**About Parkway Minerals**

*Parkway Minerals (ASX: PWN) is an exploration company focused on developing large greensand deposits in West Australia's Perth Basin. The Company aims to define a substantial resource base and investigate how best to recover phosphate, potash and other minerals from the Dandaragan Trough. The project is well situated in relation to infrastructure, with close access to rail, power and gas. A successful commercial outcome will allow Parkway to become a major contributor to the potash and phosphate markets at a time of heightened regional demand.*

*Parkway has a strategic land holding over the Dandaragan Trough, one of the world's largest known glauconite deposits. Previous exploration indicates glauconite sediments are widespread for more than 150km along strike and 30km in width. Current JORC compliant Indicated Mineral Resources stand at 630Mt at 1.9% P<sub>2</sub>O<sub>5</sub> of phosphate mineralisation and 210Mt at 3.8% K<sub>2</sub>O, amenable to processing by the K-Max process (ASX release: 26 September 2017).*

*Parkway owns 44.2 M shares in Davenport Resources (ASX: DAV), focused on potash exploration in the South Harz region of central Germany and a strategic investment in Lithium Australia NL (ASX: LIT) focused on the lithium value chain from mineral resources through to lithium battery technology and recycling.*
