1. Details of the Offers

1.1 Entitlement Offer

The Company is making a non-renounceable pro-rata offer of:

- (a) ordinary fully paid Shares at an issue price of \$0.0065 each to Eligible Shareholders on the basis of one new Share for every ten Shares held at 5.00pm on the Record Date; and
- (b) free-attaching Quoted Options on the basis of one Quoted Option for every four new Shares issued under to Eligible Shareholders.

The market price of Shares at the date of this Prospectus is such that it is unlikely that any of the existing Options will be exercised before the Record Date. On the basis that no existing Options are exercised prior to the Record Date, the Entitlement Offer is for a maximum of 102,115,978 Shares, to raise up to approximately \$660,000 (before costs).

Where the determination of the Entitlement of any Eligible Shareholder results in a fraction of a Share, such fraction will be rounded up to the nearest whole Share.

A summary of the rights and liabilities attaching to the Shares offered under the Entitlement Offer is in Section 5.1.

A summary of the rights and liabilities attaching to the Quoted Options offered under the Entitlement Offer is in Section 5.2. All Shares issued upon the exercise of the Quoted Options will rank equally with the Shares on issue at the date of the Prospectus, as summarised in Section 5.1.

1.2 Shortfall Offer

Any Entitlements not taken up pursuant to the Entitlement Offer will form the Shortfall Offer.

The Shortfall Offer is a separate offer made pursuant to this Prospectus. The issue price of Shares offered under the Shortfall Offer will be \$0.0065 each, which is the issue price at which Shares have been offered to Eligible Shareholders under the Entitlement Offer. Participants in the Shortfall Offer will also be issued with one free-attaching Quoted Option for every four Shares subscribed for and issued under the Shortfall Offer.

Shortfall Securities will only be issued if the Entitlement Offer is undersubscribed and will only be issued to the extent necessary to make up any shortfall in subscriptions.

The Directors reserve the right to issue Shortfall Securities at their absolute discretion. If the Entitlement Offer is oversubscribed (by take up of Entitlements and applications for Shortfall Securities by Eligible Shareholders), scale back will be applied to applications under the Shortfall Offer on a pro-rata basis to the respective shareholdings of Eligible Shareholders. There is no guarantee that Eligible Shareholders will receive Securities applied for under the Shortfall Offer.

No Shares will be issued to an Applicant under this Prospectus or via the Shortfall Offer if the issue of Shares would contravene the takeover prohibition in section 606 of the Corporations Act. Similarly, no Securities will be issued via the Shortfall Offer to any related parties of the Company unless prior Shareholder approval is received.

A summary of the rights and liabilities attaching to the Shares offered under the Shortfall Offer is in Section 5.1.

A summary of the rights and liabilities attaching to the Quoted Options offered under the Shortfall Offer is in Section 5.2. All Shares issued upon the exercise of the Quoted Options will rank equally with the Shares on issue at the date of the Prospectus, as summarised in Section 5.1.

1.3 Placement and Placement Options Offer

As announced on 8 November 2019, the Company issued a total of 127,344,683 Shares at \$0.0065 per Share to institutional and sophisticated investors, none of whom is a related party of the Company (**Placement Subscribers**), to raise \$827,000 (before costs) (**Placement**). As the issue of the Shares under the Placement occurred prior to the Record Date, the Placement Subscribers who are Eligible Shareholders are entitled to participate in the Entitlement Offer.

The Placement Subscribers are also entitled to be issued one free-attaching Quoted Option for every four Shares subscribed for and issued under the Placement (**Placement Options**). The offer of up to 38,566,940 Placement Options to the Placement Subscribers is made pursuant to this Prospectus (**Placement Options Offer**).

The Placement Options Offer includes 961,538 Quoted Options to James Walker and 5,769,231 Quoted Options to Paul Evans, both Directors of the Company, on the assumption that Shareholder approval is received at the Company's annual general meeting on 29 November 2019 for their participation in the Director Placement.

The Company also intends to seek Shareholder approval at its annual general meeting on 29 November 2019 for the issue of up to 31,730,769 Quoted Options to the Placement Subscribers. In the event the requisite approval is not provided, the Company intends to issue the Placement Options using its placement capacity under Listing Rule 7.1.

A summary of the rights and liabilities attaching to the Placement Options is in Section 5.2. All Shares issued upon the exercise of the Placement Options will rank equally with the Shares on issue at the date of the Prospectus, as summarised in Section 5.1.

1.4 Use of funds

Completion of the Offers will result in an increase in cash at hand of approximately \$660,000 (before payment of costs), on the assumption that the Offers are fully subscribed.

The following indicative table sets out the proposed use of funds raised under the Offers:

Proposed use	\$	%
Additional human resources	395,306	59.89%
Technology research & development	100,332	15.20%
Advertising & marketing	80,265	12.16%

Proposed use	\$	%
Costs of the Offers	54,844	8.31%
General working capital ¹	29,253	4.43%
Total	660,000	100.00

Notes:

1. Working capital includes but is not limited to corporate office, administration, staff and operating costs, directors' fees, executive fees, ASX and share registry fees, legal, tax and audit fees, insurance and travel costs.
2. The above table is based on the assumption that the Offers are fully subscribed. If the Offers are not fully subscribed, the Company intends to scale back its proposed use of funds by reducing the expenditure undertaken on additional human resources and advertising and marketing.

The above is a statement of current intentions at the date of this Prospectus. Intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way the funds are applied on this basis.

The amounts and timing of the actual expenditures and investments may vary significantly and will depend on numerous factors including the success of exploration activities, access conditions, weather and any changes in the business and economic environment.

1.5 Opening and Closing Dates

For the Entitlement Offer and Placement Options Offer, the Company will accept Application Forms from the date it dispatches the Prospectus until 5.00pm on 2 December 2019 or such other date as the Directors in their absolute discretion shall determine, subject to the requirements of the Listing Rules (**Closing Date**).

The Shortfall Offer will remain open for a period of up to three months from the Closing Date (or such shorter period as determined by the Directors), however Eligible Shareholders who wish to participate in the Shortfall Offer must submit their Applications to the Company by no later than the Closing Date.

1.6 Minimum subscription

There is no minimum subscription for the Offers.

1.7 Underwriting

The Offers are not underwritten.

1.8 Effect on control of the Company

(a) Summary

The total number of Shares proposed to be issued under the Offers is 102,115,978 which will constitute 9.1% of the Shares on issue following completion of the Offers (assuming no other Shares are issued or Securities exercised or converted to Shares prior to the Record Date).

The Company is of the view that the Offers will not affect the control (as defined by section 50AA of the Corporations Act) of the Company.

No nominee has been appointed for Ineligible Foreign Shareholders under section 615 of the Corporations Act and, as such, Eligible Shareholders will not be able to rely on the exception for rights issues in item 10 of section 611 of the Corporations Act. Accordingly, when an Eligible Shareholder applies for some or all of their Entitlement, they must have regard to section 606 of the Corporations Act. Eligible Shareholders who may be at risk of exceeding the 20% voting power threshold in section 606 as a result of acceptance of their Entitlement should seek professional advice before completing and returning their Application Form.

(b) Majority Shareholder

The Company's largest Shareholder is Dean Taylor, the Company's Managing Director. Mr Taylor currently has a voting power in the Company of 8.4%.

In the unlikely event that Mr Taylor is the only participant in the Entitlement Offer and subscribes for his Entitlement in full (comprised of 8,536,943 Shares and 2,134,236 Quoted Options), his voting power would increase to 9.1%.

The Company will not issue Securities to Mr Taylor under the Shortfall unless prior Shareholder approval is obtained.

(c) Other Shareholders

No Shareholder's voting power in the Company may increase to 20% or above as a result of the Offers.

1.9 Potential dilution

Shareholders should note that if they do not participate in the Offers, their holdings are likely to be diluted (as compared to their holdings and number of Shares on issue as at the date of the Prospectus). Examples of how the dilution may impact Shareholders are set out in the table below:

Holder	Holding as at Record Date	% at Record Date	Entitlement to Shares	Shareholding if Entitlement not subscribed	% post Offer
Shareholder 1	45,000,000	4.41%	4,500,000	45,000,000	4.01%
Shareholder 2	22,500,000	2.20%	2,250,000	22,500,000	2.00%
Shareholder 3	11,250,000	1.10%	1,125,000	11,250,000	1.00%
Shareholder 4	5,625,000	0.55%	562,500	5,625,000	0.50%
Shareholder 5	2,812,500	0.28%	281,250	2,812,500	0.25%

The dilution effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted are placed under the Shortfall Offer. In the event all Entitlements are not accepted and some or all of the resulting Shortfall is not subsequently placed, the dilution effect for each Shareholder not accepting their Entitlement would be a lesser percentage.

The above table also assumes that no Shares are issued other than those offered pursuant to this Prospectus, including by exercise of the Quoted Options issued pursuant to this Prospectus.

1.10 Substantial Shareholders

Based on information known to the Company as at the date of this Prospectus, those persons which together with their associates have a voting power in 5% or more of the Shares on issue are set out below:

Substantial Shareholder	Number of Shares	Voting power
Dean Taylor	85,369,434	8.4%

1.11 No rights trading

The rights to Securities under the Entitlement Offer are non-renounceable. Accordingly, there will be no trading of rights on ASX and you may not dispose of your Entitlement to any other party. If you do not take up your Entitlement by the Closing Date, your Entitlement will lapse.

1.12 Issue Date and dispatch

All Securities under the Offers are expected to be issued on or before the date specified in the proposed timetable in this Prospectus.

Security holder statements will be dispatched at the end of the calendar month following the issue of the Securities under the Offers.

1.13 Application Monies held on trust

All Application Monies received for the Securities under the Offers will be held on trust in a bank account maintained solely for the purpose of depositing Application Monies received pursuant to this Prospectus until the Securities are issued. All Application Monies will be returned (without interest) if the Securities are not issued.

1.14 ASX quotation

Application has been or will be made for the official quotation of the Securities offered by this Prospectus. If permission is not granted by ASX for the official quotation of the Securities offered by this Prospectus within three months after the date of this Prospectus (or such period as the ASX allows), the Company will repay, as soon as practicable, without interest, all Application Monies received pursuant to this Prospectus.

1.15 CHESS

The Company participates in the Clearing House Electronic Sub-Register System, known as CHESS. ASX Settlement Pty Limited, a wholly owned subsidiary of ASX,

operates CHESS in accordance with the Listing Rules and the ASX Settlement Operating Rules.

Under CHESS, Applicants will not receive a certificate but will receive a statement of their holding of Shares.

If you are broker sponsored, ASX Settlement Pty Limited will send you a CHESS statement.

The CHESS statement will specify the number of Shares issued under this Prospectus, provide details of your holder identification number, the participant identification number of the sponsor and the terms and conditions applicable to the Shares, including a notice to exercise the Shares.

If you are registered on the Issuer Sponsored sub-register, your statement will be dispatched by the Company's share registry and will contain the number of Securities issued to you under this Prospectus and your security holder reference number.

A CHESS statement or Issuer Sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their Shareholding changes. Shareholders may request a statement at any other time; however, a charge may be made for additional statements.

1.16 Ineligible Foreign Shareholders

This Prospectus, and any accompanying Application Form, do not, and is not intended to, constitute an offer of Securities in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus or the Securities under the Offers.

The distribution of this Prospectus in jurisdictions outside Australia may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

The Company believes that it is unreasonable to extend the Entitlement Offer to Ineligible Foreign Shareholders. The Company has formed this view having considered:

- (a) the number and value of the Securities that would be offered to those Shareholders; and
- (b) the cost of complying with the legal requirements and the requirements of regulatory authorities in the overseas jurisdictions.

Accordingly, Ineligible Foreign Shareholders will not be entitled to participate in the Entitlement Offer.

The Shares are not being offered to the public within New Zealand other than to existing Shareholders of the Company with registered addresses in New Zealand to whom the offer of these Securities is being made in reliance on the transitional provisions of the *Financial Markets Conduct Act 2013* (New Zealand) and the *Financial Markets Conduct (Incidental Offers) Exemption Notice 2016* (New Zealand). This Prospectus has been prepared in compliance with Australian law and has not been registered, filed with or approved by any New Zealand regulatory authority. This document is not a product disclosure statement under New Zealand law and is not required to, and may not, contain all the information that a product disclosure statement under New Zealand law is required to contain.

1.17 Notice to nominees and custodians

Nominees and custodians that hold Shares should note that the Entitlement Offer is available only to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as a nominee or the identity or residence of any beneficial owners of Shares. If any nominee or custodian is acting on behalf of a foreign person, that holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Offer is compatible with applicable foreign laws.

1.18 Risk factors

An investment in Securities should be regarded as speculative. In addition to the general risks applicable to all investments in listed securities, there are certain specific risks associated with an investment in the Company which are detailed in Section 4.

1.19 Taxation implications

The Directors do not consider it appropriate to give Applicants advice regarding the taxation consequences of subscribing for Securities under this Prospectus.

The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to Applicants. As a result, Applicants should consult their professional tax adviser in connection with subscribing for Securities under this Prospectus.

Basis of Preparation

The pro forma balance sheet has been prepared on a going concern basis, which contemplates the continuity of normal business activity and the realisation of assets and settlement of liabilities in the normal course of business.

The pro forma statement of financial position is based on the audited financial position as at 30 June 2019 and is adjusted to reflect the following assumptions:

- the placement of 127,344,683 shares at \$0.0065 per Share to sophisticated investors completed on 8 November 2019;
- the Offers are fully subscribed and \$660,000 is raised by the issue of 102,115,978 Shares at \$0.0065 per Share; and
- the costs of the Offer are approximately \$54,844.

Other than in the ordinary course of business or as described above and the Placement (as announced to ASX on 25 October 2019), there have been no other material changes to the Company's financial position between 30 June 2019 and the date of this Prospectus.

The pro forma balance sheet does not include the Director Placement (up to \$175,000), on the basis that this remains subject to the receipt of prior Shareholder approval.

3.3 Market price of Shares

The highest and lowest closing market sale prices of the Shares on ASX during the three months immediately preceding the date of lodgement of this Prospectus with ASIC and the respective dates of those sales were:

Highest:	\$0.008 on 20, 23 September and 1, 5 November 2019
Lowest:	\$0.006 on 9, 10, 11, 25 September and 16 and 29 October 2019

The latest available market sale price of the Shares on ASX prior to the date of lodgement of this Prospectus with ASIC was \$0.007 per Share on 11 November 2019.

4. Risk Factors

Activities in the Company and its controlled entities, as in any business, are subject to risks, which may impact on the Company's future performance. The Company and its controlled entities have implemented appropriate strategies, actions, systems and safeguards for known risks; however, some are outside its control.

The Directors consider that the following summary, which is not exhaustive, represents some of the major risk factors which Shareholders need to be aware of in evaluating the Company's business and risks of increasing your investment in the Company. Shareholders should carefully consider the following factors in addition to the other information presented in this Prospectus.

The principal risks include, but are not limited to, the following:

4.1 Risks specific to the Company

(a) Limited operating history

The Company has a short operating history and the unproven long-term potential of its business model makes any evaluation of the businesses or its prospects difficult.

No assurances can be given that the Company will achieve ongoing commercial viability through the successful acquisition and retention of customers and implementation of its business plans in respect of the Company.

The Directors consider that the recent acquisition of Wine Depot will complement the Company's existing platform and sales channels and provide an opportunity to streamline many facets of the merged business. However, there are risks with the acquisition of any new business and there is no certainty that the benefits of the acquisition will be as anticipated.

(b) Development and marketing of the Wine Depot Platform

The Company has recently launched Wine Depot, a cloud-based integrated trading, order management and logistics platform (**Platform**). Through the Platform the Company offers a range of services.

The success of the Company depends upon the Company's ability to continue to commercialise the Platform. A failure to successfully commercialise the Platform could lead to a loss of opportunities and adversely impact on the Company's operating results and financial position. The global marketplace for most products and services is ever changing due to new technology, changes in consumer preferences, changes in regulation and other factors influencing market acceptance or market rejection. This market volatility and risk exists despite the best endeavours of market research, promotion and sales and licensing campaigns. The Company is seeking to mitigate this risk by offering a variety of services through its platform and also targeting a more than one segment of the wine market, however there is a material risk that the Platform is not accepted by the market which could adversely impact the Company's operations.

(c) Additional requirements for capital

The Company's ability to effectively implement its business and operations plans in the future, to take advantage of opportunities for acquisitions or other business opportunities and to meet any unanticipated liabilities or expenses which the Company may incur may depend in part on its ability to raise additional funds.

Further funding is likely to be required by the Company to support its ongoing activities and operations beyond June 2020, including the need to enhance the Platform and enhance its operating infrastructure.

The Board believes its available cash and maximum net proceeds under the Offer and the Director Placement should be sufficient to fund the Company's activities until approximately June 2020.

The Company may seek to raise further funds through equity or debt financing or other means. Failure to obtain sufficient financing for the Company's activities and future projects may result in delay and indefinite postponement of development. There can be no assurance that additional finance will be available when needed or, if available, the terms of the financing might not be favourable to the Company and might involve substantial dilution to Shareholders.

Loan agreements and other financing rearrangements such as debt facilities, convertible note issue and finance leases (and any related guarantee and security) that may be entered into by the Company may contain covenants, undertakings and other provisions which, if breached, may entitle lenders to accelerate repayment of loans and there is no assurance that the Company would be able to repay such loans in the event of an acceleration. Enforcement of any security granted by the Company or default under a finance lease could also result in the loss of assets.

(d) Contractual risk

The Company is party to various third-party logistics contracts. Whilst the Company will have various contractual rights in the event of non-compliance by a contracting party, no assurance can be given that all contracts to which the Company is a party will be fully performed by all contracting parties. Additionally, no assurance can be given that if a contracting party does not comply with any contractual provision, the Company will be successful in enforcing compliance.

There is no guarantee that the Company's contracts will be renewed upon expiry. If the Company's contracts are not renewed then it will need to seek new logistics contracts which could be costly and may not result in a suitable new contract being obtained.

Further as part of the Company's usual commercial agreements for the Wine Depot Platform, the Company provides services on an as required basis and there are no minimum fees or expected volumes set. It is therefore possible that no material revenue is realised from any particular commercial agreement.

(e) Competition risk

There is significant competition in the wine industry generally. The Company competes with a range of incumbent businesses, which creates a high barrier

to entry for new participants. There is no assurance that new and or existing competitors will not succeed in developing platforms or distribution networks that are more effective or economic than those developed by the Company, or which would render the Wine Depot Platform obsolete and/or otherwise uncompetitive.

The large number of market participants can complicate customers' discrimination between competitors, increasing the difficulty of achieving market share and revenue. The Company may be unable to compete successfully against future competitors where aggressive policies are employed to capture market share. Such competition could result in price reductions for products and services, reduced gross margins and loss of market share, any of which could materially adversely affect the Company's future business, operating results and financial position.

There is also the potential for significant consolidation in the Company's targeted market, resulting in a fewer number of competitors each having greater financial and other resources. Any such consolidation could also adversely affect the Company's ability to gain market share and commercialise its sales platforms.

(f) Staffing and reliance on key management

The responsibility of successfully implementing the Company's development and commercialisation strategy depends substantially on its senior management and its key personnel. There can be no assurance that there will be no detrimental impact on the Company if one or more of these employees cease their employment with the Company. There is also a risk to the business where there is a turnover of development staff that have knowledge of the technology and business. This loss of knowledge could result in leakage or misappropriation of confidential information. Whilst the Company aims to mitigate this risk by imposing contractual restraints on use and ownership of the Company's confidential information, there could also be increased costs for the Company in having to replace the implicit knowledge and skills of departing employees.

(g) Supply risk

Wine is an agricultural product. As a consequence, wine is exposed to normal agriculture risks associated with the environment, including weather, force majeure events and disease associated with crops. To the extent that such agricultural factors adversely impact the quality and quantity of ingredients available for the production of wine, the Company's suppliers may have difficulty in securing a stable supply of such ingredients, adversely affecting their need to use the Platform.

To mitigate this risk, the Company intends to diversify the type and range of products distributed through its Platform to other alcoholic beverages. It also intends to work with a wide number of different suppliers located in a number of different jurisdictions, both domestically and internationally

The Company may pursue a strategy that forms strategic business relationships with other organisations in relation to the supply of current and potential products, distribution channels and points of sale. There can be no assurance that the Company will be able to attract and retain such organisations and to negotiate appropriate terms and conditions with these organisations or that any potential agreements with such organisations will be complied with.

(h) Foreign legal systems and operating risks

Some of the Company's business operations are conducted in Asia. Accordingly, a portion of the Company's results of operations, financial condition and prospects are dependent on economic, political and legal developments in overseas jurisdictions.

The Company's operations in foreign jurisdictions are governed by foreign laws and regulations. The introduction of new laws, changes to existing laws and the interpretation or application thereof or the delays in obtaining approvals from the relevant authorities may have an adverse impact on the Company's operations.

(i) Foreign exchange risk

Some of the Company's costs and expenses are denominated in RMB, or a USD equivalent thereof. Accordingly, the depreciation and/or the application of the RMB relative to the Australian dollar would result in a translation loss on consolidation which is taken directly to shareholder equity.

In addition, the reporting currency of the Company's financial reports is denominated in Australian currency. Any depreciation of the RMB relative to the Australian currency may result in lower than anticipated revenue, profits and earnings. The Company will be affected on an ongoing basis. Any change in the ability to convert RMB to Australian dollars or other foreign currency due to currency control may have an adverse effect on the financials of the Company from time to time.

(j) Third party logistics and warehousing

The Company relies upon third party logistic providers for its operations. International freight forwarders are also used to transport wine to other countries. As a consequence, there are risks associated with the delivery of wine via the freight forwarder that the goods may be damaged or not arrive as expected. Additionally, domestic logistic providers may also under-perform or not perform on the delivery of the goods to the Company's clients.

The management and performance of the warehouse used by the Company is also partially dependent on the third parties and there are risks associated with their performance.

(k) Inventory

Pursuant to the Company's third-party logistics contracts, the Company does not own the inventory it stores and instead holds its on consignment at the risk of the owner.

There is a risk that third-parties could claims damages against the Company if inventory is damaged, lost or stolen while in the Company's custody and the Company is found to be negligent in its actions.

(l) Wine Taxation

The making, importation and selling by wholesale of wine is subject to taxation by the Australian government. The amount of taxation applied significantly effects the Company's business.

There is a risk that the Australian government may increase or modify the taxation applied to the making, importation and selling of wine.

If the taxation regime is to change, this may affect the trading conditions of the wine market and the Company's performance and revenue.

4.2 Risks relating to the Company's technology

(a) Cloud-based Platform

The usability of the Company's Platform depends upon various factors outside the control of the Company including (but not limited to) device operating systems, mobile device design and operation and platform provider standards.

The Company has developed its Platform for use across a number of internet access platforms, mobile and desktop devices and software operating systems.

The Company will be dependent on the ability of its Platform to operate on such platforms, devices and operating systems however it cannot control the maintenance, upkeep and continued supply of effective service from external suppliers in these areas. Any changes in such platforms, operating systems or devices that adversely affect the functionality of the Company's Platform or give preferential treatment to competitive products could adversely affect usage of the Company's products.

(b) Reliance on access to the internet

The Company depends on the ability for customers, staff and management to access the internet. Access is provided by various classes of entities in the broadband and internet access marketplace. Should any of these entities disrupt, restrict or affect the cost of access to the Company, usage of the Platform may be negatively impacted.

The performance of the internet and its acceptance as a business tool have been harmed by "viruses," "worms" and similar malicious programs, and the internet has experienced a variety of outages and other delays as a result of damage to portions of its infrastructure. If for any reason the internet does not remain a widespread communications medium and commercial platform, the demand for the Platform would be significantly reduced, which would harm its business.

(c) Brand establishment and maintenance

The Company believes that establishing and maintaining the Company's brands is important to growing its customer base and product acceptance. This will depend largely on the Company's ability to provide innovative product and service within expected service levels. The actions of external industry participants may affect the brand if customers do not have a positive experience using the Platform. If the Company fails to successfully establish and maintain its brand its business and operating results could be adversely affected.

(d) Marketing and sales success

The Company is focusing on marketing and sales to fully commercialise the Platform. By its nature, there is no guarantee that the Company's marketing

campaign will be successful and convert into new users for the Company. In the event that it is not successful, the Company may encounter difficulty in bringing the Platform to market and creating awareness of the Company brand. This would likely have an adverse impact on the Company's sales and profitability.

Even if the Company does successfully commercialise the Platform, there is a risk that the Company will not achieve a commercial return. The Company may not be able to make sufficient revenues to cover its operating and capital costs, or new technology may overtake the Company's technology.

(e) Attracting customers to the Platform

The Company's revenues are affected by its ability to attract paying customers to register to use the Company Platform. Various factors can affect the level of customer engagement, including:

- (i) Marketing and promotions: If the Company's marketing and promotion efforts are not effective this may result in less users visiting the website and registering to use the Platform.
- (ii) Brand damage: If the Company or the Company suffers reputational damage, customer engagement could be affected.
- (iii) Search engine traffic: Traffic to the Company website will be driven in significant amounts by Internet search engines, such as Google. Should these search engines make changes to their algorithms and procedures that direct this traffic, the Company could see a substantial drop in customers that visit the Company website. For example, search engines regularly update their algorithms that determine the ranking of results it returns for any given search term. The Company will attempt to follow relevant search engine guidelines and online best practice to maintain the flow of traffic to the Company website, but such changes could adversely affect the traffic to the website.

A decline in traffic to the Company website could lead to a decline in the number of customers registering to use the Platform, which in turn may affect the Company's profitability.

(f) User experience

The Company's business model is based on revenue arising from paying customers using services offered via the Platform. Poor user experience may affect customer take-up, retention and level of usage of the Platform. Factors which may contribute to poor customer experience include:

- (i) ease of opening and configuring an account;
- (ii) ease of entering, processing and tracking orders;
- (iii) the accuracy and speed of delivery; and
- (iv) level of customer support provided.

Poor customer service experiences may result if the Company does not have sufficient numbers of customer service personnel, fails to provide adequate training and resources for customer service personnel or there is a disruption

to monitoring and account management systems utilised by customer service personnel.

Poor experiences may result in the loss of customers, adverse publicity, litigation, regulatory enquiries and customers reducing the use of the Platform. If any of these occur, it may adversely impact the Company's revenues.

(g) Operating system changes

The Company uses third party operating systems with the providers of these systems regularly updating their systems. It is possible when these updates occur it could cause some of the Company's product to not operate as efficiently as before. This will require the Company to change the code on its system which may take some time to remedy.

(h) Software risk

A number of the Company's products and possible future products contain or will contain open source software, and the Company licenses some of its software through open source projects, which may pose particular risks to its proprietary software and products in a manner that could have a negative effect on its business.

The Company will utilise open source software in a number of its products and will use open source software in the future. The terms of many open source licenses to which the Company will be subject have not been interpreted by Australian or foreign courts, and there is a risk that open source software licenses could be construed in a manner that imposes unanticipated conditions or restrictions on the Company's ability to provide or distribute its products.

(i) Software integrations risk

One of the Company's focuses as part of Wine Depot is developing integrations between its Platform and 3rd party software applications. There is a risk that the integration between the Platform and certain 3rd party software applications may not be readily achievable. Where integration is complex this could result in an increase in costs for the Company or affect the number of third parties that are able to utilise the Company's Platform.

(j) Payment processor distribution or availability

The Company Platform utilises multiple payment gateways to collect payment from customers. If these payment gateways suffer outages or they cease to offer their services to the Company, this will affect the Company's ability to receive payments.

Inability to accept payments even for a short period of time, could negatively impact upon the Company's revenues and its ability to grow.

(k) Internet law and website availability

China's internet law and website availability in China is determined by the Chinese government. Access to websites can be removed at the sole discretion of the Chinese government.

A decision to block the Company website by the Chinese government even if resolved after a short period of time, will negatively impact upon the Company's revenues and its ability to grow.

(l) Protection of the Company's intellectual property rights

The Company's intellectual property rights are valuable, and any inability to protect them could reduce the value of its Platform, products and brand.

The Company has trade secrets and other intellectual property rights that are important assets. The Company may therefore rely on a combination of confidentiality and license agreements with its consultants and third parties with whom it has relationships, as well as domain name, trade secret and copyright, to protect its brand and other intellectual property rights.

The Company does not currently have any patent protection of its intellectual property and it is not yet known whether it will be in fact possible to obtain any patent protection of its intellectual property.

If the Company fails to protect its intellectual property, competitors may gain access to its technology which could harm the business.

(m) Infringement of third party intellectual property rights or restraints of trade

If a third party accuses the Company of infringing its intellectual property rights or if a third party commences litigation against the Company for the infringement of patent or other intellectual property rights, the Company may incur significant costs in defending such action, whether or not it ultimately prevails. Typically, patent litigation is expensive. Costs that the Company incurs in defending third party infringement actions would also include diversion of management's and technical personnel's time.

Similarly, parties may from time to time accuse the Company or its personnel or contractors of contravening restraint of trade or non-compete contractual obligations, or commence legal action against the Company for claims of such nature.

(n) The Platform may contain programming errors, which could harm its brand and operating results

The Platform contains complicated programming and its objectives are to quickly develop and launch new and innovative products and features. The Platform may therefore contain now or in the future, errors, bugs or vulnerabilities. Any errors, bugs or vulnerabilities discovered could result in (among other consequences) damage to the Company's brand, loss of customers, loss of platform partners, fall in revenues or liability for damages, any of which could adversely affect the Company's business and operating results.

(o) Reliance on third party providers

The Company will rely on third party providers and internet search engines (amongst other facilities) to direct customers to the Platform.

Should the Company's brand or its products fail to attract a high level of internet search ranking, direction of customers to its products could be limited and its business and operating results could be adversely affected.

The Company relies on mobile app marketplaces, such as iTunes and Android, to facilitate downloads of the Platform. Should any operators of Apps platforms utilised by the Company make changes to limit or make more difficult for access to its products, the Company's business and operating results may be affected. The Company's search result rankings is outside of its control and competitors' search engine procedures may result in their websites or Apps receiving a higher search result ranking. Reduced numbers of potential customers directed to the Company's products could adversely affect its business and operating results.

(p) Changes in technology

The Company's success will depend, in part, on its ability to expand its products and grow its business in response to changing technologies.

For example as announced by the Company on 24 April 2018, the Company is investigating the use of distributed ledger blockchain based technology as part of its existing platform and business model.

Failure to continue to expand its products and grow in response to changing technologies so may impact the success of the Company.

Further, the cost of responding to changing technologies is unpredictable and may impact the Company's profitability or, if such cost is prohibitive, may reduce the Company's capacity to expand or maintain its business. The Company will seek to offset such costs where possible through applications for the research and development tax concession. However, these concessions are available in only limited circumstances and, even where the Company makes a claim which it and its advisors believe has merit, it cannot be assured that the Australian Taxation Office and AusIndustry will deem the claim to be compliant.

(q) Hosting provider disruption risk

The Company uses a variety of hosting providers including Amazon Web Services and Microsoft Azure/21Vianet, to store all data gathered from its customers.

Should these hosting providers suffer outages, for example due to catastrophic destruction following a natural disaster, service to the Company Platform may also be disrupted. If these hosting providers ceased to offer its services to the Company and the Company was unable to find a replacement service quickly, this could lead to a disruption of service.

(r) Data loss, theft or corruption

The Company stores data with a variety of third party service providers and Cloud computing service providers. Hacking or exploitation of some unidentified vulnerability in its network could lead to loss, theft or corruption of data which, in turn, could negatively impact upon the Company's revenues and profitability.

(s) Security breaches

If the Company's security measures are breached, or if its products are subject to cyber-attacks that restrict customer or staff access to the Platform, its offering may be perceived as less secure than competitors and customers may stop using the Company's services.

4.3 Risks relating to operating a subsidiary in China

As the Company has business operations in China, it will be subject to those risks associated with operating in a foreign jurisdiction. There is a risk that the government of China may change its policies regarding foreign investment, which may have an adverse impact on the Company's profitability.

(a) China legal environment

Due to uncertainties in the Chinese political and legal environment, the Company may be exposed to political and legal risks, adversely affecting the viability of its operations in China. Similarly, the Company may be exposed to risks around contractual enforcement in China.

Although the Chinese legal system is well-established, it may be less certain than legal systems in other countries. This uncertainty could lead to the following risks:

- (i) difficulties in obtaining effective legal redress for breaches of laws or regulations or in respect of property rights;
- (ii) inconsistencies between and within laws, regulations, decrees, orders and resolutions, or uncertainty in the application of laws and regulations;
- (iii) difficulties in enforcing foreign judgments and arbitral awards, particularly against state bodies; and
- (iv) lack of jurisprudence and administrative guidance on the application of laws and regulations, particularly with respect to taxation and proprietary rights.

Therefore, the Company may have difficulty in obtaining effective legal redress in circumstances where the Company or its subsidiaries are adversely affected by a breach of law or regulation.

(b) Foreign investment risk

There are substantial uncertainties regarding the interpretation and application of Chinese laws, rules and regulations governing foreign investment in the business of the Company.

The official interpretation of Chinese laws, regulations and rules may be uncertain, subject to retrospective application or otherwise subject to change. In particular, the Company is dependent upon the licenses it has been granted, which allow it to operate its business in compliance with China's regulatory regime. New laws, regulations and rules may impose additional requirements on the Company's business, Dawine Trading (Shanghai) Limited, incorporated in the People's Republic of China or the Company. There is therefore a risk that Chinese regulatory authorities may deem Dawine Trading (Shanghai) Limited or the Company to be in violation of existing or future Chinese laws, regulations, licences or rules. Likewise, Dawine Trading (Shanghai) Limited or the Company may fail to obtain or maintain requisite permits, licences and approvals.

Any such violations may lead to Chinese authorities revoking or restricting related party transactions between the group entities, requiring the Company or Dawine Trading (Shanghai) Limited to restructure their

operations and ownership structure, prohibiting or restricting the use of Company funds to finance the business operations in China or revoking business or operating licences of Dawine Trading (Shanghai) Limited, adversely affecting the Company's operations and financial position.

4.4 General risks

(a) Management of growth

There is a risk that management of the Company will not be able to implement its intended growth strategy of the recently acquired Wine Depot project. The capacity of the Company's management to properly implement the Company's strategic direction may affect the Company's financial performance.

(b) Potential acquisitions

As part of its business strategy, the Company may make acquisitions of, or significant investments in, complementary companies or prospects. Any such transactions will be accompanied by risks commonly encountered in making such acquisitions.

(c) Regulatory risk

Changes in relevant taxes, legal and administration regimes, accounting practice and government policies may adversely affect the financial performance of the Company.

(d) Insurance risk

Insurance against all risks associated with information technology security is not always available or affordable. The Company will maintain insurance where it is considered appropriate for its needs however it may not be insured against all risks either because appropriate cover is not available or because the Directors consider the required premiums to be excessive having regard to the benefits that would accrue.

(e) Litigation risk

The Company is exposed to possible litigation risks including intellectual property disputes, product liability claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.

(f) Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic and political outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;

- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and technology stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(g) Economic Conditions

The performance of the Company may be significantly affected by changes in economic conditions, and particularly conditions which affect wine consumption in China and other jurisdictions in which the Company operates. Changes in economic conditions could affect the ability of the Company to operate and could increase the costs of operation the Company. Adverse economic conditions, including economic recession, may have a negative impact on the Company's ability to raise capital.

Factors such as inflation, currency fluctuation, and interest rates have an impact on operating costs, media expenditures and stock market prices.

The Company's future possible profitability and the market price of its Shares can be affected by these factors, which are beyond the control of the Company and its Directors, particularly due to the Company operating in the fast changing economic conditions in China and other relevant countries.

4.5 Investment speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Securities offered under this Prospectus.

Therefore, the Securities to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities.

Potential investors should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.

The Company is a disclosing entity under the Corporations Act. It is subject to regular reporting and disclosure obligations under both the Corporations Act and the Listing Rules. These obligations require the Company to notify ASX of information about specific events and matters as they arise for the purpose of ASX making the information available to the securities market conducted by ASX. In particular, the Company has an obligation under the Listing Rules (subject to certain limited exceptions), to notify ASX once it is, or becomes aware of information concerning the Company which a reasonable person would expect to have a material effect on the price or value of the Shares.
