ASX Announcement

**DRAGONTAIL PARTNERS WITH YELLO,
A LEADING AUSTRALIAN AGGREGATOR**

3 September 2019 (Melbourne): Dragontail Systems Limited (ASX: DTS, the “**Company**” or “**Dragontail**”) is pleased to announce that it has partnered with one of the leading Australian fast food delivery aggregators – Drive Yello Pty Ltd (“**Yello**”), which provide a last-mile delivery services platform.

Yello provides a customized last-mile solution, allowing businesses to monitor and manage deliveries, search for qualified and rated drivers or book a Yello pick up ‘on demand’.

The collaboration with Yello, joins the alliance the Company has recently made with DoorDash, Inc (“**DoorDash**”), one of the world's leading food-delivery aggregators, which is **also launching its operations in Australia**. The combined collaborations enables Dragontail to increase its customer base potential.

These collaborations produce high combined value for a QSR (Quick Service Restaurant) customer that can enjoy the use of the Algo Platform to automatically decide whether using the store drivers or aggregator drivers is the most accurate and effective alternative. The Algo Platform will ultimately optimize customer satisfaction while minimizing cost of delivery to the restaurant.

In addition, as part of the Algo's modules, Dragontail's customers can also use the unique Driver Sharing module that enable's nearby stores to use the same pool of drivers. Thus, stores will have the ability to use a pool of drivers that are part of their joint workforce while incorporating aggregator's drivers as well.

Mr. Ido Levanon, Dragontail's Managing Director, added: "We see great value in collaborating with the world's fast food delivery aggregators, as part of the era's changes. Our Australian partnerships will surely deepen our position across this territory as part of expanding our cooperation with existing and potential customers globally."

About Dragontail Systems

Dragontail is revolutionising the Quick Service Restaurant (QSR) and foodservice industry with its Algo System and computer-vision QT quality system that uses artificial intelligence (AI) machine learning.

The Algo System uses a sophisticated patented algorithm to optimise and manage the entire food preparation process from order to delivery. It is the first system in the world to fully automate and streamline the kitchen flow to deliver an immediate and significant return on investment to fast food and quick service restaurants.

The QT system's sensor and camera automatically monitor the preparation and cooking process in the kitchen to improve the quality and consistency of meals. Using proprietary advanced AI machine-learning technology, the system keeps improving its diagnostics, becoming even more efficient.
