

MyFiziq receives \$666,218 R & D reimbursement

MyFiziq Limited (ASX: MYQ) (MyFiziq) is pleased to provide the following to update shareholders. Through the Australian government R & D tax scheme MYQ has received a \$666,218 reimbursement today. This brings MYQ cash at bank and available funds to \$897,000.

MYQ is expecting further funds in Q4 2019 from ACAM \$1,000,000, receivables of \$676,457 and a further payment of \$500,000 by way of license payment from Body Composition Technologies.

The MyFiziq Mission:

Our mission is to globalize our technology and assist individuals, communities and populations to live better healthier lives by working with governments, healthcare providers and the best health & fitness identities and solutions available worldwide with the data we can provide in the palm of their hands.

Our software as a service solution (SAAS) offering allows flexibility and pricing scale reductions for our partners. MyFiziq partners with highly scaled or scalable new and existing applications and provides them with a deeper insight into the data they wish to retrieve from their users to empower them in their journeys.

Consumers engage daily with multiple needs that require the use or ability to track individual dimensions. Such as dieting, exercising, assessing their health or simply buying clothing online, the result is a drive toward understanding their personal dimensions or the changes they are undergoing. MyFiziq provides that missing link in other ecosystems.

MyFiziq is a patented technology we have developed with a proprietary image capturing system within a consumer's smartphone, we empower a consumer with the ability to create a representation of their structure in the form of a 3D avatar with accurate circumference measurements.

Partners embed our Software Development Kit's (SDK's) into their new or existing applications, and then customize the experience to meet their brand requirements.

MyFiziq has developed this capability by leveraging the power of Computer Vision, Machine Learning and patented algorithms, to process these images on secure, enterprise-level infrastructure, delivering an end-to-end experience that is unrivalled in the industry. Body measurements provide more useful information about physical changes than simply measuring weight. MyFiziq simplifies the collection of these measurements and removes the margin of human error present in traditional methods.
