

12 November 2019

**DRAGONTAIL ROLLING OUT ITS FULL ALGO PLATFORM
IN PH'S LARGEST EUROPEAN MARKET - THE UK**

Highlights

- **A nationwide rollout of the Algo platform into all Pizza Hut stores is taking place across the UK.**
- **The deployment of the Algo in the UK follows complete nationwide installations in Canada, Singapore and ongoing installations in Pizza Hut Australia.**
- **This new win takes contracted stores to 3,814, up from 2,191 in Q4/18.**

12 November 2019 (Australia): **Dragontail Systems Limited** (ASX: DTS, the “**Company**” or “**Dragontail**”) is pleased to announce that it has gone live with its Algo Platform in the first Pizza Hut stores in the UK over the last two weeks, with the intention to complete a nationwide rollout early next year.

The Algo platform is an optimization algorithm that streamlines, enhances and manages the entire restaurant order and delivery process, designed to improve operational efficiency, reduce costs, increase revenue, enhance management control and deliver a significant ROI.

The roll out of Dragontail's Algo platform in Pizza Hut stores in the UK is the first nationwide rollout in a large European country.

The Pizza Hut UK rollout represents another customer aiming for a nationwide deployment, following Singapore, Canada and Australia.

Following this contract win, the number of contracted stores has increased to 3,814, up from 2,191 in Q4/18.

- END -

About Dragontail Systems

Dragontail is revolutionising the Quick Service Restaurant (QSR) and foodservice industry with its Algo Platform and computer-vision QT quality system that uses artificial intelligence (AI) machine learning.

The Algo Platform uses a sophisticated patented algorithm to optimise and manage the entire food preparation process from order to delivery. It is the first system in the world to fully automate and streamline the kitchen flow to deliver an immediate and significant return on investment to fast food and quick service restaurants.

The QT system's sensor and camera automatically monitor the preparation and cooking process in the kitchen to improve the quality and consistency of meals. Using proprietary patented advanced AI machine-learning technology, the system keeps improving its diagnostics, becoming even more efficient.
