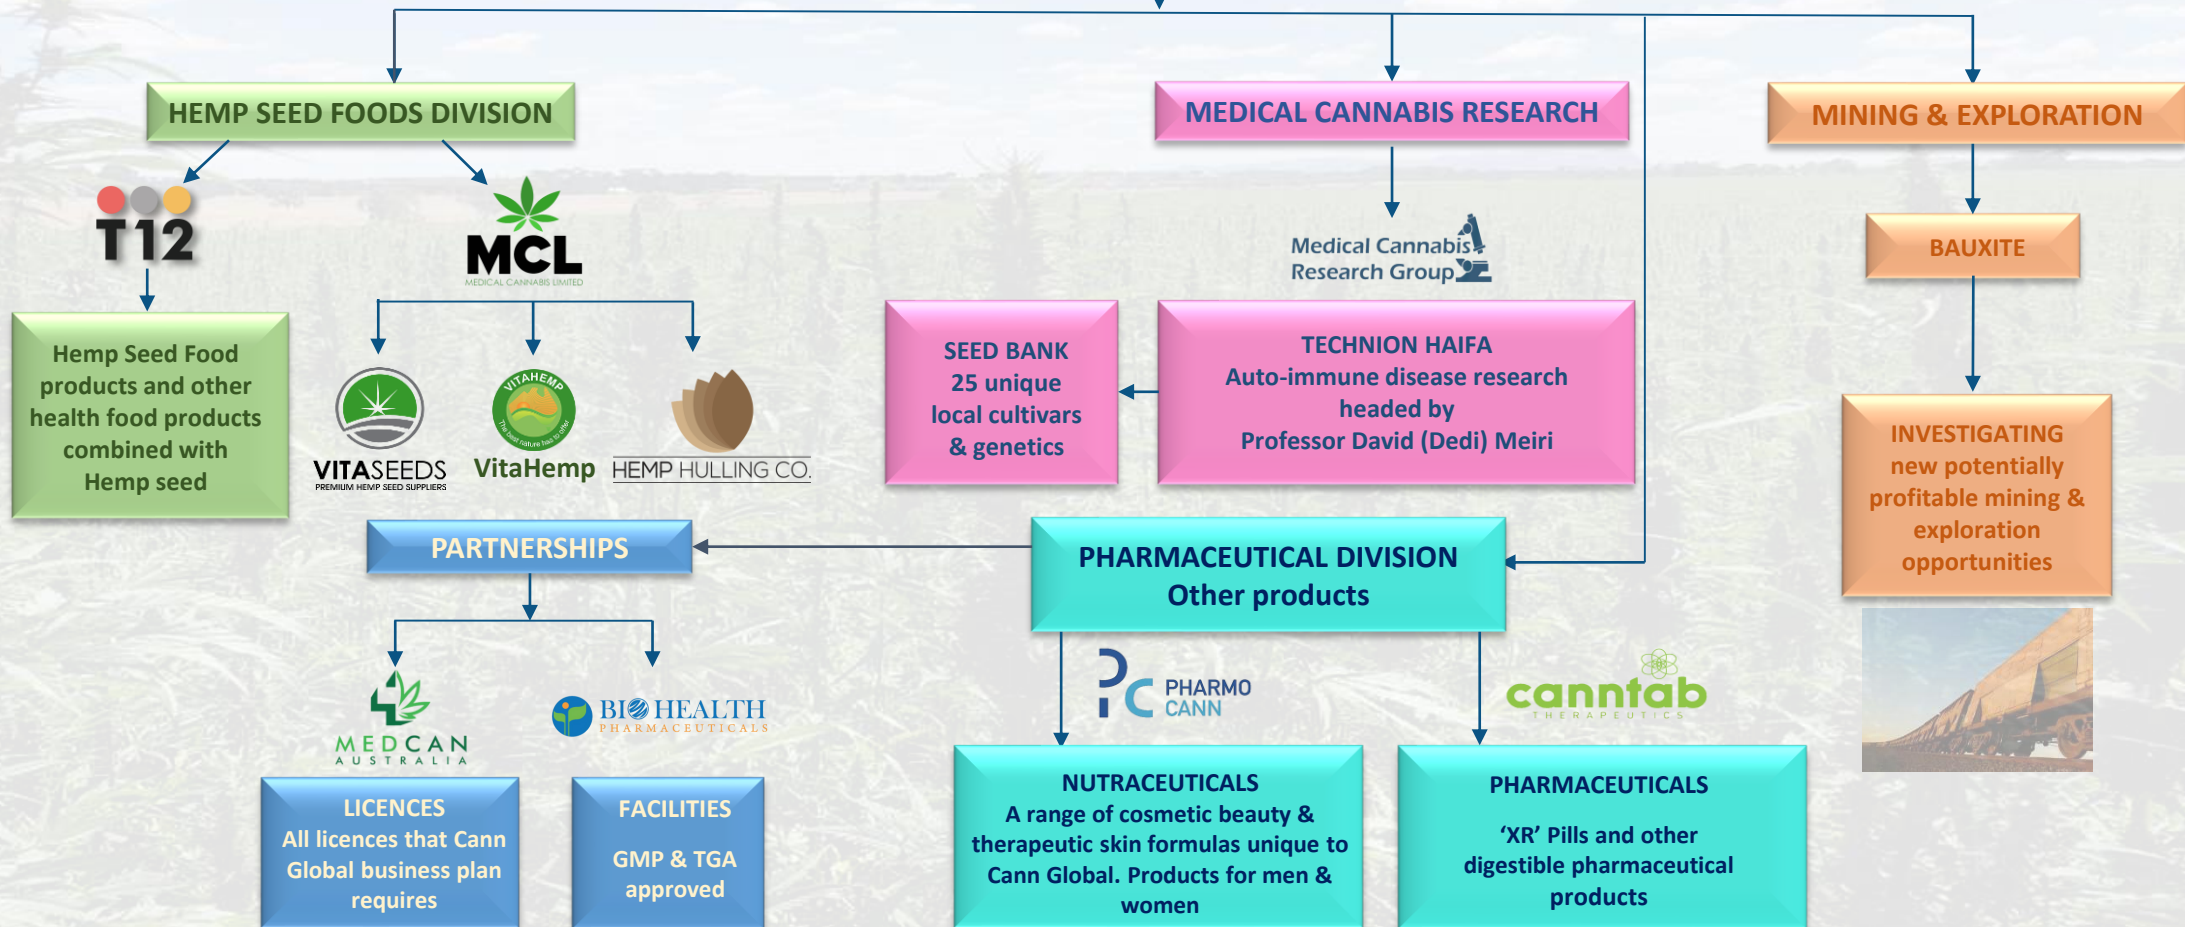

With our management team and the strength of partnerships secured over this past year we are confident to reach our milestones. We are excited about our new beginnings as we move forward as a significant global medicinal cannabis and hemp seed corporation effecting positive outcomes for the future of hemp seed products with our global view focused on revolutionising medical cannabis research and producing world's best Cannabis research, production and manufacturing techniques.

Your Sincerely,

EXECUTIVE CHAIRPERSON - CANN GLOBAL LIMITED (ASX: CGB)

HEMP SEED OIL CAPSULES

A wonderful plant-based alternative to conventional fish oil.

IN EACH BOTTLE
120 X 150ml

DESCRIPTION

VitaHemp Hemp Seed Oil is a true Australian Grown cold-pressed oil, extracted (expelling of the raw seed) by Waltanna Hemp Group and is produced (Soft gel capsule) in a GMP production facility.

A wonderful plant-based alternative to conventional fish oil. A rich source of Essential Fatty Acids (EFAs) and Gamma Linolenic Acid (GLA), Hemp seed oil includes the EFAs Omega 6 & Omega 3 in a naturally occurring 3:1 ratio, considered an essential part of a balanced diet.

VitaHemp Hemp Seed Oil Capsules are produced from the same high quality Hemp Seed as our 250ml bottled oil, but in a convenient 750mg easy to take soft gel capsule that can be used by the entire family.

INGREDIENTS

100% Hemp Seed Oil

BENEFITS

Chemical free

Vital for Calcium absorption

Great source of Iron and Zinc

Great source of antioxidants and minerals

Excellent for vegetarians and vegans

Excellent source of essential fatty acids including Omega 3, 6 and GLA

Lower blood LDL cholesterol levels

Lower blood pressure

Improve cardiovascular circulation & function

NUTRITIONAL VALUE

Hemp seed oil is a perfect fish oil replacement, a great source of antioxidants (Vitamin E), minerals and Vitamin D, along with generous amounts of iron and zinc.

With a guarantee that these plant-based Omegas contain no mercury and no need for processing to remove fish odour.

HEMP FLOUR

A nutritious and flavoursome alternative or enhancer to wheat-flour.

Perfect for healthybaking

DESCRIPTION

VitaHemp Hemp Seed Flour is a very versatile baked goods ingredient, naturally gluten-free, it is a nutritious and flavour some alternative or enhancer to wheat-flour.

INGREDIENTS

100% Australian Grown Hemp Flour

NUTRITIONAL VALUE

Hemp Flour provides high quality plant-based fibre (55%), contains all the essential amino acids, dietary fibre, chlorophyll, minerals and antioxidants with very little saturated fat, sodium or sugar 100% raw hemp flour, void of filters, colours and contaminates!

BENEFITS

Healthy and high- fibre diet

Great substitute for those with gluten intolerance

Wheat, nut and grain free

Great supplementary source of amino acids and essential fatty acids

Rich in fibre and protein

Excellent source of minerals such as magnesium, calcium and iron

PACKS OF 900g

HEMP SEED PROTEIN

A great natural source of vitamins A, C, and E, and beta-carotene.

PACKS OF
900g
450g

DESCRIPTION

VitaHemp 100% Hemp Seed protein powder is high in digestible protein (50%+) and possesses 20 amino acids, including all the 10 essential amino acids that your body is unable to produce on its own and must obtain from dietary sources.

Hemp seed protein powder is a great natural source of vitamins A, C and E and beta-carotene and is rich in protein, carbohydrates, minerals and fibre.

100% Australian Grown Hemp Protein powder

NUTRITIONAL VALUE

Hemp Protein powder provides high quality plant-based protein (52%), contains all the essential amino acids, dietary fibre, chlorophyll, minerals and antioxidants with very saturated fat, sodium or sugar. 100% raw hemp protein, void of filters, colours and contaminants!

BENEFITS

A complete source of nutrition

Raw and highly digestible

Vitamins A, C, and E, and beta-carotene

Rich in protein, carbohydrates, minerals, and fibre

Rich in Omega 3 and 6 essential fatty acids

Promotes energy production and strengthens the immune system

HULLED HEMP SEEDS

A complete source of nutrition with a delicious nutty flavor.

PACKS OF
900g
450g

DESCRIPTION

Australian Grown Hulled Hemp Seeds are produced by VitaHemp growers from Tasmania, Victoria and New South Wales and processed (hulled) by our own Hemp Hulling Co (QLD) in Coolum Beach, Queensland, Australia.

Our seeds are Certified (lab tested) Chemical Residue Free and wonderfully fresh.

HOW TO USE

Try in smoothies, add to yoghurts, salads, also in baking. The hulled seeds when mixed in a high-speed blender produce a delicious fresh vegan milk. Add to salads or eat directly from the spoon!

INGREDIENTS

100% Australian Grown Hulled Hemp Seeds

BENEFITS

Branched Chain Amino Acids help to trigger protein synthesis, supplying muscles with energy

BCAA's are essential in that the body cannot make them from other compounds, and are essential to support muscle function & repair

These Amino Acids are the first to be pulled from muscles as a source of energy

NUTRITIONAL VALUE

Raw Hemp seeds possess the perfect ratio of Omega 3, 6 & 9 that is proven to be the optimum requirement for long-term healthy human nutrition, are naturally low in carbohydrates and high in BCAA's*.

Hemp Seeds naturally contain all 10 Essential Amino Acids, an impressive range of vitamins and minerals including Calcium, Folate, Iron, high in Protein and more.

HEMP SEED OIL

A perfect fish oil replacement, a great source of antioxidants and minerals.

BOTTLES OF
500ml
250ml

DESCRIPTION

Hemp seed oil has been called 'Nature's most perfectly balanced oil'. With its familiar nutty flavour, this versatile 'new' oil can be added to smoothies, applied to salads, dressings, sauces, pasta dishes, drizzled over cooked fish and meat, incorporated in low heat baked recipes such as cakes, cookies and desserts and in many other instances where high-quality nut oils are used.

The taste of fresh Hemp Seed Oil is nutty and raw. Taste is subjective, most will find it is perfectly palatable. Hemp Seed Oil is a precious carrier of Omegas and should be kept at optimal conditions.

Just like flaxseed oil, Hemp Seed Oil should be kept in a cool, dark and dry environment. Once opened it must be kept in a refrigerator.

BENEFITS

- Chemical free
- Vital for Calcium absorption
- Great source of Iron and Zinc
- Great source of antioxidants and minerals
- Excellent for vegetarians and vegans
- Excellent source of essential fatty acids including Omega 3, 6 and GLA
- Lower blood LDL cholesterol levels
- Lower blood pressure
- Improve cardiovascular circulation & function

NUTRITIONAL VALUE

Hemp seed oil is a perfect fish oil replacement, a great source of antioxidants (Vitamin E), minerals and Vitamin D, along with generous amounts of iron and zinc. With a guarantee that these plant-based Omegas contain no mercury and no need for processing to remove fish odour.

INGREDIENTS

100% Hemp Seed Oil

WHITE QUINOA

A nutritious and flavoursome alternative enhancer to proteins!

DESCRIPTION

Blanc & Co Food Supply White Quinoa provides aminoacids to your diet, naturally gluten-free. This small grain that becomes nutty and slightly chewy when cooked is not only a delicious side dish or crunchy addition to salads, it is also a primary whole grain for many people due to its many benefits.

INGREDIENTS

100% Australian Grown Whole grain Quinoa

NUTRITIONAL VALUE

Raw, uncooked quinoa is 13% water, 64% carbohydrates, 14% protein, and 6% fat. A 100 grams serving of raw quinoa seeds is a rich source of protein, dietary fiber, B vitamins, including 46% DV for folate, and the dietary minerals magnesium, phosphorus, and manganese.

After cooking, quinoa is 72% water, 21% carbohydrates, 4% protein, and 2% fat. In a 100 grams serving, cooked quinoa provides 120 kcal (500 kJ) and is a rich source of manganese and phosphorus, and a moderate source of dietary fiber, folate, and the dietary minerals, iron, zinc, and magnesium.

Quinoa is gluten-free and contains a high concentration of protein, ease of use, versatility in preparation, and potential for increased yields in controlled environments.

BENEFITS

Quinoa has the highest protein content, so it's perfect for those who don't eat any meat or animal products

Quinoa provides all nine essential amino acids, making it a complete protein

One cup of cooked quinoa contains 222 calories and 4 grams of fat

39 grams of carbohydrates, 5 grams of fiber, and 8 grams of protein

It has 15 percent of the daily value for iron and is also a good source of calcium, magnesium, and vitamin E

Quinoa is also a gluten-free and cholesterol-free whole food

Is kosher for Passover, and is almost always organic

WHITE & BLACK CHIA

Rich in fibre, protein, omega-3 fatty acids, antioxidants and micronutrients!

DESCRIPTION

Blanck & Co. Food Supply White Chia and Black Chia provides aminoacids to your diet, naturally gluten-free.

Chia seeds are an unprocessed, whole-grain food that can be absorbed by the body as seeds. 2 tablespoons contains rich source of Omega-3, 139 calories, 4 grams of protein, 9 grams fat, 12 grams carbohydrates and 11 grams of fiber, plus vitamins and minerals.

The mild, nutty flavor of chia seeds makes them easy to add to foods and beverages. They are most often sprinkled on cereal, sauces, vegetables, rice dishes, or yogurt or mixed into drinks and baked goods. They can also be mixed with water and made into a gel.

INGREDIENTS

100% Australian Grown Whole grain Chia

NUTRITIONAL VALUE

Dried chia seeds contain 6% water, 42% carbohydrates, 16% protein, and 31% fat. In a 100-gram amount, chia seeds are a rich source of the B vitamins, thiamin and niacin, and a moderate source of riboflavin, and folate. A rich content of calcium, iron, magnesium, manganese, phosphorus, and zinc. The fatty acids of chia seed oil are mainly unsaturated, with linoleic acid and linolenic acid as the major fats

BENEFITS

Are loaded with Antioxidants

Almost all the carbs in them are Fiber

Are high in quality Protein and in Omega-3 Fatty Acids

The high Fiber and Protein content in Chia Seeds may help you lose weight

May lower your risk of heart disease

Reduce blood sugar levels

Quinoa is also a gluten-free and cholesterol-free whole food

Is kosher for Passover, and is almost always organic

EM wholefoods CACAO POWDER

A rich source of antioxidants, high in essential nutrients!

DESCRIPTION

EM WHolefoods Cacao Powder is a natural superfood which is high in nutrients such as iron, magnesium and zinc.

It has a nutty taste similar to dark chocolate, and it is also a rich source of antioxidants for your heart and contains neurotransmitters which contribute to wellbeing and happiness.

HOW TO USE

Make a superfood smoothie by adding 1-2 Tbsp of raw cacao powder to your favourite recipe. Blend with strawberries, bananas or blueberries for an antioxidant boost. It can also replace regular store-bought cocoa to use in cakes, biscuits, slices and muffins.

If you wish to retain more of the antioxidants you can make raw foods and add cacao powder to protein balls, raw brownies, tarts and healthy muffins.

INGREDIENTS

100% Australian Grown Whole Raw Cacao Beans

BENEFITS

- Rich source of antioxidants
- Reduce cholesterol levels
- Insulin resistance and blood pressure
- High in essential nutrients such as magnesium and iron
- Rich in essential fatty acids
- Good source of protein
- Rich in potassium, calcium, chromium, zinc and sulphur
- Reduces inflammation
- Skin health
- Boost mood

NUTRITIONAL VALUE

2 tablespoons of raw cacao powder has more fiber than a bowl of oatmeal, with just 60 calories, 8 grams of protein, 8 grams of fiber, 2.5 grams of fat, and over 60 percent of your daily iron and magnesium needs.

EM wholefoods CHIA SEEDS

Rich in fibre, protein, omega-3 fatty acids, antioxidants and micronutrients!

DESCRIPTION

EM Wholefoods White Chia and Black Chia provides aminoacids to your diet, naturally gluten-free.

Chia seeds are an unprocessed, whole-grain food that can be absorbed by the body as seeds. 2 tablespoons contains rich source of Omega-3, 139 calories, 4 grams of protein, 9 grams fat, 12 grams carbohydrates and 11 grams of fiber, plus vitamins and minerals.

The mild, nutty flavor of chia seeds makes them easy to add to foods and beverages. They are most often sprinkled on cereal, sauces, vegetables, rice dishes, or yogurt or mixed into drinks and baked goods. They can also be mixed with water and made into a gel.

INGREDIENTS

100% Australian Grown Whole grain Chia

NUTRITIONAL VALUE

Dried chia seeds contain 6% water, 42% carbohydrates, 16% protein, and 31% fat. In a 100-gram amount, chia seeds are a rich source of the B vitamins, thiamin and niacin, and a moderate source of riboflavin, and folate. A rich content of calcium, iron, magnesium, manganese, phosphorus, and zinc. The fatty acids of chia seed oil are mainly unsaturated, with linoleic acid and linolenic acid as the major fats

BENEFITS

- Are loaded with Antioxidants
- Almost all the carbs in them are Fiber
- Are high in quality Protein and in Omega-3 Fatty Acids
- The high Fiber and Protein content in Chia Seeds may help you lose weight
- May lower your risk of heart disease
- Reduce blood sugar levels

EM wholefoods GREEN LEAF STEVIA

Very low in calories, regulates blood sugar levels in the body!

PACK OF
250G

DESCRIPTION

EM Wholefoods Green Leaf Stevia Powder is the whole stevia leaf, dried at low temperatures and ground into a fine powder. It is not the white stevia powder, which is a highly concentrated and processed extract of the plant.

Green Stevia powder is an all natural sweetener with a slight licorice-like aftertaste that can be up to 30 times sweeter than sugar. It has zero calories, zero carbohydrates and zero glycemic index. Over 100 phytochemicals have been discovered in green stevia so far.

INGREDIENTS

100% Certified Organic
Green Leaf Stevia Powder

NUTRITIONAL VALUE

Stevia is valued most for the sweet taste, which makes it capable of replacing sugar in a diet. Importantly, it also has a very low calorific count pushing it in the 'no-calorie' food zone.

BENEFITS

Controls diabetes: regulates blood sugar levels in the body

Weight loss: very low in calories and is anywhere from 40-300x sweeter than sugar

Regulate blood pressure: it can relax the blood vessels, increase urination, and facilitate the elimination of sodium from the body

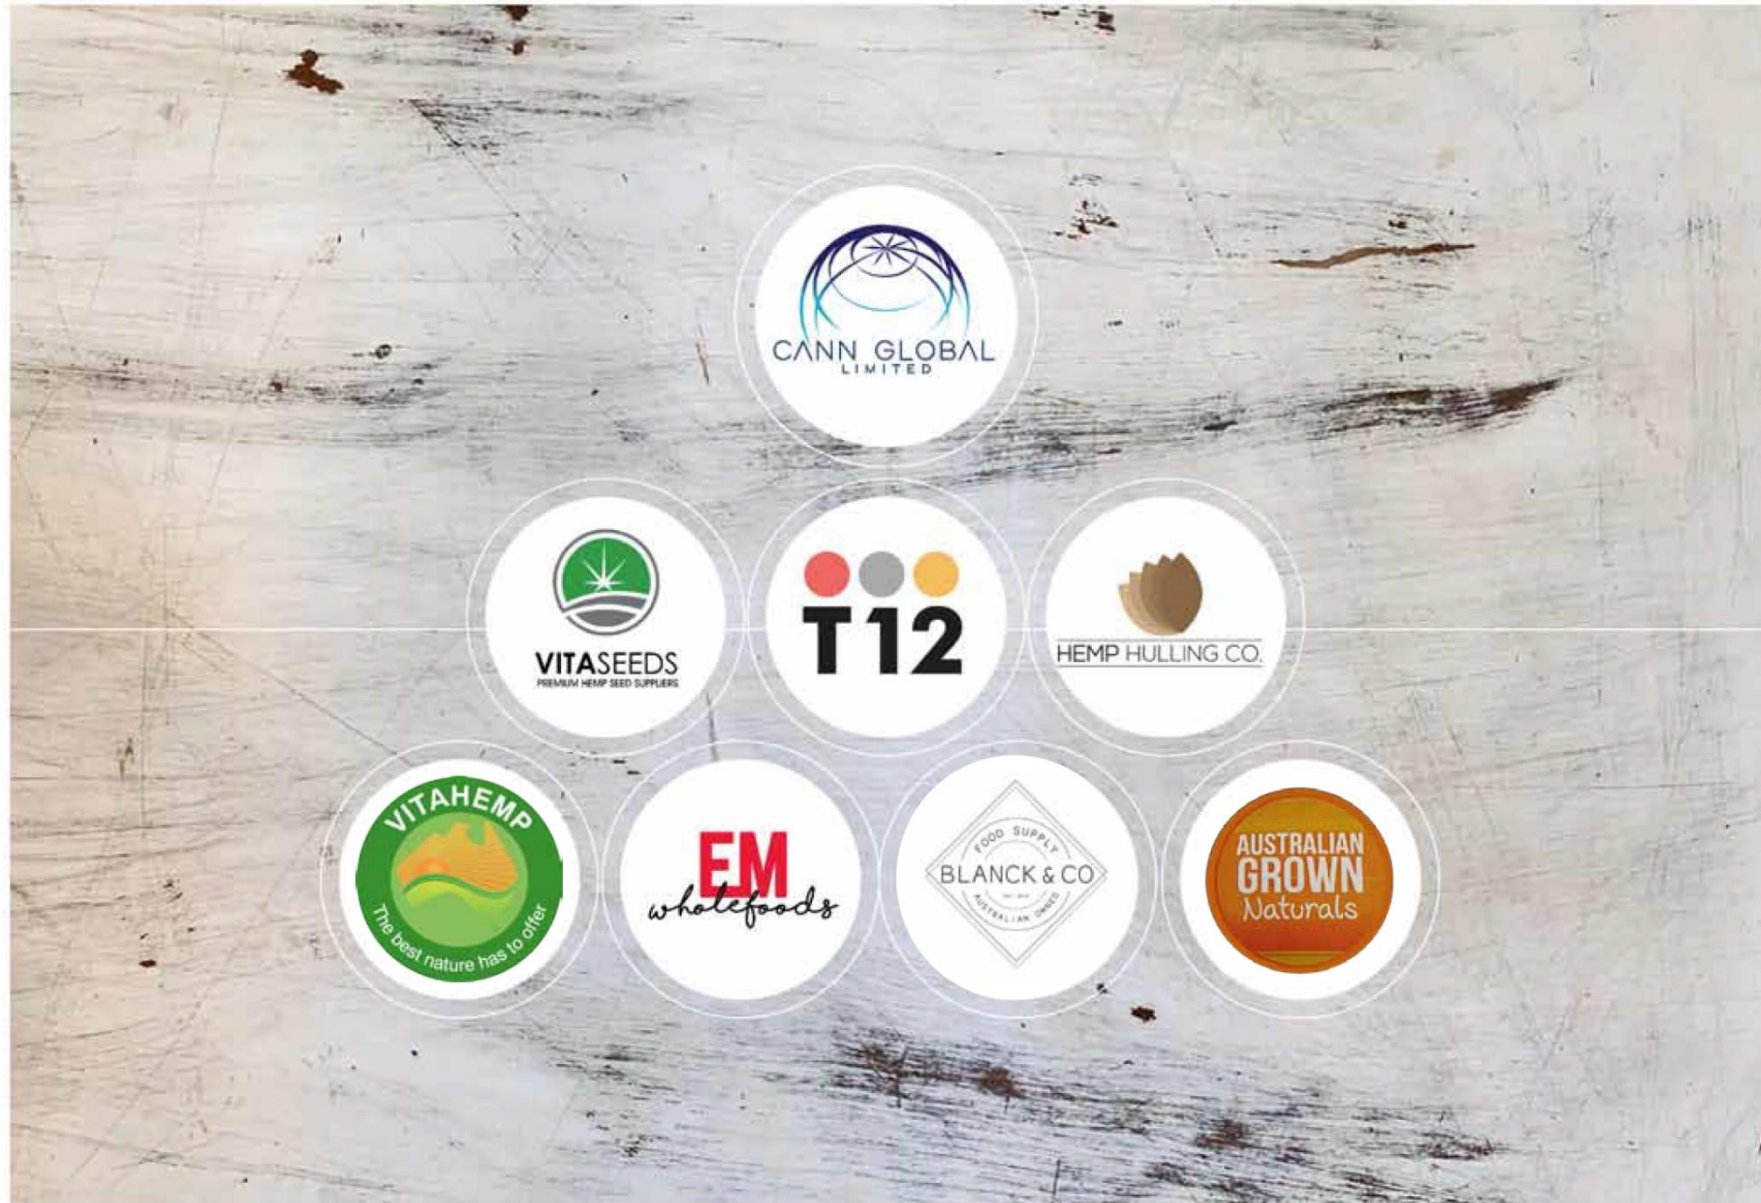

Prevents Cancer: Quercetin, kaempferol, and the other glycoside compounds in stevia help to eliminate free radicals in the body, thereby preventing them from mutating healthy cells into malignant ones

Lowers Cholesterol levels: essential for good lipid profile

Oral Health: it has been found to reduce bacterial formation in the mouth

Skin care: useful against skin conditions such as eczema and dermatitis

Prevents Osteoporosis: unlike sugar, aids in increasing bone mineral density and treat osteoporosis

Cann Global Research Team

Malcolm Lamont B.Sc. Head of CGB's Medicinal
Cannabis and Hemp Seed Breeding program - Australia

John Easterling D.E.S. Botanist/Herbalist & Eco-
Entrepreneur – Director Cann Global - USA

Prof. Dedi (David) Meiri Ph.D. Lead Researcher Auto
Immune Disease (MCRG) – The Technion, Haifa, Israel

Medical Cannabis Research Group (MCRG) plans to take advantage of the underlying barrier of using a lawful source of cannabinoids (as described by UN Drug Treaties) for scientific research and medical uses.

By partnering with advanced researchers, MCRG will be in a better position to address technological barriers. The opportunities which now arise for MCRG due to the Australian Government's new laws and opportune regulations will enable us the ability to explore and exploit various avenues of commercialisation.

Medical Cannabis Research Group entered into a sponsored research agreement with the Technion Research and Development Foundation Ltd (TRDF or Technion). The research is led by Professor David (Dedi) Meri from the faculty of Biology.

We are approaching this project in the spirit in which the Australian government has introduced new laws in relation to medical Cannabis research and drug development. Medical Cannabis research and the potential range of products that can be produced from cannabinoids leads us to believe there will be numerous opportunities for commercialization.

Given the ample number of opportunities that are emerging and now available to a company like the MCRG, returns are expected to be significant in the mid-to long-term. Most medical Cannabis products produced in Australia will be first to market and a substantial market share is anticipated.

In this work, we aim to elucidate the immunoregulatory properties of phytocannabinoids and terpenes in MS, as well as further investigate Cannabis's mechanisms of action in these areas.

This research not only has the ability to advance the identification of new drug candidates, but also advance our abilities to optimise Cannabis treatment options and efforts toward the creation of personalised medicine for MS patients.

The objective of this study is to match effective Cannabis extracts and specific cannabinoid compositions that regulate/modulate immune function, specifically, autoimmunity in multiple sclerosis (MS) in order to optimise treatments for MS patients.

The basic premise of this research is that MS and other autoimmune conditions respond favourably to low doses of certain specific cannabinoids. Our goal is to identify the effects of different cannabinoids and terpenes both individually and in combination on the function of immune cells, specifically on MS-derived autoimmune and regulatory cells. This will enable us the ability to detect the most effective Cannabis extract(s) and cannabinoid profiles for regulating immunopathology in MS.

VitaCann and CannTab will work towards having Canntab's tablets formally approved for sale in Australia and to export to Asia. Pursuant to recent and evolving legislation in Australia, the Canntab product should qualify for approval, as it should meet all the standard medical requirements that would be expected by the medical industry.

The Canntab – VitaCann JV has intellectual property licensed by Canntab, with access now to MCL's Australian Cannabis strains, and six filed patents protecting the Extended Release Tablets™ (XR).

Patents for different formulations targeted at specific ailments have already been filed with the Canadian Patent Office.

Canntab's proprietary extended release tablets make it easier for doctors and patients to manage dosage. They're easier to take, eliminate social stigma, and do not have the adverse side effects of smoking Cannabis.

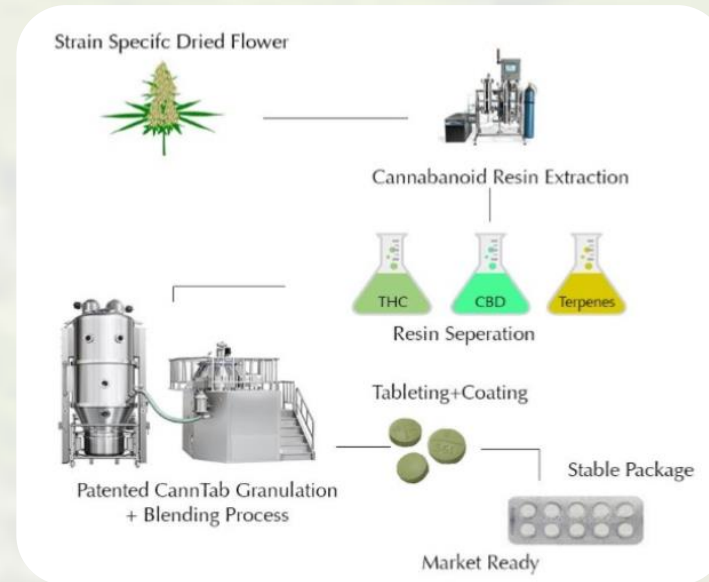

Canntab XR Extended Release Tablets

Canntab XR Tablets have been designed to pharmaceutical standards to offer both uniform dosage in every tablet, and effective relief released over time. Unlike other delivery mechanisms, our extended release formulation is designed to offer consistent and stable relief over many hours. For the first time doctors and patients don't have to worry about the inconsistencies of medicinal ingredient delivery that come with smoking or edibles.

Our range of extended release tablets is intended to treat ailments such as sleep disorders, pain, PTSD, social anxiety, and arthritis, as well as being a potential treatment for the pain management and appetite loss associated with cancer treatments. Clinical trials are intended to take place in parallel with the importing and sale of the product in Australia under the special access scheme.

'Cann Global has access to a TGA & GMP approved manufacturing facility – Bio Health Pharmaceuticals'

Quarter ended ("current quarter")

30 June 2019

Consolidated statement of cash flows	Current quarter \$A'000	Year to date (12 months) \$A'000
1. Cash flows from operating activities		
1.1 Receipts from customers	215	872
1.2 Payments for		
(a) exploration & evaluation	-208	-467
(b) development (MCL)	-329	-1857
(c) production (Vitahemp/Vitaseeds/T12)	-250	-1073
(d) staff costs		
(e) administration and corporate costs (includes all staff costs)	-493	-1997
1.3 Dividends received (see note 3)		
1.4 Interest received	29	123
1.5 Interest and other costs of finance paid		
1.6 Income taxes paid		
1.7 Research and development refunds		
1.8 Other (provide details if material)	-1	-1
1.9 Net cash from / (used in) operating activities	-1037	-4400

2. Cash flows from investing activities

2.1 Payments to acquire:

- (a) property, plant and equipment
- (b) tenements (see item 10)
- (c) investments

Consolidated statement of cash flows	Current quarter \$A'000	Year to date (12 months) \$A'000
(d) other non-current assets (MCL investments)		-146
2.2 Proceeds from the disposal of:		
(a) property, plant and equipment (amortisation of seed bank)		
(b) tenements (see item 10)		
(c) investments		
(d) other non-current assets		
2.3 Cash flows from loans to other entities	-14	-578
2.4 Dividends received (see note 3)		
2.5 Other		349
2.6 Net cash from / (used in) investing activities	-14	-375

3. Cash flows from financing activities		
3.1 Proceeds from issues of shares		
3.2 Proceeds from issue of convertible notes		
3.3 Proceeds from exercise of share options		
3.4 Transaction costs related to issues of shares, convertible notes or options		
3.5 Proceeds from borrowings (MCL Directly)	981	3546
3.6 Repayment of borrowings (MCL Directly)	-3	-3
3.7 Transaction costs related to loans and borrowings		
3.8 Dividends paid		
3.9 Other		
3.10 Net cash from / (used in) financing activities	978	3543

4. Net increase / (decrease) in cash and cash equivalents for the period		
4.1 Cash and cash equivalents at beginning of period	5,261	6,420
4.2 Net cash from / (used in) operating activities (item 1.9 above)	-1037	-4400
4.3 Net cash from / (used in) investing activities (item 2.6 above)	-14	-375
4.4 Net cash from / (used in) financing activities (item 3.10 above)	978	3543

Consolidated statement of cash flows		Current quarter \$A'000	Year to date (12 months) \$A'000
4.5	Effect of movement in exchange rates on cash held		
4.6	Cash and cash equivalents at end of period	5,188	5,188

5. Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1 Bank balances	5,188	5,261
5.2 Call deposits		
5.3 Bank overdrafts		
5.4 Other		
5.5 Cash and cash equivalents at end of quarter (should equal item 4.6 above)	5,188	5,261

6. Payments to directors of the entity and their associates	Current quarter \$A'000
6.1 Aggregate amount of payments to these parties included in item 1.2	60
6.2 Aggregate amount of cash flow from loans to these parties included in item 2.3	
6.3 Include below any explanation necessary to understand the transactions included in items 6.1 and 6.2	

QBL Directors Fees

7. Payments to related entities of the entity and their associates	Current quarter \$A'000
7.1 Aggregate amount of payments to these parties included in item 1.2	355
7.2 Aggregate amount of cash flow from loans to these parties included in item 2.3	
7.3 Include below any explanation necessary to understand the transactions included in items 7.1 and 7.2	

Payment for company management and administration services provided under the AGM management services agreement for executive corporate services, secretarial services, geological services, bookkeeping, business management and administration staff and office rental.

Mining exploration entity and oil and gas exploration entity quarterly report

8. Financing facilities available <i>Add notes as necessary for an understanding of the position</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
8.1 Loan facilities		
8.2 Credit standby arrangements		
8.3 Other (please specify)		
8.4 Include below a description of each facility above, including the lender, interest rate and whether it is secured or unsecured. If any additional facilities have been entered into or are proposed to be entered into after quarter end, include details of those facilities as well.		

--

9. Estimated cash outflows for next quarter	\$A'000
9.1 Exploration and evaluation	120
9.2 Development	1000
9.3 Production	500
9.4 Staff costs	
9.5 Administration and corporate costs	500
9.6 Other (provide details if material)	
9.7 Total estimated cash outflows	2120

10. Changes in tenements (items 2.1(b) and 2.2(b) above)	Tenement reference and location	Nature of interest	Interest at beginning of quarter	Interest at end of quarter
10.1 Interests in mining tenements and petroleum tenements lapsed, relinquished or reduced				
10.2 Interests in mining tenements and petroleum tenements acquired or increased				

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
