Miracle Valley First Crops & Operational Update

Highlights

- Miracle Valley harvests its lawful cannabis crops, cultivated using RotoGro's patented and proprietary Garden Systems;
- Yield and quality of the first crops exceed expectations;
- Preliminary phase two designs and expansion plans to commence in the new year incorporating additional RotoGro Garden Systems and RotoGro's Fertigation System

Roto-Gro World Wide (Canada) Inc., a wholly-owned subsidiary of Roto-Gro International Limited ("ASX:RGI", "RotoGro" or the "Company"), is pleased to announce that Miracle Valley Medical Alternatives M.V.M.A. Ltd. ("Miracle Valley") has harvested its first lawful cannabis crops, cultivated using RotoGro's Rotational Hydroponic Garden Systems. Miracle Valley is very pleased with its first lawful cannabis crops, with the yield and quality of the cannabis plants exceeding their expectations. The RotoGro team continue to work hand in hand with Miracle Valley throughout the cultivation process at its state-of-the-art facility located in British Columbia, Canada. RotoGro is committed to assisting Miracle Valley to achieve these industry-leading results on a consistent basis.

Miracle Valley's Master Grower, Donny Longo, states, "The results we achieved with this first cannabis crop, cultivated using RotoGro's Rotational Hydroponic Garden Systems, are very impressive. The RotoGro Systems produced greater yields than we expected, which is critically important to us, and the quality of the cannabis is exceptional. The RotoGro Systems are truly industry-leading, and we look forward to working with RotoGro to achieve these pleasing results on a continual basis. Miracle Valley is excited to move our collaboration with RotoGro forward to expand our state-of-the-art facility using the RotoGro Systems."

Chief Executive Officer, Adam Clode, states, "We are very excited with the yields and product quality achieved by Miracle Valley with its first harvest. Miracle Valley's master growers have adapted to cultivate on a commercial scale using our RotoGro Rotational Hydroponic Garden

Systems - the results speak for themselves. We will continue to work hand in hand with Miracle Valley to ensure that optimal yields are achieved and to provide ongoing support for nutrient and strain optimisation. In addition, we are excited about Miracle Valley's expansion plans for its second phase of development as we move into the new calendar year. The achievements at Miracle Valley are testament to the exceptional talents of our RotoGro team across innovation, production, growing management and research. Our team continues to drive new sales leads and profitable collaborations to drive future shareholder value."

ROTOGRO

About Roto-Gro International Limited

Roto-Gro International Limited is an Australian-based company with global operations focused on the cultivation of lawful cannabis and perishable food (produce) which take advantage of its proprietary, patented, and patents-pending technology in the stackable rotary hydroponic garden space.

The Company has collaborated with Gibio Inc. and Freshero Pty Ltd. These ventures leverage RotoGro's patented rotational hydroponic garden systems, crop management fertigation hardware and proprietary software systems to produce greater yields and lower operating costs. In addition, the Company has entered into a Share Purchase Agreement to acquire all the issued and outstanding shares in the capital stock of Supra THC Services Inc. which holds a Dealer's License issued by Health Canada for lawful cannabis.

RotoGro's wholly owned subsidiary, Global Fertigation Solutions Inc. ("GFS"), provides a patent-pending specialized business line for water treatment and nutrient management in the viticulture, perishable foods and lawful cannabis space. GFS has successfully provided design solutions, installations and ongoing service contracts for licensed lawful cannabis facilities in the State of Nevada, USA and is embarking on expanding this offering globally.

The Company continues its focus on expanding into industry synergistic opportunities; exploring strategic partnerships in related markets which include, perishable food (produce) partnerships, lawful cannabis license ownership, growing management services, industry leading nutrients, emerging tissue culture (micropropagation) expertise and other supporting faculties of hydroponic growing.
