## Oakum Cannabis Plants First Crops Using RotoGro Systems

### Highlights

- Oakum plants its first cannabis crops using RotoGro's patented and proprietary Garden, Fertigation and iGrow Software Systems;
- Oakum are extremely excited for the yield and quality of their first commercial scale cannabis crops having used the RotoGro Systems for over 12 months;
- Phase two expansion planned for H1 CY2020

Roto-Gro World Wide (Canada) Inc., a wholly-owned subsidiary of Roto-Gro International Limited ("ASX:RGI", "RotoGro" or the "Company"), is pleased to announce that Oakum Cannabis Corporation (formally Frozen Penguin Medical Industries Inc.) ("Oakum") has planted its first cannabis crops using RotoGro's Rotational Hydroponic Garden Systems (the "RotoGro Systems"). Oakum was recently awarded its Health Canada cultivation license and commenced planting its first cannabis crops using the RotoGro Systems. Oakum is extremely excited to begin its commercial operations with the RotoGro Systems to achieve industry-leading results in both quality and yield. RotoGro looks forward to supporting Oakum throughout the cannabis cultivation process at Oakum's state-of-the-art facility located in British Columbia, Canada, and is confident that Oakum will continuously achieve industry-leading results on a consistent basis.

Oakum's lead grower and co-founder, Anthony Charles, states, "We are excited to begin our commercial cultivation operations utilising the RotoGro Systems. We have been using the RotoGro Systems for over 12 months on a small scale for research and testing prior to receiving our Health Canada approved Cultivation License. The planting of our first crops on a commercial scale is very exciting as we look to match and exceed yields in excess of 7 lbs. of dry flower per rotational garden per 60-day growth cycle that we have consistently achieved to date. We are confident, phase one of our commercial operations utilising 48 RotoGro rotational gardens will exceed our expectations – that the RotoGro Systems will be high yielding and produce a superior cannabis product, at the lowest cost per gram."

## ROTOGRO

Chief Executive Officer, Adam Clode, states, “We are excited to continue our working relationship with Oakum as they plant their first crops using the RotoGro Garden, Fertigation and iGrow Software Systems. We are confident that the product quality and yields will be as predicted and exceed Oakum’s expectations. This will only reinforce the superiority of our patented and proprietary technology. Oakum is an exciting company, one with the resources in place to truly be an industry-leading operation. Their knowledge, coupled with the RotoGro systems and expertise, will certainly lead the way in lawful cannabis cultivation in Canada. We will continue to support Oakum as they commence their commercial cannabis operations at their facility in British Columbia, Canada using the RotoGro Systems and look forward to their phase two expansion plans in CY2020.”

## About Roto-Gro International Limited

Roto-Gro International Limited is an Australian-based company with global operations focused on the cultivation of lawful cannabis and perishable food (produce) which take advantage of its proprietary, patented, and patents-pending technology in the stackable rotary hydroponic garden space.

The Company has collaborated with Gibio Inc. and Freshero Pty Ltd. These ventures leverage RotoGro's patented rotational hydroponic garden systems, crop management fertigation hardware and proprietary software systems to produce greater yields and lower operating costs. In addition, the Company has entered into a Share Purchase Agreement to acquire all the issued and outstanding shares in the capital stock of Supra THC Services Inc. which holds a Dealer's License issued by Health Canada for lawful cannabis. The Company has also entered into a Share Purchase Agreement to acquire 51% of the issued and outstanding shares in the capital stock of Medical Compassion Canni Farms Inc. which is a late stage Health Canada cannabis cultivation and processing license applicant.

RotoGro's wholly owned subsidiary, Global Fertigation Solutions Inc. ("GFS"), provides a patent-pending specialized business line for water treatment and nutrient management in the viticulture, perishable foods and lawful cannabis space. GFS has successfully provided design solutions, installations and ongoing service contracts for licensed lawful cannabis facilities in the State of Nevada, USA and is embarking on expanding this offering globally.

The Company continues its focus on expanding into industry synergistic opportunities; exploring strategic partnerships in related markets which include, perishable food (produce) partnerships, lawful cannabis license ownership, growing management services, industry leading nutrients, emerging tissue culture (micropropagation) expertise and other supporting faculties of hydroponic growing.
