Disrupting a global industry via digital transformation

The pregnancy experience hasn't changed since the 50's

DOCTORS/ PROVIDERS

- Shortage of fundamental services
- Lack of time and attention
- Low reliability of analysis
- Episodic, Reactive, not connected

EXPECTING MOTHERS

- 14+ clinical sessions per pregnancy
- Loss of time away from work / childcare
- Personal anxiety and stress
- Lack of continuous support

HeraMED Mayo Clinic collaboration

- HeraMED and the Mayo Clinic have joined forces to co-develop a new platform based on the Mayo's Clinic successful and now "standardised" OB Nest program.
- OB Nest is a service model developed to combine traditional prenatal care office visits with connected care visits and in home monitoring.
- The program offers a tailored approach to in-home monitoring of patients leveraging technology and professional health providers expertise.
- HeraMED and Mayo Clinic are currently developing the world's most advanced platform that will deploy Al-algorithms, a combination of digital tools and smart connected devices to assist expecting mothers and healthcare professionals to optimise pregnancy care.
- Both parties will develop the 'Hera' app, which will leverage unrivalled clinical databases combined with proprietary machine learning algorithms enabling better management of pregnancy situations at a lower cost.
- The solution will include professional 24/7 support services with optimised human interaction to ensure best practise.
- The platform is under development and is planned to be deployed during 2020.

MAYO CLINIC'S PRENATAL CARE MODEL

HeraCARE Scalable Recurring Pricing Model

LICENSE fee	HeraBEAT Plus US\$299 / Purchase	HeraCARE PREMIUM US\$69 / Month or US\$199 / Pregnancy	HeraCARE GOLD US\$99 / Month or US\$399 / Pregnancy
Task Based Prenatal Care	NA	Included	Included
Social Support Network	NA	Basic	Enhanced
Patient Education	NA	Basic	Personalized
Midwife consultancy	Working Hours Chat, Hot line limited to 3 calls	Working Hours Chat, Hot line unlimited	24/7 Hot Line/ Chat/Video
Self Monitoring (Connected Devices)	HeraBEAT	HeraBEAT (Rent)	HeraBEAT+ BP + Weight Scale + Urine (Rent)
Points Based Rewards	NA	Basic	Advanced

Defined Cooperation Model

Allows for rapid scalability through partners

- Provide a base service offering to existing clientele on a month to month subscription model ensuring recurring revenue for all parties
- Flexible and Tailored platform for Healthcare providers, commercial telemedicine medical insurance and government reimbursement
- Rev-Share based cooperation model
- HMD to provide all hardware and other equipment
- HMD to integrate platform and provide necessary technical support cloud/software/integration/SDK's on SaaS model
- Local partner provides leadership, management, staff and preliminary funding

Value Proposition

Insurers/ Healthcare **Providers**

- Reduce unnecessary clinic visits
- Empower professionals to be more informed & efficient patient advocates
- Reduce costs
- Strategic advantage and engagement with household decision makers.
- Increase patient satisfaction
- Early detection of complications
- Better clinical outcomes

Employers

- Reduce absence from workplace
- Enhance focus and work engagement during pregnancy
- Reduce costs
- Increasing loyalty among satisfied employees
- Positive positioning as "employee centric" "Innovative" and "Digital"

USA - Prime Opportunity

Digital Pregnancy Care is the next frontier in chronic disease management

COST: \$111 BILLION All payers

With 3.95 million annual births and \$111 billion spent by all payers for pregnancy-related conditions, maternity care represents the secondhighest healthcare expenditure for employers in the United States and the largest for Medicaid

OUTCOMES: POOR Maternal/infant

"Despite this high spend, the U.S. experiences some of the worst maternal infant health outcomes in the developed world

A changing landscape:

"Use smart, connected devices, personalized digital guidance, and 24x7x365 access to health professionals to make it easier for people with chronic conditions to stay healthier

IPO US\$ 355Million @3.4 Billion valuation, July 2019

"Omada works with more than 600 employers and health plans across all 50 states, delivering an integrated experience that adapts to participants' health needs, and personalizes their journeys to create the best health outcome

Raised US\$ 73Million @600 Million valuation, June 2019

US CPT Codes

New CPT codes recently introduced in the US are better suited to reimburse for the realities of current technology and staffing models, potentially the HeraCARE features and modalities will be covered by it

<u>CPT code 99453 - \$19.46 One time:</u>

"Remote monitoring of physiologic parameters, initial; set-up and patient education on use of equipment."

Reimbursement for the work associated with onboarding a new patient onto a remote patient monitoring service, setting up the equipment and educating the patient on using the equipment.

<u>CPT code 99454 - \$64.15 / Monthly:</u>

Remote monitoring of physiologic parameter, initial; device(s) supply with daily recording(s) or programmed alert(s) transmission, each 30" .days." Reimbursement for providing the patient with a device and monitoring the data obtained for a 30-day period Note that this code can be billed each 30 days.

CPT code 99457 - \$51.54 (non-facility) and \$32.44 (facility) / Monthly:

"Remote physiologic monitoring treatment management services, 20 minutes or more of clinical staff/physician/other qualified healthcare professional time in a calendar month requiring interactive communication with the patient/caregiver during the month." Reimbursement for clinical staff time that contributes toward remote patient monitoring, billed per 30-day period to 20 minutes per month.

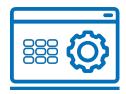

Solution Components

Software and IOT platform for the creation and implementation of digital health solutions for prenatal care management

Hera

The digital pregnancy companion

Prenatal Care Composer

Configurable and flexible prenatal care standards

Care Manager Dashboard

Realtime data driven decision support for connected care

HERA

The Digital Pregnancy Companion

Designed Based On Clinical Research

Hera - 6 Layered Solution

Designed Based On Clinical Research

Task Based Prenatal Care

- Simple to follow daily tasks
- Optimizes user adherence
- Integrated with reminders and incentives

Social Networking

- Community sharing & support
- Reinforcement network
- Relief stress and anxiety

Patient Education

- Rich, personalized knowledge library
- Articles, Blogs, Vlogs and
- Controlled access to the most recent & accurate info

Midwife Consultancy

- 24/7 empathetic interaction
- Human intervention when needed
- Empowered by accurate, relevant and updated patient data

Self Monitoring

- Set of connected, digital health tools
- Optimized for simple home use
- Provides comprehensive pregnancy health trend base analysis

Incentive Program

- Rewards and point-based
- Adds gamification element
- Enhances user engagement

Integrated into a pregnancy companion user experience

HeraCARE - Highlights

Designed Based On Clinical Research

Self monitoring dashboard

24/7 midwife consultancy

Dashboard Driven By Medical Evidence

Care Manager Dashboard

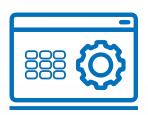

Real-time
data driven
decision support
for connected
care

A professional dashboard enabling real-time data driven decision support providing connected care and secured communication channels

Prenatal Care Composer

A configuration system for Prenatal Care Guidelines

A 40 weeks journey defined by 3 layers of building blocks:

Recommendations	Presented to the user as tasks to complete	
Self-monitoring	Tracking data and measurements (Weight, Blood Pressure, Proteinuria / UTI, Mood, Physical Activity, Nutrition, etc')	
Pregnancy Milestones	Pregnancy education via content quizzes and other interactive formats per relevant weeks	

Configurable and flexible according to country specific medical standards

HeraCARE Triple Aim

The service is offered through health care providers, insurers and employers to their pregnant audience to achieve the triple aim

Cost Reduction

Reduction of both scheduled and unscheduled clinic visits.

Reduction of pregnancy related absence from work.

Increased Satisfaction

Reassurance and peace of mind

Digital personal pregnancy companion

24/7 access to midwife consultants

Dedicated social reinforcement network

Better Outcomes

Stress and depression reduction

Better adherence to prenatal care guidelines

Early detection of potential complications

"An individual's lifetime health and disease is most probably programmed at a very early stage – while a child is still in the womb"

Thank You For Your Time

Appendix 4: Case study Hapvida integration

First commercial deployment outlines validity and opportunity

- Brazil's 3rd. largest medical organization. ±6.5m customers, ±100 hospitals, ±1,000 clinics, ± 220,000 births/annum
- HeraBEAT device and HeraCARE PRO customized platform integrated into Hapvida's EMR in July
- Trial valued at US\$60,000 includes 100 HeraBEAT devices and 2,400 subscription licenses (100 users over 24 month)
- Integration included rigorous technical testing by medical professionals that will trial HeraBEAT and HeraCARE an an alternative to competitors products – existing solutions cost considerably more with less functionality
- Integration allows for seamless data upload and sharing between HeraBEAT and HeraCARE PRO allowing Hapvida professionals to monitor analytics in real time
- 100 HeraBEAT devices now being distributed across Hapvida's network as of today: we're running in 4
 hospitals in Fortaleza, Maracanau and Recife. We have monitored over 500 patients since the beginning of
 its implementation
- Pricing structure will be optimized following initiation of trial allowing HMD to capitalize in the future
- Provides Hapvida the ability to save on device costs, reduce strain on hospitals due to unnecessary visits and optimise patient satisfaction
