- 2. Whether the figures have been audited or reviewed, and in accordance with which auditing standard or practice.**

The figures have been reviewed by our auditors.

- 3. Whether the figures have been audited or reviewed, the auditors' report (including any qualifications or emphasis of a matter).**

Not Applicable

- 4. Whether the same accounting policies and methods of computation as in the issuer's most recently audited annual financial statements have been applied.**

As required by the listing rules of the Singapore Exchange, the Group has applied Singapore Financial Reporting Standards (International) ("SFRS(I)") with effect from 1 July 2018. The Group's financial statements

for the year ending 30 June 2019 will be prepared in accordance with SFRS(I), issued by the Accounting Standards Council.

The Group has applied the same accounting policies and methods of computation in the financial statements for the current reporting period as that of the audited financial statements for the year ended 30 June 2018, except for the change in presentation currency, now in Australian dollars and the mandatory adoption of new and revised SFRS(I) and Interpretations of SFRS(I) ("SFRS(I)" International) which becomes effective for the financial period beginning 1 July 2018 as follows:

- SFRS(I) 1 First-time adoption of SFRS(I)
- SFRS(I) 15 Revenue from Contracts with Customers
- SFRS(I) 9 Financial Instruments

5. If there are any changes in the accounting policies and methods of computation, including any required by an accounting standard, what has changed, as well as the reasons for, and the effect of, the change.

The application of the new and revised standards and interpretations has no material effect on the presented financial statements, except as described as below:

a) Application of SFRS(I) 1

SFRS(I) 1 requires that the Group applies SFRS(I) on a retrospective basis, as if such accounting policy had always been applied. If there are changes to accounting policies arising from new or amended standards effective 1 July 2018, restatement of comparatives may be required because SFRS(I) 1 requires both the opening balance sheet and comparative information to be prepared using the most current accounting policies.

b) Change in presentation currency to Australian dollars

The Civmec group largely operates within Australia where virtually all its income is derived. This change will help to provide a clearer understanding of the Group's financial results and improve comparability of the Group's performance. Comparative periods have restated in Australian dollars.

c) SFRS(I) 15 Revenue from Contracts with Customers

SFRS(I) 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised. It introduces new cost guidance which requires certain costs of obtaining and fulfilling contracts to be recognised as separate assets when specific criteria is met.

The Group adopted SFRS(I) 15 using the retrospective approach in accordance with the mandatory requirements of SFRS(I) 1. Accordingly, comparatives have been restated to take into account adjustments relating to SFRS(I) 1 and SFRS(I) 15.

The new standard requires a higher threshold of probability for recognition of contract claims and variations whereby revenue is recognised when it is highly probable that a significant reversal of revenue will not occur in the future. Civmec Limited has operations across different industry sectors and geographical locations which are subject to different legal and contractual frameworks. Significant judgements and estimates are used in determining the impact of SFRS(I) 15, such as the probability of approval of variations and acceptance of claims, estimation of project completion date and assumed levels of project productivity. In making this assessment we have considered, for applicable contracts, the individual status of each contract variation.

The impact on the comparatives for the financial statements of this reporting quarter on adoption of SFRS(I) 1 and SFRS(I) 15 are as follows:

d) Change in accounting for the R&D tax offset

The Group has adopted the split approach to recognise the excess of the research and development (R&D) tax incentives over the statutory rate as a form of government grant when there is reasonable assurance it will be received, and any attached conditions will be complied with. As the grant relates to R&D expenditure already incurred it is recognised in the income statement in the period it became receivable as a reduction to cost of sales. Comparative periods have restated to reflect the change in accounting policy.

Civmec is an integrated multi-disciplinary heavy engineering and construction provider to the Oil & Gas, Metals & Minerals, Infrastructure and Marine & Defence sectors.

The Group's order book as at 30 June 2019 was \$819 million.

Going forward, the Group will continue to deliver on its strategy of establishing consistent and recurring revenue streams and capitalising on major expansion project opportunities with key clients.

This includes the further growth of its specialised shutdown and maintenance service offering, with the requirement to maintain new plants in the Oil & Gas and Metals & Minerals sectors across Australia providing a significant future opportunities pipeline.

Delivery of the Royal Australian Navy's Offshore Patrol Vessel program will be ongoing until 2029, providing a sustained revenue stream over this period. The Federal Government's commitment to undertake its minor naval vessel continuous build program and sustainment of these vessels at Henderson will provide further construction and through-life support opportunities in the Marine & Defence sector going forward. With the completion of its new world-class assembly and maintenance hall during FY20, the Group is well positioned to optimise these opportunities. Capable of handling any of Australia's major projects across the resource, infrastructure and defence sectors, Civmec's substantial investment in this new facility is an integral element in securing the company's long-term future. When fully operational it will provide employment opportunities for up to an additional 1,000 personnel, including 100 new apprentices and trainees.

The Group will continue to capitalise on new construction and expansion projects in energy and resources, leveraging its multi-disciplinary, self-performance capability to provide partial or total delivery solutions. In the Oil & Gas sector, further investment in LNG is anticipated, including expansion and backfill projects and life extension developments for existing plants, in addition to new developments. In particular, subsea activity is expected to continue to grow to support both new and recently constructed projects. Given the Group's past experience and specialist capability to support the delivery of subsea projects, it is well positioned to optimise opportunities as they come to market. With growing investment, it is anticipated further opportunities in iron ore will come to market in the short to medium term, enabling the Group to leverage its core disciplines to provide a single, vertically integrated, turnkey solution for its established client base.

Civmec's focus remains on providing quality, value-for-money engineering solutions for its clients, whilst maintaining a disciplined approach to capital and overhead management, to maximise shareholders' returns.

Barring unforeseen circumstances, the Group expects to be profitable in the financial year ending 30 June 2020.
