**ASX Announcement**

10 September 2019

## **Additional Disclosure on Visual Chalcopyrite in Hole CRP0011D**

Hot Chili Limited (ASX code HCH) ("Hot Chili" or "Company") announced on 28<sup>th</sup> August 2019 that it's phase 2 drilling programme at the Cortadera copper-gold discovery in Chile was progressing well.

In particular, the update provided clarity that Diamond hole CRP0011D had been completed to a down-hole depth of 959.9m, and that the hole had recorded visual chalcopyrite within mineralised porphyry for the entire extent of the diamond hole (commencing from 345m down-hole depth).

In accordance with AIG guidance on the reporting of sulphide mineral observations in drilling intersections, the Company provides the following additional qualifications:

1. Chalcopyrite contained within CRP0011D is observed as disseminations within the host tonalite porphyry in addition to chalcopyrite as contained within observed porphyry style A and B veins
2. Chalcopyrite is the only copper sulphide observed in hole CRP0011D
3. Chalcopyrite has been visually estimated to typically range between 0.5% and 2% over the entire extent of CRP0011D
