

## archTIS signs Australian Criminal Intelligence Commission; first intelligence agency to use Kojensi Gov

- archTIS signs agreement with ACIC for Kojensi Gov use by the National Criminal Intelligence System (NCIS) Program Team
- Procured via the DTA Cloud Marketplace, for an initial 150 users and up to 200 hours of additional services, archTIS expects user numbers to grow
- Kojensi Gov will be used to facilitate secure collaboration across all state, territory and Commonwealth law enforcement, law compliance and regulatory agencies involved in developing the NCIS
- Announcement follows on from the successful sale, and on-boarding of Kojensi Gov, to the Attorney General's Department in September

### ACIC to use Kojensi Gov for NCIS program, for an initial 15-month period

The [Australian Criminal Intelligence Commission](#) (ACIC) will utilise archTIS' certified cloud-based platform, [Kojensi Gov](#), for the program team developing the government's [National Criminal Intelligence System](#) (NCIS). Kojensi Gov will enable NCIS members to share and collaborate, securely, on information needed to create a "truly national, unified picture of criminal activity" across states and territories in Australia.

Finalised through the Digital Transformation Agency's (DTA) Cloud Marketplace for an initial 150 users and up to 200 hours of additional services; the initial maximum contract value is \$235,250. archTIS anticipates user numbers to grow as Kojensi is proven within the NCIS over the 15 month term and two annual extensions.

### Validates applicability of the service to high-security, geographically dispersed agencies

ACIC validates the Kojensi Gov offering due to:

The need for digital collaboration across geographically dispersed agencies and law enforcement personnel

The strict security protocols required as part of the NCIS program

### Second agency to use Cloud Services Panel to procure Kojensi Gov

The agreement was finalised using the Digital Transformation Agency's Cloud Marketplace, formerly Cloud Services Panel. This follows on from Kojensi Gov's addition to the panel earlier this year, and subsequent use for procurement of Kojensi Gov by the Attorney General's Department.

**Daniel Lai, Managing Director of archTIS, said:** *“Kojensi Gov will support the ACIC’s NCIS program and law enforcement agencies to collaborate, securely, to facilitate the development of a unified image of crime in Australia. Partnering with such an important initiative proves the utilisation of Kojensi Gov for secure collaboration between and within agencies. We look forward to working with ACIC, and its partners, and continuing to expand the Kojensi Gov service through government and industry, in Australia and abroad.”*
