About the Great Northern Minerals gold mines:

Located north west of Townsville in North Queensland, the three historic mines sit on 11 granted Mining Leases that last operated in the mid 1990’s and combined produced over 150,000 ounces (Table 1) at an average grade of over 2g/t Au. The Camel Creek and Golden Cup mines are located adjacent to one another whilst Big Rush lies 100km to the south west. Mining stopped in the 1990’s due to uneconomic gold prices (sub US\$400/oz). Mining was only confined to shallow pits providing oxide ore for simple heap leach extraction. The new EPM 27283 at Big Rush covers and area of 301km² and further applications for surrounding tenements have been submitted.
