Directors' Report

Review of Operations

Your directors submit the annual report of the consolidated entity comprising Canyon Resources Limited and the entities it controlled during the financial year ended 30 June 2019 ("consolidated entity," "Canyon" or "Group"). In order to comply with the provisions of the Corporations Act 2001, the directors report as follows:

DIRECTORS

The names of directors who held office during or since the end of the year and until the date of this report are as follows. Directors were in office for this entire period unless otherwise stated.

Names, qualifications and experience:

David Netherway

B.Eng (Mining), CDipAF, F.Aus.IMM – Non-Executive Chairman

Appointed 17 March 2014

Mr Netherway is a mining engineer with over 40 years of experience in the mining industry and until the takeover by Gryphon Minerals Limited, was CEO of Shield Mining Limited, an ASX listed exploration company. He was involved in the construction and development of the New Liberty, Iduapriem, Siguiri and Kiniero gold mines in West Africa and has extensive mining experience in Africa, Australia, China, Canada, India and the former Soviet Union.

Mr Netherway was the Chairman of Afferro Mining, a UK listed iron ore exploration and development company in Cameroon until December 2013 when Afferro was subject to a US\$200 million takeover by AIM listed IMIC plc. He is currently the Chairman of Altus Strategies plc (ALS:AIM & ALTS:TSX-V), Canyon's joint venture partner on the Birsok Project in Cameroon, the Chairman of Kilo Goldmines Inc (KGL:TSX-V), a non-executive Director of Avesoro Resources Inc.(ASO:AIM & TSX) and of Kore Potash Ltd (K2P:AIM, ASX & JSE)

During the past three years, Mr Netherway has held no other directorships.

Mr Netherway has the following interest in shares in the Canyon as at the date of this report – 11,079,682 ordinary shares.

Phillip Gallagher

B. Bus - Managing Director

Appointed 19 October 2009

Mr Gallagher has had extensive experience in senior commercial and operational roles in both private and public companies.

Mr Gallagher is the founder of Canyon Resources, has been the Company's Managing Director since inception operating in West Africa for the past ten years.

During the past three years, Mr Gallagher has held no other directorships.

Mr Gallagher has the following interest in shares in Canyon at the date of this report – 10,095,432 ordinary shares.

Emmanuel Correia

B. Bus CA – Non-executive Director

Appointed 20 July 2016

Mr Correia is a Chartered Accountant and founding director of Peloton Capital and Peloton Advisory and has over 25 years public company and corporate finance experience in Australia, North America and the United Kingdom. He has held various senior positions with Deloitte and other accounting firms and boutique corporate finance houses specialising in corporate finance, corporate strategy, mergers and acquisitions and capital raising activities.

Mr Correia is currently a non-executive director of Orminex Limited and Argent Minerals Limited.

During the past three years, Mr Correia has held no other directorships.

Mr Correia has the following interest in shares in Canyon as at the date of this report – 5,746,530 ordinary shares.

Directors' Report Review of Operations continued

Steven Zaninovich
Non-executive Director

Appointed 30 January 2019

Mr Zaninovich has spent more than 20 years in project development, maintenance and operational readiness in the mining industry including, most recently, as Project Director of Tawana Resources, responsible for the delivery of the Bald Hill Lithium Project. Prior to that, he served as Chief Operating Officer with Gryphon Minerals ("Gryphon") before assuming the role of Vice President of Major Projects, and becoming part of the Executive Management Team, at Teranga Gold Corporation ("Teranga") following its acquisition of Gryphon Minerals. During his time with Teranga and Gryphon, and also earlier in his career, Mr Zaninovich gained specific expertise in the development of multiple mining operations across various commodities and jurisdictions in West Africa. He has also taken on consultant project management roles for companies including BHP Billiton, Newmont Mining and Gold Fields.

Mr Zaninovich's responsibilities during previous senior executive roles have included operational running of companies, business and strategic planning, feasibility studies and project development, site exploration operations, health and safety, environmental and social responsibility, human resources, risk management, project generation, strategic direction and procurement and contracts.

Mr Zaninovich held no interest in shares in the Company as at the date of this report.

COMPANY SECRETARY

John Lewis
B. Bus CA

Appointed 31 October 2018

Mr Lewis has over 12 years experience as a corporate advisor in the resources industry across a broad range of commodities having worked for a range of organisations operating predominately in the Asia Pacific Region.

Mr Lewis is a Chartered Accountant within excess of 25 years post qualification experience in the accounting profession who has acted as a CFO and Company Secretary of numerous mining companies including TV2U International Limited, Geopacific Resources Limited and Dragon Mountain Gold Limited as well as CFO of Nickelore Limited.

Mr Lewis held no interest in shares in the Company as at the date of this report.

Robert Marusco
B. Bus, CPA SA FIN ACSA GradDip ACG Dip FS(FP)

Appointed 15 July 2016 – Resigned 31 October 2018

Mr Marusco has developed experience and competence in equity capital markets, debt advisory and operational knowledge in relation to capital raising support and facilitation, corporate management including company secretarial, governance and compliance dealing with the ASX, ASIC and other authorities for both ASX listed public and private corporations.

Mr Marusco held no interest in shares in the Company as at the date of this report.

Directors' Report Review of Operations continued

INTERESTS IN THE SHARES AND OPTIONS OF THE COMPANY AND RELATED BODIES CORPORATE

As at the date of this report, the interests of the directors in the shares and options of the Company were:

Directors	Number of Fully Paid Ordinary Shares	Number of Performance Rights	Number of Unlisted Options Over Ordinary Shares
David Netherway	11,079,682	3,333,333 ¹	-
Phillip Gallagher	10,095,432	5,333,334 ²	-
Emmanuel Correia	5,746,530	3,333,333 ³	-
Steven Zaninovich	-	-	-

Note 1; Mr Netherway was issued 5,000,000 Performance Rights under the Canyon Long Term Incentive Plan which were approved by shareholders 23 November 2018. The Performance Rights carried certain vesting conditions as follows;

- one third vest on delineating a further JORC 2012 compliant inferred (or greater) mineral resource of at least 100 MT of bauxite at 47% Al₂O₃ on Minim Martap Bauxite Project;
- one third vest on the raising of at least a further \$10,000,000 in support of the Minim Martap Bauxite Project; and
- one third vest on participant remaining with the Company for 12 months from the date of issue.

Vesting condition a) noted above was satisfied during the financial year ended 30 June 2019 resulting in 1,666,667 shares vesting to Mr Netherway.

Note 2; Mr Gallagher was issued 8,000,000 Performance Rights to the Canyon Long Term Incentive Plan Trust which was approved by shareholders 25 November 2016. The Performance Rights carried certain vesting conditions as follows;

- one third vest on delineating a further JORC 2012 compliant inferred (or greater) mineral resource of at least 100 MT of bauxite at 47% Al₂O₃ on Minim Martap Bauxite Project;
- one third vest on the raising of at least a further \$10,000,000 in support of the Minim Martap Bauxite Project; and
- one third vest on participant remaining with the Company for 12 months from the date of issue.

Vesting condition a) noted above was satisfied during the financial year ended 30 June 2019 resulting in 2,666,667 shares vesting to Mr Gallagher.

Note 3; Mr Correia was issued 5,000,000 Performance Rights to the Canyon Long Term Incentive Plan Trust which was approved by shareholders 23 November 2018. The Performance Rights carried certain vesting conditions as follows;

- one third vest on delineating a further JORC 2012 compliant inferred (or greater) mineral resource of at least 100 MT of bauxite at 47% Al₂O₃ on Minim Martap Bauxite Project;
- one third vest on the raising of at least a further \$10,000,000 in support of the Minim Martap Bauxite Project; and
- one third vest on participant remaining with the Company for 12 months from the date of issue.

Vesting condition a) noted above was satisfied during the financial year ended 30 June 2019 resulting in 1,666,667 shares vesting to Mr Correia.

Directors' Report Review of Operations continued

DIVIDENDS

No dividends have been paid or declared since the start of the financial year and the directors do not recommend the payment of a dividend in respect of the financial year.

PRINCIPAL ACTIVITIES

The principal activity of the entities within the consolidated entity during the year was bauxite and gold exploration.

Canyon Resources Limited's ("Canyon" or the "Company") focus for the 2018/2019 financial year was to initially secure the Minim Martap Bauxite Project ("Minim Martap" or the "Project") in Cameroon, then to maintain the tenure of the Project by complying with the requirements as set out in the licence agreements with the Cameroon Department of Mines. The Minim Martap Bauxite Project is contiguous with the Company's existing Birsok Bauxite Project and in some locations, shares different sections of the same bauxite plateaux.

On 1 August 2018 the Company was notified by the Cameroon authorities that it had been granted 3 exploration permits forming the Minim Martap Bauxite Project as at 11 July 2018. The three exploration permits have been granted for a three year period with predetermined work conditions that were in line with the company's proposal to the Government of Cameroon for the project development plan.

A summary of the minimum work commitments are:

Year One

- Review existing geological, metallurgical and environmental data
- Commence initial geological works
- Commence geological, environmental, community and infrastructure studies
- Commence exploration drilling
- Define an initial JORC (2012) compliant resource

Year Two

- Ongoing exploration drilling
- Commence pre-feasibility studies on the mining, metallurgical, infrastructure, environment, community and mine financing

Year Three

- Finalise any required drilling
- Complete a definitive feasibility study
- Complete a mining convention in collaboration with the Government

MINIM MARTAP AND BIRSOK BAUXITE PROJECTS

Since commencing operations on the Birsok Bauxite Project in early 2014, Canyon had identified the Minim Martap Project as being a significant bauxite deposit of potentially world class scale and grade that could be successfully developed into a profitable long term bauxite mining and direct ship ore export operation. The combined Minim Martap and Birsok Projects are strategically located approximately 10km from the operational Camrail rail line that runs from the Project area to the existing Doula Port, a shallow water port, and towards the newly constructed Kribi Port.

The Minim Martap Bauxite Project is a large scale high grade low contaminant bauxite deposit located in the Adamawa region of Cameroon, alongside Canyon's existing Birsok Bauxite Project. The Minim Martap Bauxite Project encompasses two deposits, namely the Ngouandal and Minim Martap deposits, which are located within 25 km of each other. The total area of the permits is 1,349 km².

The Minim Martap Bauxite Project offers the potential to be a low capital cost, long term producer of some of the highest grade and lowest impurity, low temperature refining bauxite in the world.

Previous work completed by Canyon Resources on the contiguous Birsok Project, which shares certain plateaux with the Minim Martap Bauxite Project, has given the Company a strong understanding of the physical and geochemical characteristics of the local bauxite. The bauxite is generally high alumina, low total and reactive silica, high gibbsite, low boehemite and low on other contaminants.

Directors' Report - Review of Operations continued

Figure 1: Location map of the Minim Martap and Birsok Bauxite Projects in Cameroon.

The Minim Martap Project

In 2009, the previous owner of the Minim Martap Project reported a non JORC Code (2012) compliant estimate of 550MT at an average grade of 45.5% total Al_2O_3 and total 2.06% SiO_2 , with the following classification:

- Indicated 88MT averaging 41.8% Al_2O_3 and 1.3% SiO_2 (from the Ngaoundal Permit)
- Inferred 466MT averaging 46.2% Al_2O_3 and 2.2% SiO_2 (from the Minim Martap Permits)

The deposit definition work pertaining to this previous estimate was completed in 2009 and was overseen by SRK Australia.

The previous drilling campaign only drilled on approximately 40% of the suitable bauxite plateaux within the permit areas and identified some very high grade, low impurity zones on those plateaux. Canyon commenced activities to further define the deposit size and to identify very high-grade zones (i.e. those above 50% Al_2O_3 and under 2.5% total SiO_2) within the total deposit area immediately upon being granted tenure to the Project.

On 4 September 2018 the Company announced the upgrade of the JORC (2004) resource for its Minim Bauxite Martap Project, Cameroon, to a JORC (2012) compliant resource.

Resource Class	Tonnes (million)	Total Al_2O_3 (average)	Total SiO_2 (average)	Permit	No of Plateaux
Indicated	88	41.8%	1.3%	Ngaoundal	3
Inferred	466	46.2%	2.2%	Minim Martap	11
Total	550	45.5%	2.06%		14

Table 1: Minim Martap Project Resource Statement

Directors' Report - Review of Operations continued

The upgrade to JORC 2012 status has been independently completed by SRK Consulting (Australasia) Pty Ltd (SRK).

Only approximately 40% of the available bauxite plateaux on the Minim Martap Project area have been tested to date, providing clear opportunity for Canyon to test additional new bauxite plateaux in the south of the Minim Martap permit and on the Makan permit.

The Minim Martap Project is a large scale, world class bauxite resource with potential to identify substantial very high-grade zones within the existing deposit and to significantly increase the scale of the total resource.

The Mineral Resources on the Minim Martap Project were estimated on a plateau by plateau basis and the individual plateau Mineral Resources are shown in Table 2 below.

Plateau	GPS Area m ²	THICK m	Al ₂ O ₃	Fe ₂ O ₃	SiO ₂	TiO ₂	LOI	Auger Factor	Density	Volume m ³	Tonnes	Auger Corrected Tonnes	Mine Cumulative Grades	Al ₂ O ₃	Fe ₂ O ₃	SiO ₂	TiO ₂	LOI	Al ₂ O ₃ Av	SiO ₂ r

Table 2: Minim Martap Project Mineral Resources Per Bauxite Plateau
(In situ, mining dilution and waste not considered)

During the previous year the Company completed approximately 4,500m of drilling utilising the Company owned Rotary Air Blast (RAB) drilling rig across two of the tree Project permits. The results from the drilling and exploration program demonstrated high grade, low contaminant nature of the Minim Martap bauxite and the very large scale of the project resource.

The drilling program was designed to test the results from the previous project owner and to test previously unexplored bauxite plateaux. Results from the drilling confirmed the consistently high grade low contaminant nature of the bauxite deposit and consistently increased the profile depth of the bauxite compared to the previous drilling. The increase in profile depths is believed to have occurred due to Canyon's drilling rig having the capacity to drill though the bauxite at greater depths compared to the drilling rigs used in the previous owners original programs.

Highlight results from the drilling on the project include:

- 15m at 54.9% Al₂O₃ and 1.66% SiO₂ (total) from surface
- 14m at 56.47% Al₂O₃ and 1.72% SiO₂ (total) from 1m
- 15m at 53.61% Al₂O₃ and 1.67% SiO₂ (total) from surface
- 12m at 55.92% Al₂O₃ and 1.03% SiO₂ (total) from surface
- 10m at 54.01% Al₂O₃ and 1.89% SiO₂ (total) from surface
- 8m at 56.76% Al₂O₃ and 1.63% SiO₂ (total) from surface
- 10m at 53.50% Al₂O₃ and 2.08% SiO₂ (total) from surface
- 8m at 53.3% Al₂O₃ and 1.5% SiO₂ (total) from surface

Directors' Report - Review of Operations continued

Figure 2: Canyon Resources RAB drilling rig operating at Minim Martap

During the year, Canyon also completed a LiDAR (light imaging, detection and ranging) and high resolution ortho-photographic survey of the Company's Minim Martap Project area. The survey identified more than 70 new and untested bauxite plateaux across the three Minim Martap Project permits. The newly identified plateaux represented >65% of all the plateaux surface area identified at the target elevation on the three Minim Martap permits.

Canyon processed data from the LiDAR survey into a highly accurate and detailed digital elevation model (DEM), which identified the exact size, location and elevation of the 70 additional plateaux on the Minim Martap, Makan and Ngaoundal permits, all of which were not already included in the existing Mineral Resource Estimate for the project.

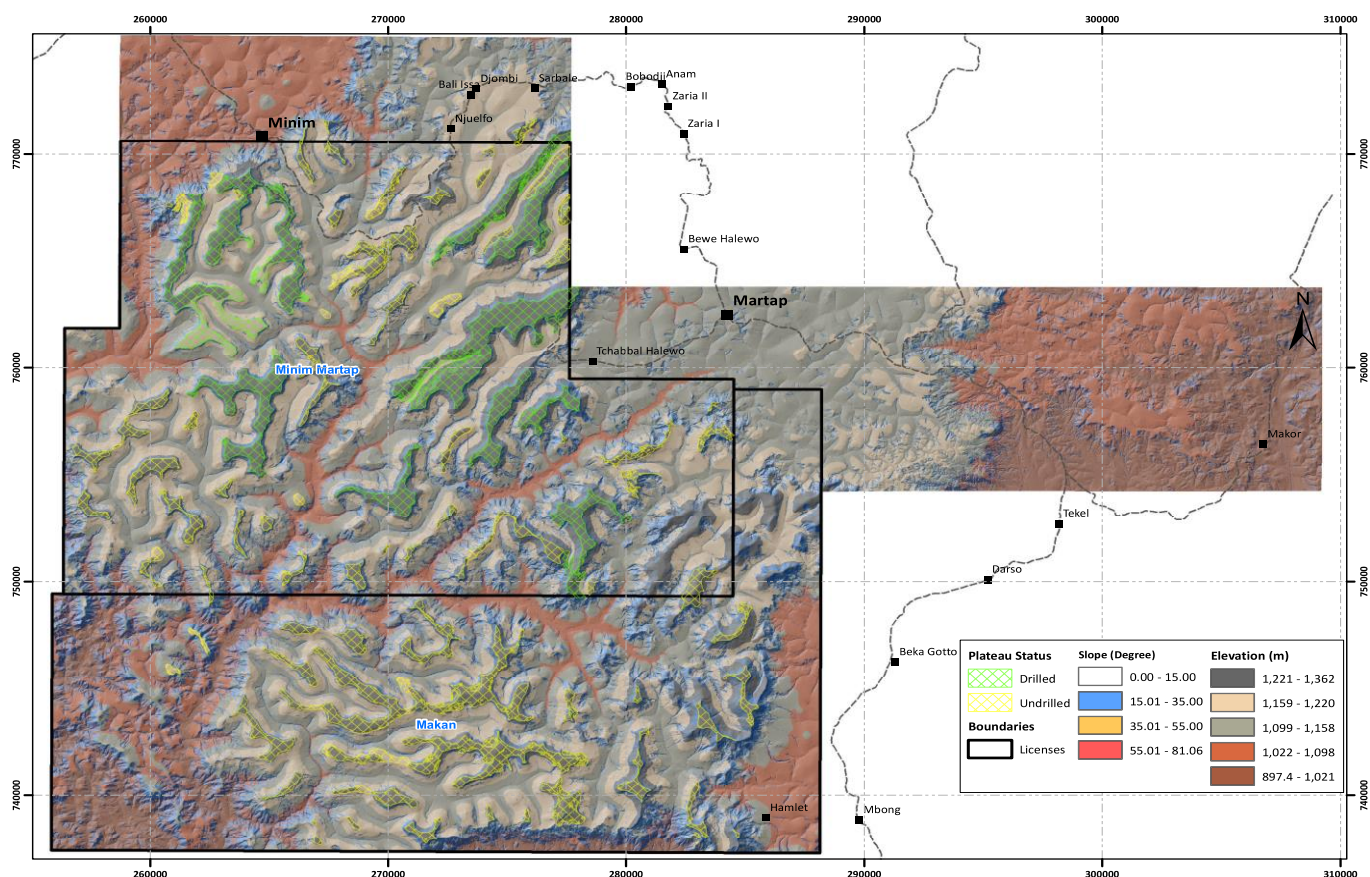

Figure 3: Image from LiDAR survey highlighting bauxite plateaux

Directors' Report - Review of Operations continued

Project Infrastructure

The Minim Martap Project is supported by its relative proximity to an operating rail line connecting the Project area to the existing port of Douala, a distance of approximately 800 km. In addition, Canyon has engaged with the Government of Cameroon regarding an extension of the existing rail line to the new Kribi Deep Water Port, which lies approximately 130km from the existing rail line. The Government is at an advanced feasibility and planning stage for this extension and has already started land clearing of the road and rail corridor to connect the port to the existing road and rail infrastructure.

Whilst operating the Birsok Bauxite Project over the past four years, Canyon has been working with Camrail, SA, the rail operator and the Government of Cameroon regarding the under-utilised capacity of the existing rail line.

Figure 4: Rail station at the town Ngaoundal, near the Minim Martap Project

Figure 5: The wharf and ship berthing area of the Kribi Deep Water Port

Directors' Report - Review of Operations continued

Brief History of the Minim Martap project

The Minim Martap Project encompasses two deposits, namely the Minim Martap and Ngaoundal deposits in the Adamawa region of Cameroon. The Cameroon Government's Mines and Geology division ("MGD") discovered the Minim Martap and Ngaoundal deposit in 1958. The deposit was studied initially by MGD and then by BRGM (The French Geological Survey) between 1958 and 1961. Exploration resumed between 1969 and 1972 by SEBACAM (Societe d'Etudes des Bauxite du Cameroun), a partnership between the Cameroon Government and French company, Groupe Pechiney (Pechiney Ugine Kuhlmann).

Cameroon Alumina Ltd Sarl (CAL), applied for and was granted two exploration permits over the Minim Martap and Ngaoundal deposits around 2006. Systematic exploration occurred in 2008 and 2009 with a drilling program at both Minim Martap and Ngaoundal. The drilling program was conducted by SRK Consulting on behalf of CAL. The exploration work conducted by CAL is reported to be of an international standard however the Resource evaluation pre-dated the JORC Code 2012 standard. In 2016 the permits comprising the Project were returned to the state of Cameroon.

The Minim Martap Project is a very large, high grade, low impurity, low temperature bauxite deposit that is located alongside an operating rail line that has the potential to transport the bauxite to the Douala Port and eventually to the new Kribi deep water port. We believe that the large scale and quality of the bauxite within the Project plus the access to suitable rail and port infrastructure makes the Minim Martap Project a very exciting and transformational opportunity for Canyon Resources. This view is supported by the Company's belief that there will be a long term worldwide deficit of high grade bauxite and the Minim Martap Project is ideally placed to supply bauxite into this demand.

Canyon has had the benefit of working in Cameroon for the past four and a half years, primarily on the Birsok Bauxite Project, which is located next to the Minim Martap Project. This has provided us with an advanced understanding of the area, the bauxite and the infrastructure solution for the Project. We also have a wholly owned drilling rig and assembled a workforce that can start work on site almost immediately.

Canyon Resources thanks the Government of Cameroon for the opportunity to develop the Minim Martap Project."

Advancing the Project

Canyon assembled a team in Perth and Cameroon to advance the status of the Project and meet an aggressive development timetable including the upgrade of the previous JORC Code (2012) compliant Mineral Resource, with activities planned, including diamond and reverse circulation drilling and on ground exploration.

The Company undertook the following works at the Minim Martap Project:

- Completed upgrades to access tracks to the bauxite plateaux following the recent wet season.
- Finalised drilling program to target high grade plateaux resource upgrades and increase scale of total resource.
- The Upgrade of the Resource upgrade and further exploration drilling.
- Commence local community and stakeholder consultation informing them of the new ownership and prevailing development plan for the Project.
- Commence feasibility studies focussing on mining, rail and port solutions and potential offtake partners.

As Canyon had been working in the same area in Cameroon on the Birsok Project for over four and a half years, the Company has gained an advanced understanding and knowledge of the Project area and was able to start work on the Project almost immediately.

Directors' Report - Review of Operations continued

MAYOUM KAOLIN PROJECT

During the 2017-2018 financial year the Company secured the rights to the Mayouom permit that was identified as being prospective for kaolin that may be potentially suitable for the production of high purity alumina (HPA).

An initial exploration program completed in June 2018 identified a large kaolin deposit within the permit area.

As the Company's focus for the past 12 months has been on the development of the Minim Martap Project, the limited work completed on the Mayouom permit focussed on mapping the extent of the kaolin deposit and designing an initial drilling program for the deposit. The Company has also completed community meetings with local villagers and representatives explaining its presence and the objectives of the completed and upcoming exploration on the permit.

The Company intends to complete the initial drilling program on the Mayouom Project in the coming 2019-2020 financial year. The exploration program will focus on determining the suitability of the kaolin deposit as a potential raw material for the production of HPA. Given the extremely fine nature of the kaolin, the program is planned to commence in the coming dry season in Cameroon.

Figure 6: Fine grained, massive and brilliant white coloured Mayouom kaolin

BURKINA FASO

Canyon Resources Ltd only active operation in Burkina Faso is on its Pinarello and Konkolikan Projects, located in the south west of the country. These Projects are subject to an earn in agreement with London based Acacia Mining PLC (**Acacia**).

Acacia has been continuing on-going exploration on the Pinarello and Konkolikan Projects.

Due to the difficult political security position in Burkina Faso the Company has ceased any work on these projects until it is confident the security position has improved.

Directors' Report - Review of Operations continued

COMPETENT PERSON'S STATEMENT

The information in this Annual Report that relates to current exploration results is based on information compiled by Dr Alexander Shaw, Chief Geologist of Canyon Resources Ltd.

The information in this document that relates to previous exploration results is based upon information from the report titled Minim Martap-Ngaoundal Bauxite Deposit Exploration Program and Resource Assessment by SRK Consulting (Australasia), September 2009 and available data compiled by Dr Alexander Shaw. The information in the announcement is an accurate representation of the available data and study for the Minim Martap Project.

Dr Shaw is a Member of the Australian Institute of Geoscientists (AIG) and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the December 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). Dr Shaw consents to the inclusion in the announcement of the matters based on his information in the form and context in which it appears.

The information in this announcement that relates to mineral resources is based on information compiled or reviewed by Mr Mark Gifford, an independent Geological expert consulting to Canyon Resources Limited.

Mr Mark Gifford is a Fellow of the Australian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the December 2012 edition of the Australasian Code of Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code).

Mr Gifford consents to the inclusion in the announcement of the matters based on his information in the form and context in which it appears.

FORWARD LOOKING STATEMENTS

All statements other than statements of historical fact included in this announcement including, without limitation, statements regarding future plans and objectives of Canyon, are forward-looking statements. When used in this announcement, forward-looking statements can be identified by words such as 'anticipate', 'believe', 'could', 'estimate', 'expect', 'future', 'intend', 'may', 'opportunity', 'plan', 'potential', 'project', 'seek', 'will' and other similar words that involve risks and uncertainties.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that are expected to take place. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, its directors and management of Canyon that could cause Canyon's actual results to differ materially from the results expressed or anticipated in these statements.

Canyon cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this announcement will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements. Canyon does not undertake to update or revise forward-looking statements, or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this announcement, except where required by applicable law and stock exchange listing requirements.

Directors' Report - Review of Operations continued

CORPORATE

Acquisition of the Minim Martap Bauxite Project

On 9 August 2018 the Company Announced that the Cameroon Government had granted the Company 3 licences over the Minim Martap Bauxite Project.

Placement of Shares

On 21 August 2018 the Company issued 32,258,064 shares at an issue price of \$0.155 per share as an Institutional Placement raising \$5.0 million. The proceeds of this Placement were used to fund the ongoing activities at the Minim Martap Bauxite Project.

Board and Management Changes

Canyon has bolstered its team in preparation for ramping up of activities at Minim Martap ensuring the effective delivery of the development plan and its preparation for raising development finance for the Project.

During the year Steve Zaninovich joined the Board as a Non-executive Director bringing expertise in project development, maintenance and operational readiness of mining projects in Africa. John Lewis also joined the Group as Chief Financial Officer and Company Secretary bringing experience in Corporate Governance and managing the financial aspects of the Group

Conversion of Options

During the financial year the Company converted unlisted options as follows:

Number	Exercise Price	Expiry Date
4,635,417	\$0.06	30 September 2018
7,000,000	\$0.07	30 September 2018
13,000,000	\$0.10	30 September 2018
10,000,000	\$0.12	19 September 2019

OPERATING RESULT FOR THE YEAR

The consolidated entity's operating loss for the year ended 30 June 2019 was \$8,261,236 (year ended 30 June 2018: \$2,991,871). The result included the write-off of exploration and project evaluation expenditure incurred of \$219,195 (30 June 2018: \$1,265,311).

REVIEW OF FINANCIAL CONDITION

At 30 June 2019, the consolidated entity had \$2,219,716 in cash balances (30 June 2018: \$2,261,663).

SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS

In the opinion of directors there were no significant changes in the state of affairs of the consolidated entity that occurred during the year.

Directors' Report - continued

SIGNIFICANT EVENTS AFTER BALANCE DATE

On 29 July 2019 25,000,000 Fully Paid Ordinary Shares were issued at a price of \$0.16 per share, raising a total of \$4.0 million before costs. These funds are to be used for the development of the Minim Martap Bauxite Project and for general working capital.

On 26 September 2019 the Company announced a significant upgrade to the Resource at its 100% owned Minim Martap Bauxite Project (Table 3).

Permit	Inferred			Indicated			Total		
	Mt	Al ₂ O ₃	SiO ₂	Mt	Al ₂ O ₃	SiO ₂	Mt	Al ₂ O ₃	SiO ₂
Minim-Martap	47.5	44.1	3.4	732	45.7	3.1	779	45.6	3.1
Ngaoundal	5.3	41.6	1.0	103	41.7	1.0	108	41.7	1.0
Makan	0.1	45.8	2.7	4.6	47.0	1.6	4.7	46.9	1.6
Total (at 35% Al₂O₃)	53	43.8	3.1	839	45.2	2.8	892	45.1	2.8

Table 3: Minim Martap Project Resource JORC (2012) – Cut-off Grade 35% Al₂O₃

The upgrade included an increase of 62% in the total scale of the Resource and importantly an 850% increase in the Indicated Grade within the Resource.

The Minim Martap Project now has a total resource estimate of 892Mt at 45.1% Al₂O₃, 2.8% SiO₂ (Cut-off Grade 35% Al₂O₃) and includes

- an Indicated Resource of 839Mt at 45.2% Al₂O₃, 2.8% SiO₂ (Cut-off Grade 35% Al₂O₃); and
- a high-grade Indicated Resource of 431Mt at 48.8% Al₂O₃, 2.6% SiO₂. (Cut-off Grade 45% Al₂O₃)

Canyon believes there is still substantial exploration potential at the Minim Martap Project as this resource was calculated on <50% of area.

Other than the above there were no material events subsequent to the balance date.

LIKELY DEVELOPMENTS AND EXPECTED RESULTS

Subject to cash reserves and the ability to replenish those reserves, the consolidated entity will continue its mineral exploration activity at and around its exploration projects with the object of identifying commercial resources.

ENVIRONMENTAL LEGISLATION

With respect to its environmental obligations regarding its exploration activities the consolidated entity endeavours to ensure that it complies with all regulations when carrying out any exploration work and is not aware of any breach at this time.

INDEMNIFICATION AND INSURANCE OF DIRECTORS AND OFFICERS

The Company has entered into Director and Officer Protection Deeds ("Deed") with each Director and the Company Secretary ("Officers"). Under the Deed, the Company indemnifies the relevant Officer to the maximum extent permitted by law against legal proceedings, and any damage or loss incurred in connection with the Officer being an officer of the Company. The Company has paid insurance premiums to insure the Officers against liability arising from any claim against the Officers in their capacity as officers of the Company.

Directors' Report - continued

Remuneration Report (Audited)

This report outlines the remuneration arrangements in place for the key management personnel of Canyon for the financial year ended 30 June 2019. The information provided in this remuneration report has been audited as required by Section 308 (3C) of the Corporations Act 2001.

The remuneration report details the remuneration arrangements for key management personnel ("KMP") who are defined as those persons having authority and responsibility for planning, directing and controlling the major activities of the Company and the Group, directly or indirectly, including any director (whether executive or otherwise) of the Company, and includes the executives in the Company and the Group.

Key Management Personnel:

Directors

David Netherway (Non-Executive Chairman)

Phillip Gallagher (Managing Director)

Emmanuel Correia (Non-Executive Director)

Steven Zaninovich (Non-Executive Director – appointed 30 January 2019)

Other

John Lewis (Company Secretary)

REMUNERATION PHILOSOPHY

The performance of the Company depends upon the quality of the directors and executives. The philosophy of the Company in determining remuneration levels is to:

- set competitive remuneration packages to attract and retain high calibre employees;
- link executive rewards to shareholder value creation; and
- establish appropriate, demanding performance hurdles for variable executive remuneration.

REMUNERATION AND NOMINATION COMMITTEE

Due to the size of the Company the entire Board are members of the Remuneration and Nomination Committee. The Committee assesses the appropriateness of the nature and amount of remuneration of directors and executives on a periodic basis by reference to relevant employment market conditions with an overall objective of ensuring maximum stakeholder benefit from the retention of a high quality Board and executive team.

REMUNERATION STRUCTURE

In accordance with best practice corporate governance, the structure of non-executive director and executive remuneration is separate and distinct.

NON-EXECUTIVE DIRECTOR REMUNERATION

The Board seeks to set aggregate remuneration at a level that provides the Company with the ability to attract and retain directors of the highest calibre, whilst incurring a cost that is acceptable to shareholders.

The ASX Listing Rules specify that the aggregate remuneration of non-executive directors shall be determined from time to time by a general meeting. The maximum aggregate payable to non-executive directors approved by shareholders is \$300,000 per annum.

Each non-executive director receives a fee for being a director of the Company. The remuneration of non-executive directors for the year ended 30 June 2019 is detailed in Table 1 in this report.

DIRECTOR AND EXECUTIVE REMUNERATION

Remuneration may consist of fixed remuneration and variable remuneration (comprising short-term and long-term incentive schemes).

Directors' Report – Remuneration Report (Audited) Continued

FIXED REMUNERATION

Fixed remuneration is reviewed annually by the Board. The process consists of a review of relevant comparative remuneration in the market and internally and, where appropriate, obtaining external advice on policies and practices. The Board has access to external, independent advice where necessary.

Directors and executives are given the opportunity to receive their fixed (primary) remuneration in a variety of forms including cash and fringe benefits such as motor vehicles and expense payment plans. It is intended that the manner of payment chosen will be optimal for the recipient without creating undue cost for the Company. The fixed remuneration component of the Company directors and other KMP is detailed in Table 1.

VARIABLE REMUNERATION

The objective of the short term incentive program is to link the achievement of the Company's operational targets with the remuneration received by the executives charged with meeting those targets. The total potential short term incentive available is to be set at a level so as to provide sufficient incentive to the executive to achieve the operational targets and such that the cost to the Company is reasonable in the circumstances.

Actual payments which may be granted to each executive depend on the extent to which specific operating targets set at the beginning of the financial year are met. For the year to 30 June 2019, and to the date of this report, the Company made payments totalling \$140,000 to key management personnel.

The Company may also make long term incentive payments to reward senior executives in a manner that aligns this element of remuneration with the creation of shareholder wealth.

EMPLOYEE SHARE PLAN

On 25 November 2016 Shareholders approved a new employee incentive scheme titled the Canyon Long Term Incentive Plan.

As a result of this Shareholder approval the Company will be able to issue options, performance rights or performance shares under the Plan to eligible participants over a period of 3 years without impacting on the Company's ability to issue up to 15% of its total ordinary securities without Shareholder approval in any 12 month period.

The objective of the Plan is to attract, motivate and retain key employees and it is considered by the Company that the adoption of the Plan and the future issue of Plan Securities under the Plan will provide selected employees with the opportunity to participate in the future growth of the Company.

Any future issues of Plan Securities to a related party or a person whose relationship with the company or the related party is, in ASX's opinion, such that approval should be obtained will require additional Shareholder approval under ASX Listing Rule 10.14 at the relevant time.

Shareholders should note that 11,000,000 performance shares have been issued to Directors (3 million to Emmanuel Correia and 2.5 million to both David Netherway and Phillip Gallagher) and management in previous periods.

On 23 November 2018 shareholders approved the issue of 18 million Performance Rights to the Directors of the Company subject to the following Vesting Conditions:

1. one third vest on delineating a further JORC 2012 compliant inferred (or greater) mineral resource of at least 100 MT of bauxite at 47% Al₂O₃ on Minim Martap Bauxite Project. These rights vested and as a result 6 million shares were issued to the directors in the proportions included in the schedule below;
2. one third vest on the raising of at least a further \$10,000,000 in support of the Minim Martap Bauxite Project; and
3. one third vest on participant remaining with the Company for a minimum of 12 months from the date of issue.

Name	Performance Rights
David Netherway	5,000,000
Phillip Gallagher	8,000,000
Emmanuel Correia	5,000,000
Total	18,000,000

The performance rights had a fair value of \$0.2266 per right based on the Company's share price at grant date being the 2018 AGM. Refer to Note 12 to the financial report for further details.

Directors' Report – Remuneration Report (Audited) Continued

EMPLOYMENT CONTRACTS

The Company has executed an Executive Service agreement with Mr Phillip Gallagher, the Managing Director. The agreement provides for the following terms and conditions:

- Remuneration of \$300,000 per annum plus superannuation
- The agreement may be terminated by the Company giving 6 months' notice. Mr Gallagher can terminate the agreement by giving 3 months' written notice.

The Company has executed an Executive Service agreement with Mr John Lewis, Company Secretary and CFO. The agreement provides for the following terms and conditions:

- Remuneration of \$185,000 per annum plus superannuation
- The agreement may be terminated by either the Company or Mr Lewis upon the giving of 3 months' notice.

There are no other new employment contracts with directors or executives.

SHARE-BASED PAYMENTS GRANTED AS COMPENSATION TO KEY MANAGEMENT PERSONNEL DURING THE CURRENT FINANCIAL YEAR

As noted previously, during the financial year performance rights were granted to key management personnel of the Company. Refer Note 12 for details. The performance rights remain held by those key management personnel at balance date and at the date of the Directors Report two thirds have vested as outline above.

During the financial year the Company issued a total of 7 million shares to directors upon conversion of options issued to them as compensation as follows:

Director	Options converted	Exercise price \$
Phillip Gallagher	5,000,000	0.07
David Netherway	2,000,000	0.07

No other remuneration options issued in prior years were converted to shares.

There were no alterations to the terms and conditions of options granted as remuneration since their grant date.

OTHER RELATED PARTY TRANSACTIONS

There were no other related party transactions with key management personnel.

Directors' Report continued

DIRECTORS' MEETINGS

The number of meetings of directors held during the year and the number of meetings attended by each director were as follows:

Director	Board Meetings	
	Meetings entitled to attend	Meetings attended
Phillip Gallagher	4	4
David Netherway	4	4
Emmanuel Correia	4	4
Steven Zaninovich	2	2

The Company has an Audit & Risk Committee and a Nomination and Remuneration Committee. Membership of these committees and meetings held by these committees is set out in the Corporate Governance Statement see page 73.

PROCEEDINGS ON BEHALF OF THE COMPANY

No person has applied for leave of court to bring proceedings on behalf of the Company or intervene in any proceedings to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or any part of these proceedings. The Company was not a party to any such proceedings during the year.

AUDITOR INDEPENDENCE AND NON-AUDIT SERVICES

Section 307C of the Corporations Act 2001 requires our auditor, HLB Mann Judd, to provide the directors of the Company with an Independence Declaration in relation to the audit of the financial report. This Independence Declaration is set out on page 24 and forms part of this directors' report for the year ended 30 June 2019.

NON-AUDIT SERVICES

There were no non-audit services provided by our auditor, HLB Mann Judd during the year (2018: nil).

Signed in accordance with a resolution of the directors

Phillip Gallagher
Managing Director
Perth WA, 30th September 2019

AUDITOR'S INDEPENDENCE DECLARATION

As lead auditor for the audit of the consolidated financial report of Canyon Resources Limited for the year ended 30 June 2019, I declare that to the best of my knowledge and belief, there have been no contraventions of:

- a) the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- b) any applicable code of professional conduct in relation to the audit.

Notes to the Consolidated Financial Statements

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

a. Basis of preparation

The financial report is a general-purpose financial report, which has been prepared in accordance with the requirements of the Corporations Act 2001, Accounting Standards and complies with other requirements of the law.

The financial statements comprise the consolidated financial statements for the Group. For the purposes of preparing the consolidated financial statements the Company is a for-profit entity.

The accounting policies detailed below have been consistently applied to all of the years presented unless otherwise stated. The financial statements are for the consolidated entity consisting of Canyon Resources Limited and its subsidiaries.

The financial report has also been prepared on a historical cost basis which contemplates continuity of normal business activities and the realisation of assets and settlement of liabilities in the ordinary course of business, except for available-for-sale investments which are measured at fair value. Cost is based on the fair values of the consideration given in exchange for assets.

The financial report is presented in Australian dollars.

The Company is a listed public company, incorporated in Australia and operating in Australia, Cameroon and Burkina Faso, West Africa. The entity's principal activities are bauxite and gold exploration.

b. Adoption of new and revised standards

In the financial year ended 30 June 2019, the Directors have reviewed all of the new and revised Standards and Interpretations issued by the AASB that are relevant to the Group's operations and effective for annual reporting periods beginning on or after 1 July 2018. The Directors have also reviewed all new Standards and Interpretations that have been issued but are not yet effective for the financial year ended 30 June 2019. As a result of this review the Directors have determined that there is no impact, material or otherwise, of the new and revised Standards and Interpretations on the Group's business and, therefore, no material change necessary to Group accounting policies with the exception of the following.

AASB 9 replaces AASB 139 Financial Instruments: Recognition and Measurement and makes changes to a number of areas including classification of financial instruments, measurement, impairment of financial assets and hedge accounting model.

Financial instruments are classified as either held at amortised cost or fair value.

Financial instruments are carried at amortised cost if the business model concept can be satisfied.

All equity instruments are carried at fair value and the cost exemption under AASB 139 which was used where it was not possible to reliably measure the fair value of an unlisted entity has been removed. Equity instruments which are non-derivative and not held for trading may be designated as fair value through other comprehensive income (FVOCI).

Previously classified available-for-sale investments now carried at fair value are exempt from impairment testing and gains or loss on sale are no longer recognised in profit or loss.

There is no material impact to profit or loss or net assets on the adoption of this new standard in the current or comparative years. The equity investments held by the Company have been designated as Fair Value through Other Comprehensive Income. The Company has elected not to change comparatives on transition of AASB 9.

AASB 16 Leases - replaces AASB 117 Leases and related interpretations effective from annual reporting periods beginning on or after 1 January 2019.

Notes to the Consolidated Financial Statements

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

AASB 16 removes the classification of leases as either operating leases or finance leases – for the lessee – effectively treating all leases as finance leases. Most leases will be capitalised on the statement of financial position by recognising a lease liability for the present value obligation and a ‘right of use’ asset. The right of use asset is calculated based on the lease liability plus initial direct costs, prepaid lease payments and estimated restoration costs less lease incentives received. This will result in an increase in the recognised assets and liabilities in the statement of financial position as well as a change in the expense recognition with interest and depreciation replacing operating lease expense. There are exemptions for short-term leases and leases of low-value items.

As a result of this review the Directors have determined that AASB 16 Leases may have a material effect on the application in future periods.

c. Statement of compliance

The financial report was authorised for issue on 30 September 2019.

The financial report complies with Australian Accounting Standards, which include Australian equivalents to International Financial Reporting Standards (AIFRS). Compliance with AIFRS ensures that the financial report, comprising the financial statements and notes thereto, complies with International Financial Reporting Standards (IFRS).

d. Critical accounting estimates and judgements

The application of accounting policies requires the use of judgements, estimates and assumptions about carrying values of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based upon historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. The carrying amounts of certain assets and liabilities are often determined based on estimates and assumptions of future events. The key estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of certain assets and liabilities within the next annual reporting period are:

Share-based payment transactions:

The Company measures the cost of equity-settled transactions with employees and consultants where the fair value of the services provided cannot be estimated by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined using a Black and Scholes model and is based on assumptions disclosed in periods disclosed when the equity instruments are granted.

Exploration and evaluation costs carried forward:

The recoverability of the carrying amount of exploration and evaluation costs carried forward have been reviewed by the directors. In conducting the review, the recoverable amount has been assessed by reference to the higher of “fair value less costs to sell” and “value in use”. In determining value in use, future cash flows are based on various parameters.

Variations to expected future cash flows and timing thereof, could result in significant changes to the impairment test results, which in turn could impact future financial results.

Notes to the Consolidated Financial Statements *continued*

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

e. Basis of consolidation

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Canyon Resources Limited ('Company' or 'parent entity') as at 30 June 2019 and the results of all subsidiaries for the year then ended. Canyon Resources Limited and its subsidiaries are referred to in this financial report as the Group or the consolidated entity.

The financial statements of the subsidiaries are prepared for the same reporting period as the parent entity, using consistent accounting policies.

In preparing the consolidated financial statements, all intercompany balances and transactions, income and expenses and profit and losses resulting from intra-group transactions have been eliminated in full.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group and cease to be consolidated from the date on which control is transferred out of the Group. Control exists where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing when the Group controls another entity.

Unrealised gains or transactions between the Group and its associates are eliminated to the extent of the Group's interests in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests represent the portion of profit or loss and net assets in subsidiaries not held by the Group and are presented separately in the consolidated statement of comprehensive income and within equity in the consolidated statement of financial position. Losses are attributed to the non-controlling interests even if that results in a deficit balance.

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised within equity attributable to owners of Canyon Resources Limited.

f. Revenue recognition

Revenue is recognised to the extent that control of the good or service has passed and it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

Interest income

Interest revenue is recognised on a time proportionate basis that takes into account the effective yield on the financial asset.

Sale of exploration assets

Revenue is recognised when title to the exploration assets has passed at which time all the following conditions are satisfied:

- the Group has transferred to the buyer the significant risks and rewards of ownership of the assets;
- the Group retains no effective control over the assets sold;
- the amount of revenue can be measured reliably; and
- it is probable that the economic benefits associated with the transaction will flow to the Group.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Earn In agreements

Reimbursements which can be claimed by the Company under the terms of the Earn In agreement are recognised as income at the time the Company is entitled to those reimbursements.

g. Income tax and other taxes

The income tax expense or benefit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements, and to unused tax losses.

Deferred income tax is provided on all temporary differences at the balance date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognised for all taxable temporary differences except:

- when the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- when the taxable temporary difference is associated with investments in subsidiaries, associates or interests in joint ventures, and the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets are recognised for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- when the deductible temporary difference is associated with investments in subsidiaries, associates or interests in joint ventures, in which case a deferred tax asset is only recognised to the extent that it is probable that the temporary difference will reverse in the foreseeable future and taxable profit will be available against which the temporary difference can be utilised.

The carrying amount of deferred income tax assets is reviewed at each balance date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Unrecognised deferred income tax assets are reassessed at each balance date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance date.

Income taxes relating to items recognised directly in equity are recognised in equity and not in profit or loss.

Deferred tax assets and deferred tax liabilities are offset only if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and liabilities relate to the same taxable entity and the same taxation authority.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

g. Income tax and other taxes (continued)

Other taxes

Revenues, expenses and assets are recognised net of the amount of GST except:

- when the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables, which are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Cash flows are included in the statement of cash flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

h. Cash and cash equivalents

Cash includes cash on hand and at call and deposits with banks or financial institutions and investments in money market instruments, which are readily convertible to cash and used in the cash management function on a day to day basis, net of bank overdraft.

i. Acquisition of assets

The purchase method of accounting is used for all acquisitions of assets regardless of whether equity instruments or other assets are acquired. Cost is determined as the fair value of the assets given up, shares issued or liabilities undertaken at the date of acquisition plus incidental costs, other than share issue costs, directly attributable to the acquisition.

j. Exploration and evaluation expenditure

Exploration and evaluation costs are either expensed as incurred or capitalised where the capitalised expense meets the requirements for capitalisation. Exploration and evaluation costs are carried forward only if the rights to tenure of the area of interest are current and either:

- The costs are expected to be recouped through successful development and exploitation of the area of interest or;
- The activities in the area of interest at the reporting date have not reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves, and active and significant operations in, or in relation to, the area of interest, are continuing.

Accumulated acquisition costs in relation to an abandoned area are written off in full to the statement of profit or loss and other comprehensive income in the year in which the decision to abandon the area is made.

The carrying values of acquisition costs are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Where a decision has been made to proceed with development in respect of an area of interest the relevant exploration and evaluation asset is tested for impairment and the balance is then reclassified to development.

The group has elected to capitalise all acquisition costs for its areas of interest and to expense all ongoing exploration and evaluation expenditure with the exception of the Minim Martap project where all expenditure that meets the recognition criteria is being capitalised.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

k. Impairment of assets

At each reporting date, the Group reviews the carrying values of its tangible and intangible assets to determine whether there is any indication that those assets have been impaired. If such an indication exists, the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, is compared to the asset's carrying value. Any excess of the asset's carrying value over its recoverable amount is expensed to the statement of profit or loss and other comprehensive income.

Impairment testing is performed annually for goodwill and intangible assets with indefinite lives.

Where it is not possible to estimate the recoverable amount of an individual asset, the consolidated entity estimates the recoverable amount of the cash-generating unit to which the asset belongs.

l. Recoverable amount

Non-current assets are not carried at an amount above their recoverable amount, and where carrying values exceed this recoverable amount assets are written down. In determining recoverable amount, the expected net cash flows have not been discounted.

m. Trade and other payables

Trade payables and other payables are carried at amortised cost and represent liabilities for goods and services provided to the Group prior to the end of the financial year that are unpaid and arise when the Group becomes obliged to make future payments in respect of the purchase of these goods and services. Trade and other payables are presented as current liabilities unless payment is not due within 12 months.

n. Issued capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds. Incremental costs directly attributable to the issue of new shares or options for the acquisition of a new business are not included in the cost of acquisition as part of the purchase consideration.

o. Share-based payment transactions

Equity settled transactions:

The Group may provide benefits to full and part time employees (including senior executives), officers and directors in the form of share-based payments, whereby employees render services in exchange for shares or rights over shares (equity-settled transactions).

There is a plan currently in place to provide these benefits being the Canyon Long Term Incentive Plan, which provides benefits to directors, officers and employees.

The cost of these equity-settled transactions with employees is measured by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined using a Black and Scholes model, further details of which are given in Note 12.

In valuing equity-settled transactions, no account is taken of any performance conditions, other than conditions linked to the price of the shares of Canyon Resources Limited (market conditions) if applicable. The cost of equity-settled transactions is recognised, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award (the vesting period).

The cumulative expense recognised for equity-settled transactions at each balance date until vesting date reflects (i) the extent to which the vesting period has expired and (ii) the Company's best estimate of the number of equity instruments that will ultimately vest. No adjustment is made for the likelihood of market performance conditions being met as the effect of these conditions is included in the determination of fair value at grant date. The statement of comprehensive income charge or credit for a period represents the movement in cumulative expense recognised as at the beginning and end of that period.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

o. Share based payment transactions

No expense is recognised for awards that do not ultimately vest, except for awards where vesting is only conditional upon a market condition.

If the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified. In addition, an expense is recognised for any modification that increases the total fair value of the share-based payment arrangement, or is otherwise beneficial to the employee, as measured at the date of modification.

If an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately. However, if a new award is substituted for the cancelled award and designated as a replacement award on the date that it is granted, the cancelled and new award are treated as if they were a modification of the original award, as described in the previous paragraph.

p. Property, plant and equipment

Plant and equipment is stated at cost less accumulated depreciation and any accumulated impairment losses. Such cost includes the cost of replacing parts that are eligible for capitalisation when the cost of replacing the parts is incurred. Similarly, when each major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement only if it is eligible for capitalisation.

Depreciation is calculated on a diminishing value basis over the estimated useful life of the assets as follows:

Motor vehicles – 4 years

Equipment – 5 years

The assets' residual values, useful lives and amortisation methods are reviewed, and adjusted if appropriate, at each financial year-end.

(i) Impairment

The carrying values of plant and equipment are reviewed for impairment at each reporting date, with recoverable amount being estimated when events or changes in circumstances indicate that the carrying value may be impaired. The recoverable amount of plant and equipment is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For an asset that does not generate largely independent cash inflows, recoverable amount is determined for the cash-generating unit to which the asset belongs, unless the asset's value in use can be estimated to be close to its fair value.

An impairment exists when the carrying value of an asset or cash-generating unit exceeds its estimated recoverable amount. The asset or cash-generating unit is then written down to its recoverable amount.

For plant and equipment, impairment losses are recognised in the consolidated statement of profit or loss and other comprehensive income in the other expenses line item.

(ii) De-recognition and disposal

An item of property, plant and equipment is derecognised upon disposal or when no further future economic benefits are expected from its use or disposal.

Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss and other comprehensive income in the year the asset is derecognised.

The expense relating to any provision is presented in the statement of profit or loss and other comprehensive income net of any reimbursement.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

q. Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

When the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The

Provisions are measured at the present value or management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a borrowing cost.

Employee leave benefits

(i) Wages, salaries, annual leave and sick leave

Liabilities for wages and salaries, including non-monetary benefits and annual leave expected to be settled within 12 months of the reporting date are recognised in other payables in respect of employees' services up to the reporting date. They are measured at the amounts expected to be paid when the liabilities are settled. Liabilities for non-accumulating sick leave are recognised when the leave is taken and are measured at the rates paid or payable.

(ii) Long service leave

The liability for long service leave is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures, and period of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currencies that match, as closely as possible, the estimated future cash outflows.

r. Trade and other receivables

Trade receivables are measured on initial recognition at fair value and are subsequently measured at amortised cost using the effective interest rate method, less any allowance for impairment. Trade receivables are generally due for settlement within periods ranging from 15 days to 30 days.

Impairment of trade receivables is continually reviewed and those that are considered to be uncollectible are written off by reducing the carrying amount directly.

s. Earnings per share

Basic earnings per share is calculated as net profit/loss, adjusted to exclude any costs of servicing equity (other than dividends) and preference share dividends, divided by the weighted average number of ordinary shares, adjusted for any bonus element.

Diluted earnings per share is calculated as net profit/loss, adjusted for:

- costs of servicing equity (other than dividends) and preference share dividends;
- the after tax effect of dividends and interest associated with dilutive potential ordinary shares that have been recognised as expenses; and
- other non-discretionary changes in revenues or expenses during the period that would result from the dilution of potential ordinary shares;

divided by the weighted average number of ordinary shares and dilutive potential ordinary shares, adjusted for any bonus element.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

t. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors of Canyon Resources Limited.

u. Financial instruments

Applicable to 30 June 2019

Recognition and derecognition

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and substantially all the risks and rewards are transferred.

A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

Classification and initial measurement of financial assets

Except for those trade receivables that do not contain a significant financing component and are measured at the transaction price in accordance with AASB 15, all financial assets are initially measured at fair value adjusted for transaction costs (where applicable).

For the purpose of subsequent measurement, financial assets, other than those designated and effective as hedging instruments, are classified into the following categories:

- amortised cost
- fair value through profit or loss (FVTPL)
- equity instruments at fair value through other comprehensive income (FVOCI)
- debt instruments at fair value through other comprehensive income (FVOCI).

All income and expenses relating to financial assets that are recognised in profit or loss are presented within finance costs, finance income or other financial items, except for impairment of trade receivables which is presented within other expenses.

The classification is determined by both:

- the entity's business model for managing the financial asset
- the contractual cash flow characteristics of the financial asset.

Subsequent measurement of financial assets

Financial assets at amortised cost

Financial assets are measured at amortised cost if the assets meet the following conditions (and are not designated as FVTPL):

- they are held within a business model whose objective is to hold the financial assets to collect its contractual cash flows
- the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, these are measured at amortised cost using the effective interest method.

Discounting is omitted where the effect of discounting is immaterial. The Group's cash and cash equivalents, trade and most other receivables fall into this category of financial instruments as well as listed bonds that were previously classified as held-to-maturity under AASB 9.

Equity instruments at fair value through other comprehensive income (Equity FVOCI)

Investments in equity instruments that are not held for trading are eligible for an irrevocable election at inception to be measured at FVOCI. The Group has elected to carry its equity investments at FVOCI.

Under Equity FVOCI, subsequent movements in fair value are recognised in other comprehensive income and are never reclassified to profit or loss.

Dividend from these investments continue to be recorded as other income within the profit or loss unless the dividend clearly represents return of capital.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

u. Financial Instruments continued

This category includes unlisted equity securities that were previously classified as 'available-for-sale' under AASB 139.

Any gains or losses recognised in other comprehensive income (OCI) are not recycled upon derecognition of the asset.

Impairment of financial assets

AASB 9's impairment requirements use more forward-looking information to recognise expected credit losses – the 'expected credit loss (ECL) model'. This replaced AASB 139's 'incurred loss model'.

Instruments within the scope of the new requirements included loans and other debt-type financial assets measured at amortised cost and FVOCI, trade receivables, contract assets recognised and measured under AASB 15 and loan commitments and some financial guarantee contracts (for the issuer) that are not measured at fair value through profit or loss.

Recognition of credit losses is no longer dependent on the Group first identifying a credit loss event. Instead the Group considers a broader range of information when assessing credit risk and measuring expected credit losses, including past events, current conditions, reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

In applying this forward-looking approach, a distinction is made between:

- financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk ('Level 1') and
- financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low ('Level 2').
- 'Level 3' would cover financial assets that have objective evidence of impairment at the reporting date.

'12-month expected credit losses' are recognised for the first category while 'lifetime expected credit losses' are recognised for the second category.

Measurement of the expected credit losses is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

Trade and other receivables and contract assets

The Group makes use of a simplified approach in accounting for trade and other receivables as well as contract assets and records the loss allowance as lifetime expected credit losses. These are the expected shortfalls in contractual cash flows, considering the potential for default at any point during the life of the financial instrument. In calculating, the Group uses its historical experience, external indicators and forward-looking information to calculate the expected credit losses using a provision matrix.

The Group assess impairment of trade receivables on a collective basis as they possess shared credit risk characteristics they have been grouped based on the days past due.

Classification and measurement of financial liabilities

The Group's financial liabilities include borrowings, trade and other payables and derivative financial instruments.

Financial liabilities are initially measured at fair value, and, where applicable, adjusted for transaction costs unless the Group designated a financial liability at fair value through profit or loss.

Subsequently, financial liabilities are measured at amortised cost using the effective interest method except for derivatives and financial liabilities designated at FVTPL, which are carried subsequently at fair value with gains or losses recognised in profit or loss (other than derivative financial instruments that are designated and effective as hedging instruments).

All interest-related charges and, if applicable, changes in an instrument's fair value that are reported in profit or loss are included within finance costs or finance income.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

u. Financial Instruments continued

Derecognition of financial assets

A financial asset is derecognised when:

- the rights to receive cash flows from the asset have expired or been transferred;
- has transferred substantially all the risks and rewards of the asset, or
- The Group no longer controls the asset.

Applicable to 30 June 2018

Recognition

Financial instruments are initially measured at cost on trade date, which includes transaction costs, when the related contractual rights or obligations exist. Subsequent to initial recognition these instruments are measured as set out below.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are stated at amortised cost using the effective interest rate method.

Available-for-sale financial assets

Available for sale financial assets include any financial assets not classified as loans and receivables, held to maturity investments or fair value through profit or loss. Available-for-sale financial assets are reflected at fair value. Unrealised gains and losses arising from changes in fair value are taken directly to equity.

Financial liabilities

Non-derivative financial liabilities are recognised at amortised cost, comprising original debt less principal payments and amortisation.

A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

Fair value

Fair value is determined based on current bid prices for all quoted investments. Valuation techniques are applied to determine the fair value for all unlisted securities, including recent arm's length transactions, reference to similar instruments and option pricing models.

Impairment

At each reporting date, the Company assesses whether there is objective evidence that a financial instrument has been impaired. In the case of available-for sale financial instruments, a prolonged decline in the value of the instrument is considered to determine whether an impairment has arisen. Impairment losses are recognised in the statement of comprehensive income.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a Group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired;
- the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the Group has transferred its rights to receive cash flows from the asset and either:
 - has transferred substantially all the risks and rewards of the asset, or
 - has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

v. Foreign currency translation

Both the functional and presentation currency of Canyon Resources Limited and its Australian subsidiaries is Australian dollars. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

Transactions in foreign currencies are initially recorded in the functional currency by applying the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the balance date.

All exchange differences in the consolidated financial report are taken to profit or loss with the exception of differences on foreign currency borrowings that provide a hedge against a net investment in a foreign entity. These are taken directly to equity until the disposal of the net investment, at which time they are recognised in profit or loss.

Tax charges and credits attributable to exchange differences on those borrowings are also recognised in equity.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction.

Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss.

The functional currency of the foreign operations in Cameroon is the West African Franc (XAF) and Burkina Faso is the Central African Franc (XOF).

As at the balance date the assets and liabilities of these subsidiaries are translated into the presentation currency of Canyon Resources Limited at the rate of exchange ruling at the balance date and their statements of profit or loss and other comprehensive income are translated at the weighted average exchange rate for the year.

The exchange differences arising on the translation are taken directly to a separate component of equity, being recognised in the foreign currency translation reserve.

On disposal of a foreign entity, the deferred cumulative amount recognised in equity relating to that particular foreign operation is recognised in profit or loss.

w. Parent Entity Financial Information

The financial information for the parent entity, Canyon Resources Limited, disclosed in Note 23 has been prepared on the same basis as the consolidated financial statements, except as set out below.

(i) Investments in subsidiaries, associates and joint venture entities

Investments in subsidiaries, associates and joint venture entities are accounted for at cost in the financial statements of Canyon Resources Limited. Dividends received from associates are recognised in the parent entity's profit or loss, rather than being deducted from the carrying amount of these investments.

(ii) Share-based payments

The grant by the Company of options over its equity instruments to the employees of subsidiary undertakings in the Group is treated as a capital contribution to that subsidiary undertaking. The fair value of employee services received, measured by reference to the grant date fair value, is recognised over the vesting period as an increase to investment in subsidiary undertakings, with a corresponding credit to equity.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

1. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (continued)

x. Going Concern

This report has been prepared on the going concern basis, which contemplates the continuity of normal business activity and the realisation of assets and the settlement of liabilities in the normal course of business.

The Group has incurred a net loss after tax for the year ended 30 June 2019 of \$8,261,236 (2018: (\$2,991,871))

At the balance date, the Group had an excess of current assets over current liabilities of \$1,588,998 (2018: excess of current assets over current liabilities of \$2,058,300).

The group has an exploration expenditure commitment of \$6,540,494 (refer Note 20 (a)) in relation to the Minim Martap Project and the Group intends to meet this commitment.

The directors recognise that the ability of the company to continue to fund its activities is dependent on its ability to raise capital from its existing and potential shareholders. The Company raised \$4 million on 30 July 2019 via a Placement of 25 Million shares to professional and sophisticated investors. It is anticipated that further funding will be required in the forthcoming year.

The Directors have reviewed the business outlook and are confident funding requirements will be achieved and therefore are of the opinion that the use of the going concern basis of accounting is appropriate as the company will continue to meet its financial obligations in the future.

Should the funding noted not be achieved then there is a material uncertainty that may cause significant doubt as to whether the Group will continue as a going concern and will be able to realise its assets and extinguish its liabilities in the normal course of business.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

3. INCOME TAX continued

The potential deferred tax benefit of tax losses has not been recognised as an asset because recovery of tax losses is not considered probable in the context of AASB 112. The benefit of these tax losses will only be realised if:

- The Company derives future assessable income of a nature and of an amount sufficient to enable the benefit from the deduction for the losses to be realised.
- The Company complies with the conditions for deductibility imposed by the law; and
- No changes in tax legislation adversely affect the Company in realising the benefit from the deduction for the loss.

4. DIVIDENDS

The Company has not declared a dividend for the year ended 30 June 2019 (2018: Nil).

11. CAPITALISED EXPLORATION EXPENDITURE (continued)

Shares Issued for the Acquisition of the Minim Martap Project

In August 2018 Canyon announced that it had been granted the licences for the Minim Martap Project.

The Company had engaged Mr Serge Asso'o to assist it in its negotiations with the Government and to navigate the many levels of Government involved in the acquisition. The Company agreed to pay Mr Asso'o a success fee comprised of Canyon shares upon the successful granting of the Project to Canyon and the satisfaction of a number of project related milestones:

Subject to shareholder approval, Mr Asso'o will be issued:

1. 30,000,000 ordinary Canyon shares following approval of grant of Minim Martap project from the Cameroon Government.
50% of the shares will be voluntarily escrowed for 6 months after their issue.
2. 20,000,000 ordinary Canyon shares 12 months after the granting of permits.
50% of the shares will be voluntarily escrowed for 6 months after their issue.
3. 20,000,000 ordinary Canyon shares upon the completion and execution of a final detailed Mining Convention with the Government of Cameroon for the mine and infrastructure related to the Minim Martap project. A final Mining Convention includes all rail, port, other infrastructure and land access agreements for the Project, all taxation agreements and other duties relating to the Project, commitments regarding local employment, environmental and community agreements and all other agreements with the Government of Cameroon that relate to the long term operation of the Project.
4. 30,000,000 ordinary Canyon shares following the issuing of a Mining Permit, the securing and confirmation of full mine funding and the Final Investment Decision by the Board to commence mine construction. A mining permit can only be issued by the Government of Cameroon upon the execution of the Mining Convention, a detailed Bankable Feasibility Study (BFS) being accepted by the Government and the securing of full funding for the mine construction.

After receiving shareholder approval, Canyon issued the first Tranche of Shares to Mr Asso'o in December 2018. As a result, the company recorded an amount of \$2,040,000 as a cost of Acquisition of the Minim Martap Project being the fair value (market price) of the first tranche of shares (30,000,000) at the measurement date being 15 August 2017, the date the agreement was entered into. The second tranche is vesting 12 months from granting of the permits.

As of balance date \$648,329 has been recognised in relation to tranche 2. No amounts have been recognised in relation to tranches 3 or 4. This will be reassessed by the directors as the Project progresses.

Acquisition of Birsok

On 12 October 2018 the Company Announced that it signed a Letter of Intent ("LoI") with Altus Strategies Plc (Altus), to transfer to Canyon a 100% interest in the Birsok and Mandoum licences (the "Birsok project") and to terminate its existing bauxite Joint Venture Agreement ("JVA") with Altus. The Terms of LoI are:

Part A: In lieu of the termination of the JVA, Canyon will issue to Altus:

1. 15,000,000 ordinary free trading Canyon shares (the "Initial Issue shares");
2. 10,000,000 ordinary Canyon shares, to be issued 12 months following the Initial Issue shares and subject to a 12 month voluntary escrow.

Part B: In lieu of the transfer of the Birsok project:

1. 5,000,000 ordinary Canyon shares, to be issued upon the execution of a mining convention on the Minim Martap project and subject to a 12 month voluntary escrow;
2. a US\$1.50 per tonne royalty on ore mined and sold from the Birsok project.

As at the Balance date settlement of the transaction has not been completed and as a result no value has been attributed to the transaction in the financial report.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

12. SHARE-BASED PAYMENTS

Performance Shares

On 25 November 2016 Shareholders approved a new employee incentive scheme titled the Canyon Long Term Incentive Plan.

As a result of this Shareholder approval the Company will be able to issue options, performance rights or performance shares under the Plan to eligible participants over a period of 3 years without impacting on the Company's ability to issue up to 15% of its total ordinary securities without Shareholder approval in any 12 month period.

The objective of the Plan is to attract, motivate and retain key employees and it is considered by the Company that the adoption of the Plan and the future issue of Plan Securities under the Plan will provide selected employees with the opportunity to participate in the future growth of the Company.

Any future issues of Plan Securities to a related party or a person whose relation with the company or the related party is, in the ASX's opinion, such that approval should be obtained will require additional Shareholder approval under ASX Listing Rule 10.14 at the relevant time.

8,000,000 Director Performance Shares were approved 25 November 2016 to Messrs David Netherway, Phillip Gallagher and Emmanuel Correia, a further 3,000,000 Employee Performance Shares were issued under the Canyon Long Term Incentive Plan on 30 May 2017 the terms and conditions set out below:

Name	Performance Shares
David Netherway	2,500,000
Phillip Gallagher	2,500,000
Emmanuel Correia	3,000,000
Employees and consultants	3,000,000
Total	11,000,000

These performance shares were independently valued, using a valuation methodology based on the guidelines set out in AASB 2 *Share Based Payments*. Details of the assumptions used in the valuation of these performance shares issued are as follows:

Item	Director performance shares	Employee and consultants performance shares
Number of shares	8,000,000	3,000,000
Valuation (issue) date	25 November 2016	30 May 2017
Fair value per Performance share	\$0.10530	\$0.07907
Total fair value	\$842,400	\$237,210

The Performance Shares will be issued for nil cash consideration as fully paid ordinary shares in the capital of the Company issued on the terms and conditions under the Canyon Long Term Incentive Plan and subject to the following vesting conditions:

- one third vest on delineating a resource of at least 150 MT on one of the Company's existing projects or a project to be acquired by the Company;
- one third vest on the raising of at least \$10 million in support of a Company project; and
- one third vest on the Related party remaining with the Company for a minimum of 12 months.

During the 2019 Financial Year all of the above performance shares have fully vested.

During the financial year \$61,390 was expensed in relation to the performance shares. 5,333,333 performance shares were converted to ordinary shares during the year.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

12. SHARE-BASED PAYMENTS (continued)

Performance Rights

On 23 November 2018 shareholders approved the issue of 18.0 million Performance Rights to the Directors of the Company.

The Performance Rights were issued for nil cash consideration and are convertible into fully paid ordinary shares in the capital of the Company on the terms and conditions under the Canyon Long Term Incentive Plan and subject of the following Vesting Conditions:

1. one third vest on delineating a further JORC 2012 compliant inferred (or greater) mineral resource of at least 100 MT of bauxite at 47% Al₂O₃ on Minim Martap Bauxite Project;
2. one third vest on the raising of at least a further \$10,000,000 in support of the Minim Martap Bauxite Project; and
3. one third vest on participant remaining with the Company for a minimum of 12 months from the date of issue.

Name	Performance Rights
David Netherway	5,000,000
Phillip Gallagher	8,000,000
Emmanuel Correia	5,000,000
Total	18,000,000

During the 2019 Financial Year Vesting Condition 1 for the Performance Rights was met and the Company issued 6.0 million shares to the beneficiaries in the proportion noted above.

These performance rights were valued, using a valuation methodology based on the guidelines set out in AASB 2 *Share Based Payments*. The 10 day VWAP was used given the fluctuations in the Company's share price on and around the grant date.

Details of the assumptions used in the valuation of these performance rights issued are as follows:

Assumptions:	
Valuation date	23 November 2019
10 day VWAP	\$0.2266
Indicative value per Performance Right	\$0.2266
- Mr David Netherway	\$1,133,000
- Mr Phillip Gallagher	\$1,812,800
- Mr Emmanuel Correia	\$1,133,000

The value of the Performance Rights is being expensed over the deemed life of the Rights. During the year \$3,534,960 was recognised in relation to the rights.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

16. ISSUED CAPITAL

Issued Capital	2019 \$	2018 \$
----------------	------------	------------

Ordinary shares issued and fully paid	41,462,717	29,353,851
---------------------------------------	------------	------------

Ordinary shares entitle the holder to participate in dividends and in the proceeds and winding up of the Company in proportion to the number of and amounts paid on the shares held.

Movement in Ordinary Shares on Issue	2019 Number	2019 \$	2018 Number	2018 \$
At beginning of year	315,382,988	29,353,851	269,842,773	26,508,395
- Shares issued for cash	32,258,064	5,000,000	-	-
- Performance shares	-	798,820	-	-
- Performance Rights	6,000,000	1,359,600	-	280,800
- Options converted to shares	34,635,417	3,268,125	45,540,215	2,732,413
- Shares issued in lieu of payment	30,000,000	2,040,000	-	-
- Cost of share issues		(357,679)		(167,757)
At end of year	418,276,469	41,462,717	315,382,988¹	29,353,851

Fully paid ordinary shares carry one vote per share and the right to dividends.

¹ Inclusive of 11,000,000 Performance shares which were converted to ordinary shares during the financial year.

Details of unissued ordinary shares in the Company under options are as follows:

Other Equity Securities	2019 Number	2018 Number
Unlisted options exercisable at 7.0 cents expiring 30 September 2018	-	7,000,000
Unlisted options exercisable at 10.0 cents expiring 30 September 2018	-	13,000,000
Unlisted options exercisable at 6.0 cents expiring 30 September 2018	-	4,635,417
Unlisted options exercisable at 12.0 cents expiring 19 February 2019	-	10,000,000
Unlisted options exercisable at 20.0 cents expiring 5 September 2021	5,000,000	-

Options carry no rights to dividends and have no voting rights.

At balance date there were 12,000,000 unvested Performance Rights on issue. Refer to Note 12 for further information on these performance shares

17. RESERVES

	CONSOLIDATED 2019 \$	CONSOLIDATED 2018 \$
Fair value reserve		
Balance at beginning of year	9,641	400
Movement in fair value of equity instruments	1,594	9,241
Balance at end of year	11,235	9,641
Share based payment reserve		
Balance at beginning of year	1,733,250	1,454,199
Shares issued in lieu of payment	1,330,192	-
Options issued to advisors	482,468	-
Vested performance shares	(2,163,420)	(280,800)
Performance shares issued to directors/employees	3,617,930	559,851
Balance at end of year	5,005,420	1,733,250
Foreign currency translation reserve		
Balance at beginning of year	270,832	221,627
Movement in foreign exchange on translation	(129,288)	49,205
Balance at end of year	141,544	270,832
Total	5,153,200	2,013,723

The fair value reserve is used to record increases in fair value of equity investments and decreases to the extent that such decreases relate to an increase on the same asset previously recognised in equity.

The share based payment reserve is used to record the value of equity benefits provided to employees and directors as part of their remuneration. Refer to Note 12 for further information.

The reserve is also used to record the value of options granted to a sponsoring broker as part of the Company's share placements as well as options or shares granted to consultants for services rendered, where the fair value of the services was to be determined by the number of equity instruments to be issued.

The foreign currency translation reserve is used to record exchange differences arising from the translation of the financial statements of foreign subsidiaries.

18. ACCUMULATED LOSSES

	CONSOLIDATED 2019 \$	CONSOLIDATED 2018 \$
Movement in accumulated losses:		
Balance at beginning of year	(28,064,185)	(25,072,314)
Loss for the year	(8,261,236)	(2,991,871)
Balance at end of year	(36,325,421)	(28,064,185)

19. FINANCIAL INSTRUMENTS

The Group's principal financial instruments comprise cash, term deposits, trade payables and trade receivables. These financial instruments arise directly from the Group's operations.

The main risks arising from the Group's financial instruments are cash flow interest rate risk, liquidity risk, foreign exchange risk and credit risk. The Board reviews and agrees policies for managing each of these risks and they are summarised below.

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in Note 1 to the financial statements.

	CONSOLIDATED 2019 \$	CONSOLIDATED 2018 \$
a) Categories of financial instruments		
Financial Assets		
Cash and cash equivalents	2,219,716	2,261,663
Trade and other receivables	13,942	6,825
Equity investment designated as FVOCI	20,714	19,120
Financial Liabilities		
Trade and other payables	837,429	204,262

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

19. FINANCIAL INSTRUMENTS (continued)

b) Interest rate risk

The Group is exposed to interest rate risk due to variable interest being earned on its assets held in cash and cash equivalents.

The Company has no borrowings.

Profile

At the reporting date the interest rate profile of the Group's interest bearing financial instruments was:

	CONSOLIDATED 2019		CONSOLIDATED 2018	
	Carrying amount \$	Interest rate %	Carrying amount \$	Interest rate %
Variable rate instruments				
Cash and bank balances	2,219,716	0.94	2,261,663	0.50

Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points would have increased/(decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables remain constant. The analysis is performed on the same basis for 2018.

	Equity		Profit or Loss	
	100bp Increase \$	100bp Decrease \$	100bp Increase \$	100bp Decrease \$
30 June 2019: Consolidated				
Variable rate instruments	22,197	(22,197)	22,197	(22,197)
30 June 2018: Consolidated				
Variable rate instruments	22,617	(22,617)	22,617	(22,617)

Funds that are not required in the short term are placed on deposit for a period of no more than 6 months at a fixed interest rate. The Group's exposure to interest rate risk and the effective interest rate by maturity is set out below. As the Group has no borrowings its exposure to interest rate movements is limited to the amount of interest income it can potentially earn on surplus cash deposits.

(c) Net fair values

The net fair value of cash and cash equivalents and non-interest bearing monetary financial assets and liabilities approximates their carrying value.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

19. FINANCIAL INSTRUMENTS (continued)

(d) Commodity price risk

The Group's exposure to price risk is minimal.

(e) Credit risk

There are no significant concentrations of credit risk within the Group.

With respect to credit risk arising from the other financial assets of the Company, which comprise cash and cash equivalents, and trade receivables, the Company's exposure to credit risk arises from default of the counter party, with a maximum exposure equal to the carrying amount of these instruments.

Since the Group trades only with recognised third parties, there is no requirement for collateral.

(f) Liquidity risk

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of cash reserves.

The following table details the Group's expected contractual maturity for its financial liabilities:

30 June 2019: Consolidated	Less than 1 month \$	1 to 3 months \$	3 months to 1 year \$	1 to 5 years \$	Total \$
<i>Financial Liabilities</i>					
Non-interest bearing	837,429	-	-	-	837,429
	837,429	-	-	-	837,429
30 June 2018: Consolidated	Less than 1 month \$	1 to 3 months \$	3 months to 1 year \$	1 to 5 years \$	Total \$
<i>Financial Liabilities</i>					
Non-interest bearing	204,262	-	-	-	204,262
	204,262	-	-	-	204,262

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

19. FINANCIAL INSTRUMENTS (continued)

(g) Capital Management

The Group's objectives when managing capital are to safeguard its ability to continue as a going concern, so that it may continue to provide returns for shareholders and benefits for other stakeholders. Due to the nature of the Group's activities, being mineral exploration, it does not have ready access to credit facilities and therefore is not subject to any externally imposed capital requirements, with the primary source of Group funding being equity raisings. Accordingly, the objective of the Group's capital risk management is to balance the current working capital position against the requirements to meet exploration programmes and corporate overheads. This is achieved by maintaining appropriate liquidity to meet anticipated operating requirements, with a view to initiating capital raisings as required.

(h) Foreign currency risk management

The Group undertakes certain transactions denominated in foreign currencies, hence exposures to exchange rate fluctuations arise. The Group has no hedging policy in place to manage those risks however all foreign exchange purchases are settled promptly.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the balance date expressed in Australian dollars are as follows:

	Liabilities		Assets	
	2019 \$	2018 \$	2019 \$	2018 \$
CFA Francs	(367,638)	(141)	21,939	15,517
British pounds	(33,275)	(33,805)	-	-
Euros	(369,354)	(48,244)	-	-
US dollars	-	-	639	1,282

Foreign currency sensitivity analysis

The Group is exposed to CFA Franc (XOF and XAF) British pounds (GBP) Euro (EUR) and US Dollar (USD) currency fluctuations.

The following table details the Group's sensitivity to a 10% increase and decrease in the Australian dollar against the relevant foreign currencies. 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign currency rates. The sensitivity analysis includes external loans as well as loans to foreign operations within the Group where the denomination of the loan is in a currency other than the currency of the lender or the borrower. A positive number indicates an increase in profit or loss and other equity where the Australian Dollar strengthens against the respective currency. For a weakening of the Australian Dollar against the respective currency there would be an equal and opposite impact on the profit or loss and other equity and the balances below would be negative:

Fair value of financial instruments

The Group is disclosing the fair value of financial assets and financial liabilities by level of the following fair value measurement hierarchy:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1)
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (level 2), and
- Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The following table presents the Group's assets and liabilities measured and recognised at fair value at 30 June 2019 and 30 June 2018

Consolidated 30 June 2019	Level 1 \$	Level 2 \$	Level 3 \$	Total \$
Assets				
Equity Investments designated as FVOCI	20,714	-	-	20,714

20. COMMITMENTS

a) Exploration expenditure commitments

	CONSOLIDATED 2019 \$	CONSOLIDATED 2018 \$
Within one year	6,540,494	7,047,918
Later than one year but not later than 5 years	10,736,283	11,138,319
	17,276,776	18,186,237

In order to maintain current rights of tenure to Minim Martap mining permits, the Group has the following discretionary exploration expenditure requirements up until expiry of leases. These obligations, which are subject to renegotiation upon expiry of the leases, are not provided for in the financial statements.

If the Company decides to relinquish certain leases and/or does not meet these obligations, assets recognised in the statement of financial position may require review to determine the appropriateness of carrying values. The sale, transfer or farm-out of exploration rights to third parties will reduce or extinguish these obligations.

21. SEGMENT INFORMATION

The Group is managed primarily on the basis of its exploration projects. Operating segments are therefore determined on the same basis. Reportable segments disclosed are based on aggregating tenements and permits where the tenements and permits are considered to form a single project. This is indicated by:

- having the same ownership structure;
- exploration being focused on the same mineral or type of mineral;
- exploration programs targeting the tenements and permits as a group, indicated by the use of the same exploration team, and shared geological data, knowledge and confidence across the areas; and
- shared mining economic considerations such as mineralisation, metallurgy, marketing, legal, environmental, social and government factors.

Notes to the Consolidated Financial Statements continued

For the Year Ended 30 June 2019

21. SEGMENT INFORMATION (continued)

Basis of accounting for purposes of reporting by operating segments

Accounting policies adopted

Unless stated otherwise, all amounts reported to the Board of Directors as the chief operating decision maker with respect to operating segments are determined in accordance with accounting policies that are consistent to those adopted in the annual financial statements of the Group.

Where an asset is used across multiple segments, the asset is allocated to the segment that receives the majority of economic value from the asset. In the majority of instances, segment assets are clearly identifiable on the basis of their nature and physical location.

Unless indicated otherwise in the segment assets note, investments in financial assets, deferred tax assets and intangible assets have not been allocated to operating segments.

Consolidated Year ended 30 June 2019:	Exploration (Africa) \$	Unallocated \$	Total \$

24. EVENTS SUBSEQUENT TO REPORTING DATE

On 29 July 2019 25,000,000 Fully Paid Ordinary Shares were issued at a price of \$0.16 per share, raising a total of \$4 million before costs.

On 26 September 2019 the Company announced a significant upgrade to the Resource at its 100% owned Minim Martap Bauxite Project (Table 3).

Permit	Inferred			Indicated			Total		
	Mt	Al ₂ O ₃	SiO ₂	Mt	Al ₂ O ₃	SiO ₂	Mt	Al ₂ O ₃	SiO ₂
Minim-Martap	47.5	44.1	3.4	732	45.7	3.1	779	45.6	3.1
Ngaoundal	5.3	41.6	1.0	103	41.7	1.0	108	41.7	1.0
Makan	0.1	45.8	2.7	4.6	47.0	1.6	4.7	46.9	1.6
Total (at 35% Al₂O₃)	53	43.8	3.1	839	45.2	2.8	892	45.1	2.8

Table 3: Minim Martap Project Resource JORC (2012) – Cut-off Grade 35% Al₂O₃

The upgrade included an increase of 62% in the total scale of the Resource and importantly an 850% increase in the Indicated Grade within the Resource.

The Minim Martap Project now has a total resource estimate of 892Mt at 45.1% Al₂O₃, 2.8% SiO₂ (Cut-off Grade 35% Al₂O₃) and includes

- an Indicated Resource of 839Mt at 45.2% Al₂O₃, 2.8% SiO₂ (Cut-off Grade 35% Al₂O₃); and
- a high-grade Indicated Resource of 431Mt at 48.8% Al₂O₃, 2.6% SiO₂. (Cut-off Grade 45% Al₂O₃)

Canyon believes there is still substantial exploration potential at the Minim Martap Project as this resource was calculated on <50% of area.

Other than the above there were no material events subsequent to the balance date.

25. CONTINGENCIES

As part of the farm-in and incorporated joint venture agreement between the Company and Alures Mining Limited, a UK based subsidiary of Altus Strategies Limited ("Altus"), Canyon can earn up to a 75% interest in the Birsok Bauxite Project in Cameroon through the following:

Initial Consideration

A cash payment of \$150,000. (\$150,000 has already been paid)

Earn 51% of the JV Company

Expenditure on the project by Canyon of \$2 million over a five year period, which shall include a minimum of 10,000m of aircore or equivalent expenditure on RC (reverse circulation) or diamond drilling.

Earn 75% of the JV Company

Expenditure on the project by Canyon of an additional \$4 million over a further three year period.

At 75% Altus may elect to contribute and if they elect not to contribute they can be diluted to 10% by the expenditure of an additional \$1.5 million for each 5% interest. If Altus is diluted to 10%, Canyon can elect to buy out the remaining 10% at a value to be determined by an independent valuation.

A 5% net profit from the Birsok Project (Royalty) is held by a third party and Canyon may purchase the Royalty for a cash payment of US\$1 million at any time.

Notes to the Consolidated Financial Statements *continued*

For the Year Ended 30 June 2019

25. Contingencies (continued)

Potential Deferred Consideration

Upon achievement of certain value-adding milestones to the project, Altus Group may earn deferred consideration, as follows:

\$1.5 million of Canyon shares, at a deemed issue price equal to the 45 trading day volume weighted average price of Canyon's ordinary shares trading on ASX ending on the day immediately prior to the date of satisfaction of this milestone, upon the definition of a minimum 150Mt JORC compliant resource with a minimum grade of 45% Al₂O₃ and a maximum of 2% reactive SiO₂ (as opposed to total SiO₂ content); and

\$1.5 million of Canyon shares upon the completion of a feasibility study (to a bankable or definitive level), the grant of a mining lease on the Project, and the completion of a capital raising by Canyon to provide for 100% of Canyon's required capital expenditure to reach first production of bauxite from the Project, to be issued at the same price as that capital raising.

Other than those disclosed above there are no contingencies outstanding at the end of the year.

As stated in Note 11 the Company has entered into an agreement with Altus to terminate the Joint Venture and acquire the Birsok Bauxite Project. This agreement has not yet been finalised however both parties are committed to finalising the matter as soon as all the conditions precedent have been satisfied.

Directors' Declaration

In the opinion of the directors of Canyon Resources Limited (the 'Company'):

- a. the accompanying financial statements and notes are in accordance with the Corporations Act 2001 including:
 - i. giving a true and fair view of the consolidated entity's financial position as at 30 June 2019 and of its performance for the year then ended; and
 - ii. complying with Australian Accounting Standards and Corporations Regulations 2001 professional reporting requirements and other mandatory requirements;
 - b. there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable; and
 - c. the financial statements and notes thereto are in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board.
2. This declaration has been made after receiving the declarations required to be made to the Directors in accordance with Section 295A of the Corporations Act 2001 for the financial year ended 30 June 2019.

This declaration is signed in accordance with a resolution of the Board of Directors.

Phillip Gallagher
Director

Dated this 30 September 2019

INDEPENDENT AUDITOR'S REPORT

To the members of Canyon Resources Limited

Report on the Audit of the Financial Report

Opinion

We have audited the financial report of Canyon Resources Limited ("the Company") and its controlled entities ("the Group"), which comprises the consolidated statement of financial position as at 30 June 2019, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- a) giving a true and fair view of the Group's financial position as at 30 June 2019 and of its financial performance for the year then ended; and
- b) complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants* ("the Code") that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty related to going concern

We draw attention to Note 1.x. in the financial report, which indicates that a material uncertainty exists that may cast significant doubt on the entity's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the *Material uncertainty related to going concern* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key Audit Matter	How our audit addressed the key audit matter
Carrying amount of exploration and evaluation expenditure Note 11 of the financial report	
<p>In accordance with AASB 6 Exploration for and Evaluation of Mineral Resources, the Group capitalises acquisition costs and then expenses further exploration and evaluation expenditure as incurred. The cost model is applied after recognition.</p> <p>Our audit focussed on the Group's assessment of the carrying amount of the capitalised exploration and evaluation asset, as this is one of the most significant assets of the Group.</p>	<ul style="list-style-type: none"> ▪ Our procedures included but were not limited to the following: ▪ We obtained an understanding of the key processes associated with management's review of the carrying values of each area of interest; ▪ We considered the Directors' assessment of potential indicators of impairment; ▪ We obtained evidence that the Group has current rights to tenure of its areas of interest; ▪ We examined the exploration budget for the year ending 30 June 2020 and discussed with management the nature of planned ongoing activities; ▪ We substantiated a sample of exploration and evaluation transactions; and ▪ We examined the disclosures made in the financial report.
Share-based payment transaction in relation acquisition of Minim Martap Project Note 11 of the financial report	
<p>The Company engaged a Consultant to assist it in its negotiations with the Cameroon Government to obtain exploration licences known as the Minim Martap Project ("Project").</p> <p>The Company agreed to pay the consultant a success fee comprised of shares upon the successful granting of the Project to Canyon and the satisfaction of a number of project related milestones.</p> <p>We have considered this to be a key audit matter because share-based payments involve significant judgement and the amount of the share-based payment is material to the financial report.</p>	<p>Our procedures included but were not limited to the following:</p> <ul style="list-style-type: none"> ▪ We reviewed Managements' assessment of the transaction including the probability of achieving vesting conditions; ▪ We reviewed the consultancy agreement; ▪ We considered the requirements of AASB 2 <i>Share-based Payment</i> in relation to the terms and conditions of the grant; and ▪ We considered the requirements of AASB 6 <i>Exploration for and Evaluation of Mineral Resources</i> in particular recognition criteria.

Information other than the financial report and auditor's report thereon

The directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 30 June 2019, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the financial report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial report of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on the Remuneration Report

Opinion on the Remuneration Report

We have audited the Remuneration Report included within the directors' report for the year ended 30 June 2019.

In our opinion, the Remuneration Report of Canyon Resources Limited for the year ended 30 June 2019 complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards
