

HeraMED, Mayo Clinic, team up to lead the digital transformation of prenatal care

Developing a digitally enhanced platform that will transform pregnancy homecare

Medical technology company, HeraMED Limited (ASX:HMD) ("HeraMED" or the "Company") is joining forces with Mayo Clinic to co-develop a new platform based on Mayo Clinic successful OB Nest project.

OB Nest is a service model that was designed in collaboration with Mayo Clinic Department of Obstetrics and Gynaecology, and the Centre for The Science of Health Care Delivery.

The program offers a tailored approach to in-home monitoring of patients leveraging technology and providers expertise. The concept will deploy AI powered algorithm and a combination of a digital platform and smart connected devices to assist expecting mothers as well as healthcare professionals in better managing pregnancy care, with a focus on personalized, continuous and proactive home-oriented solution.

The HeraCARE Platform

The teams plan to build a comprehensive pregnancy App leveraging machine learning-based algorithm that will potentially enable better management of diversified pregnancy situations, allowing better care at a lower cost.

David Groberman HeraMED Co-Founder and CEO described this new initiative as an important strategic step in HeraMED's vision to lead the digital transformation of prenatal care, as well as strengthening the alliance with Mayo Clinic and its OB Nest revolutionary project and pregnancy de-medicalised approach. David further clarified that the project is still under development and the plan is to piloting the solution during the second half of next year.

The solution will further include a professional 24/7-support service (based on the OB Nest concept) in which the crucial human interaction and intervention is optimised and personalised according to best practice and the specific physiological and emotional status of each expected mother.
