

TROY RESOURCES LIMITED

# ASX ANNOUNCEMENT

10 October 2019

## SEPTEMBER 2019 QUARTER GOLD PRODUCTION

Troy Resources Limited (**ASX: TRY**) (**Troy** or the **Company**) advises that the Karouni operation in Guyana achieved gold production for the September 2019 Quarter of **10,042 ounces**.

**Gold production for the month of September was 4,395 ounces**, which is 1,395 ounces above forecast.

As per the ASX announcement of 20 September 2019, this wet season has been the heaviest Troy has experienced since acquiring Karouni in 2013.

As a result, access to ore was denied for considerable periods due to the need to pump out pooled water and otherwise deal with unstable ground conditions.

The change of season, the now abating rainfall and access to higher grade ore from the Smarts 3 pit were key factors in the reversion of gold production to more normal levels.

The Company will release its September 2019 Quarterly Report to the market in late October.
