### 3. DETAILS OF THE OFFER

#### 3.1 Background to the Offer

On 6 November 2019, the Company announced that it was intending to raise up to \$500,000 via an issue of 31,250,000 Shares at an issue price of \$0.016 per Share, together with one (1) free attaching option to acquire a Share (**Option**) for every two (2) Shares subscribed for and issued, exercisable at \$0.02 each, on or before the date that is three years from the date of issue (**Capital Raising**).

The Capital Raising is subject to the following:

- (a) the Company's placement capacity being refreshed at the Annual General Meeting (**AGM**) held on 15 November 2019 prior to the lodgement of this Prospectus; and
- (b) Shareholders approving the Company's previously announced transaction to acquire the Gaoual Bauxite Project in Guinea which has occurred at the date of this Prospectus.

Both these conditions were satisfied at the AGM held prior to the lodgement of this Prospectus on 15 November 2019.

#### 3.2 Offer

Under this Prospectus, the Company invites investors identified by the Directors to apply for up to 62,500 Shares at an issue price of \$0.016 per Share to raise up to \$1,000 (before expenses).

The Offer will only be extended to specific parties on invitation from the Directors. Application Forms will only be provided by the Company to these parties.

All of the Shares offered under this Prospectus will rank equally with Shares on issue at the date of this Prospectus. A summary of the rights and liabilities attaching to Shares is set out in Section 6.

#### 3.3 Objective

The Company is seeking to raise only a nominal amount of \$1,000 under this Prospectus and, accordingly, the purpose of this Prospectus is not to raise capital.

The primary purpose of this Prospectus is to remove any trading restrictions that may have attached to Shares issued by the Company prior to the Closing Date (including, for the avoidance of doubt, the Shares issued under the Capital Raising and the Acquisitions).

Relevantly, section 708A(11) of the Corporations Act provides that a sale offer does not need disclosure to investors if:

- (a) the relevant securities are in a class of securities that are quoted securities of the body; and
- (b) either:

- (i) a prospectus is lodged with the ASIC on or after the day on which the relevant securities were issued but before the day on which the sale offer is made; or
  - (ii) a prospectus is lodged with ASIC before the day on which the relevant securities are issued and offers of securities that have been made under the prospectus are still open for acceptance on the day on which the relevant securities were issued; and
- (c) the prospectus is for an offer of securities issued by the body that are in the same class of securities as the relevant securities.

The Directors will determine the recipients of all the Shares. The Directors reserve the right to reject any application or to allocate any Applicant fewer Shares than the number applied for.

Where the number of Shares issued is less than the number applied for, the surplus moneys will be returned by cheque as soon as practicable after the Closing Date. ### **3.7 ASX listing**

Application for Official Quotation of the Shares offered pursuant to this Prospectus will be made within 7 days of the date of this Prospectus. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of 3 months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all application monies for the Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Shares now offered for subscription.

### **3.8 Restrictions on the distribution of the Prospectus**

## **6. RISK FACTORS**

### **6.1 Introduction**

The Shares offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for Shares pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this Section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Shares.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

### **6.2 Company specific**

#### **(a) Going Concern Risk**

While completing the audit review of the Company's full year financial report for the year ended 30 June 2019, the Company's auditor, HLB Mann Judd qualified the audit report on the basis of material uncertainty with regard to the going concern of the Company.

Notwithstanding the material uncertainty included in the full year financial report, the Directors believe that upon the successful completion of the Capital Raising, the Company will have sufficient funds to adequately meet the Company's current exploration commitments and short term working capital requirements. However, it is highly likely that further funding will be required to meet the medium to long term working capital costs of the Company. Please refer to Section 6.2(b) below for further details.

In the event that the Capital Raising are not completed successfully there is uncertainty as to whether the Company can continue as a going concern, and which is likely to have a material adverse effect on the Company's activities.

#### **(b) Future Capital Requirements Risk**

To effectively implement its business and operations plans in the future, to take advantage of opportunities for acquisitions, joint ventures or other business opportunities, and to meet any unanticipated liabilities or expenses the Company will be required to raise additional funds.

Further funds may be sought by the Company through equity or debt financing, joint ventures, production sharing arrangements or other means. Failure to obtain sufficient financing for the Company's activities and future projects may result in delay and indefinite postponement of exploration or development on the Company's projects, or even loss of a property interest. There can be no assurance that additional finance will be available when needed or, if available, the terms of the

financing might not be favourable to the Company and may involve substantial dilution to Shareholders.

Loan agreements and other financing rearrangements such as debt facilities, convertible note issues and finance leases (and any related guarantee and security) that may be entered into by the Company may contain covenants, undertakings and other provisions which, if breached, may entitle lenders to accelerate repayment of loans and there is no assurance that the Company would be able to repay such loans in the event of an acceleration. Enforcement of any security granted by the Company or default under a finance lease could also result in the loss of assets.

(c) **Sovereign Risk**

The Company's core projects, the Lushoto and Pare Bauxite projects, are located in the United Republic of Tanzania which is considered to be a developing country and as such subject to emerging legal and political systems compared to the systems in place in Australia.

Sovereign risks associated with operating in Tanzania include, without limitation, changes in the terms of mining legislation, changes to royalty arrangements, changes to taxation rates and concessions and changes in the ability to enforce legal rights. Any of these factors may, in the future, adversely affect the financial performance of the Company and the market price of its Shares.

No assurance can be given regarding future stability in Tanzania or any other country in which the Company may have an interest.

(d) **Tanzania Bauxite Projects**

The Company currently holds a 51% interest in the Lushoto and Pare Bauxite Projects located in Tanzania through its interest in East African Bauxite Limited, and has the option to increase ownership to 75%.

The Company is subject to the risk that changes in the status of this joint venture (including changes caused by financial failure or default by a participant in the joint venture) may adversely affect the operations and performance of the Company.

### **6.3 Industry specific**

(a) **Exploration**

The mineral tenements of the Company are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings.

There can be no assurance that exploration of these tenements, or any other tenements that may be acquired in the future, will result in the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns, unanticipated operational and

technical difficulties, industrial and environmental accidents, native title process, changing government regulations and many other factors beyond the control of the Company.

The success of the Company will also depend upon the Company having access to sufficient development capital, being able to maintain title to its Tenements and obtaining all required approvals for its activities. In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the Tenements, a reduction in the cash reserves of the Company and possible relinquishment of the Tenements.

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

(b) **Mine development**

Possible future development of a mining operation at any of the Company's projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.

If the Company commences production, its operations may be disrupted by a variety of risks and hazards which are beyond its control, including environmental hazards, industrial accidents, technical failures, labour disputes, unusual or unexpected rock formations, flooding and extended interruptions due to inclement or hazardous weather conditions and fires, explosions or accidents. No assurance can be given that the Company will achieve commercial viability through the development or mining of its projects and treatment of ore.

(c) **Operations**

The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its tenement interests. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

(d) **Resource estimates**

The Company does not presently have any JORC Code compliant resources on the projects in which it is earning an interest. In the event a resource is delineated this would be an estimate only. An estimate is an expression of judgement based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.

(e) **Competition risk**

The industry in which the Company will be involved is subject to domestic and global competition. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company's projects and business.

(f) **Government policy changes**

Adverse changes in government policies or legislation may affect the Company's ability to develop its technology, availability of research and development credits, taxation, royalties, ownership of mineral interests, land access, labour relations, and mining and exploration activities of the Company. Any material adverse changes in relevant government policies or legislation of Australia or Tanzania (or in any other jurisdiction in which the Company conducts its business) may affect the viability and profitability of the Company, and consequent returns to investors. The activities of the Company are subject to various federal, state and local laws governing prospecting, development, production, taxes, labour standards and occupational health and safety, and other matters.

(g) **Tenure**

Mining and exploration permits in Tanzania are subject to periodic renewal. There is no guarantee that current or future permits or future applications for permits will be approved.

(h) **Environmental risks**

The exploration and any future mining activities of the Company are subject to local laws and regulations concerning the environment. As with most exploration projects and mining operations, the proposed activities in Tanzania are expected to have an impact on the environment, particularly if advanced exploration or mine development

proceeds. Such impact can give rise to substantial costs for environmental rehabilitation, damage, control and losses. Further, if there are environmental rehabilitation conditions attaching to the permits granted in Tanzania, failure to meet such conditions could lead to forfeiture of these permits.

## **6.4 General risks**

### **(a) Economic**

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

### **(b) Market conditions**

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

### **(c) Additional requirements for capital**

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

### **(d) Dividends**

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements

and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

(e) **Taxation**

The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Prospectus.

(f) **Reliance on key personnel**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

(g) **Insurance**

Insurance against all risks associated with the Company's business is not always available or affordable. The Company maintains insurance where it is considered appropriate for its needs however it will not be insured against all risks either because appropriate cover is not available or because the Directors consider the required premiums to be excessive having regard to the benefits that would accrue.

(h) **Potential acquisitions**

As part of its business strategy, the Company may make acquisitions of, or significant investments in, complementary companies or prospects although no such acquisitions or investments are currently planned. Any such transactions will be accompanied by risks commonly encountered in making such acquisitions.

(i) **Unforeseen expenditure risks**

Expenditure may need to be incurred which has not been taken into account in the preparation of this Prospectus. Although the Company is not aware of any such additional expenditure requirements, however if such expenditure is subsequently required or incurred, this may adversely impact budgeted expenditure proposals by the Company.

## **6.5 Speculative investment**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Shares offered under this Prospectus

Therefore, the Shares to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Shares pursuant to this Prospectus.

## 7. ADDITIONAL INFORMATION

### 7.1 Litigation

Other than as set out below, as at the date of this Prospectus, the Company is not involved in any legal proceedings and the Directors are not aware of any legal proceedings pending or threatened against the Company.

The Company commenced legal action in Malawi in respect of an exclusive option agreement entered into with Michael Saner and Rift Valley Resource Developments Limited (**Rift Valley**) regarding the Kangankunde Rare Earths Project in Malawi.

The Company obtained an injunction from the High Court of Malawi in November 2018 to prevent Michael Saner and Rift Valley dealing with the Kangankunde Rare Earths Project and or the shares in Rift Valley, as well as commenced legal proceedings seeking specific performance/damages. As part of the formal court process a mediation hearing was conducted on 16 April 2019 with no resolution agreed to by the parties. The Company remains committed to seeking to enforce specific performance of the agreement or financial damages which will include actual and consequential losses. The High Court of Malawi hearing was held in accordance with the scheduled dates of 4-5 November 2019.

The Company is now expected to file closing submissions, which is an analysis of the evidence tendered in court in light of the applicable law, within 21 days from 5th November 2019. After that, the Court will have 90 days within which to prepare and deliver its judgement.

The Company has been advised that Mr. Saner has lodged a counter-claim against Lindian for defamation, in relation to statements Lindian made to the ASX in an announcement dated 23 November 2018. Mr. Saner is alleging that the statement in the announcement, that Lindian had lodged a criminal complaint against him in South Africa, was defamatory and is seeking damages in the sum of USD 500,000.

The High Court, Commercial Division (Malawi) where the counter-claim was lodged has decided that it has no jurisdiction to hear Saner's counterclaim since the issue is not commercial in nature. The claim will therefore be transferred to the High Court, General Division to be prosecuted separately from Lindian's claim for breach of contract.

Legal costs to date have been kept to a minimum and the formal trial process in Malawi will not be a significant drain on the Company's ongoing cash requirements. In the event that the Company was to be unsuccessful in the legal action, no material losses are expected to be incurred.

## 7.2 Continuous disclosure obligations

The Company is a “disclosing entity” (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 3 months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.
