ASX ANNOUNCEMENT

Drilling Commenced at Western Queen Gold Project

RC Drilling Commenced Western Queen Central Deposit – 3 Drill Targets

1. **Western Queen Central Deposit** - RC drilling will test the down plunge position of the main shoot. Historic intersections include:

- 6.3m @ 36.09 g/t Au from 305.7m
- 11.8m @ 16.08 g/t Au from 340.4m

* High-grade gold is open down plunge

2. **Western Queen Central Deposit Northern Extension** - RC drilling will test for potential high-grade gold mineralisation extensions north of the historic open cut. Historical high-grade gold intercepts include:

- 7m @ 60.6 g/t Au from 70m
- 6m @ 37.34 g/t Au from 50m

* High-grade gold is open down plunge, up plunge and north along strike

3. **Western Queen Central Deposit Northern Extension** - RC drilling will test for mineralisation extensions south of the historic open cut. Historical high-grade gold intercepts include:

- 2m @ 40.37 g/t Au from 4m
- 3m @ 10.42 g/t Au from 1m

* High-grade gold is open down plunge and south along strike

Air-core Drilling Commenced at the Cranes Prospect

Air-core drilling will target basement gold mineralisation associated with the **150m by 100m high-grade gold soil anomaly (peak value of 11.75 g/t Au)**. Results from previous air core drilling include:

- 14m @ 4.87 g/t Au from surface

* High-grade gold is open over >200m strike and at depth

Rumble Resources Ltd (ASX: RTR) (“Rumble” or “the Company”) is pleased to announce that it has commenced aircore and RC drilling at the Western Queen Gold Project, located 110km NW of Mt Magnet in Western Australia. The drill programme is anticipated to take approximately two weeks to complete, with assays to follow.

Aircore drilling Commenced Cranes (2km north of Western Queen Central Pit)

- Testing along strike (northeast trending) – **potential to extend the current 200m strike.**
 - Test below the recent high-grade surface zone – **define the basement mineralisation.**
- * **The mineralisation is completely open (along strike and at depth).**

About Western Queen Gold Project

The Western Queen Gold Project lies 110km NW of Mt Magnet within the Yalgoo mineral field of Western Australia (“the Project”). The Project comprises of two contiguous mining leases (M59/45 and M59/208) for a total area of 9.8 km². The holder is Mt Magnet Gold Pty Ltd, an entity owned by Ramelius Resources (ASX: RMS). Rumble entered into an option to acquire 100% of the Project in August 2019 (see ASX announcement – 6th August 2019 – Option to Acquire High-Grade Western Queen Gold Project). The Project is located **within a 100km radius of three operating gold processing mills** (see image 4). The closest mill is the Dalgaranga Mill (48km) which has a capacity of 2.5 Mtpa. The Checkers Mill (Mt Magnet) has a capacity of 1.9 Mtpa and the Tuckabianna Mill has a capacity of 1.2 Mtpa.

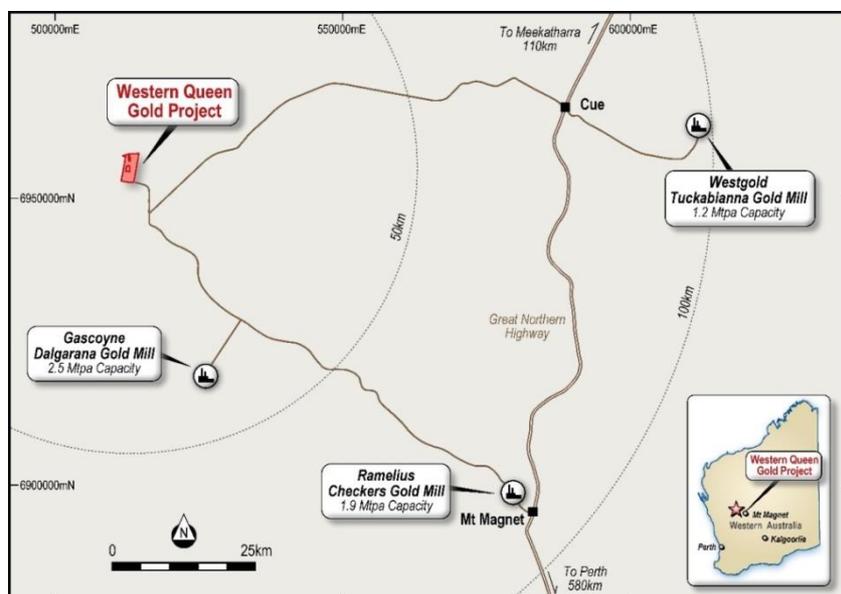

Image 4 – Project Location with Neighbouring Gold Processing Facilities

Two mined deposits at the Western Queen Gold Project have a combined historic production of **880,000t @ 7.6 g/t Au for 215,000oz**. The Western Queen (Central) Mine produced **660,000t @ 8.9 g/t Au for 189,500oz** and the Western Queen South Mine (from two stages) produced **220,000t @ 3.6 g/t Au for 25,500oz**.

An updated mineral resource (refer ASX announcement 6 August 2019) estimates remaining resources beneath both mined deposits of **962,000t @ 3.9 g/t Au for 120,000oz**. Of note the high-grade zone below the **Western Queen Central Pit** hosts inferred mineral resources of **130,000t at 9.0g/t Au for 38,000 ounces**.

Summary of High Order Target Areas at Western Queen Project

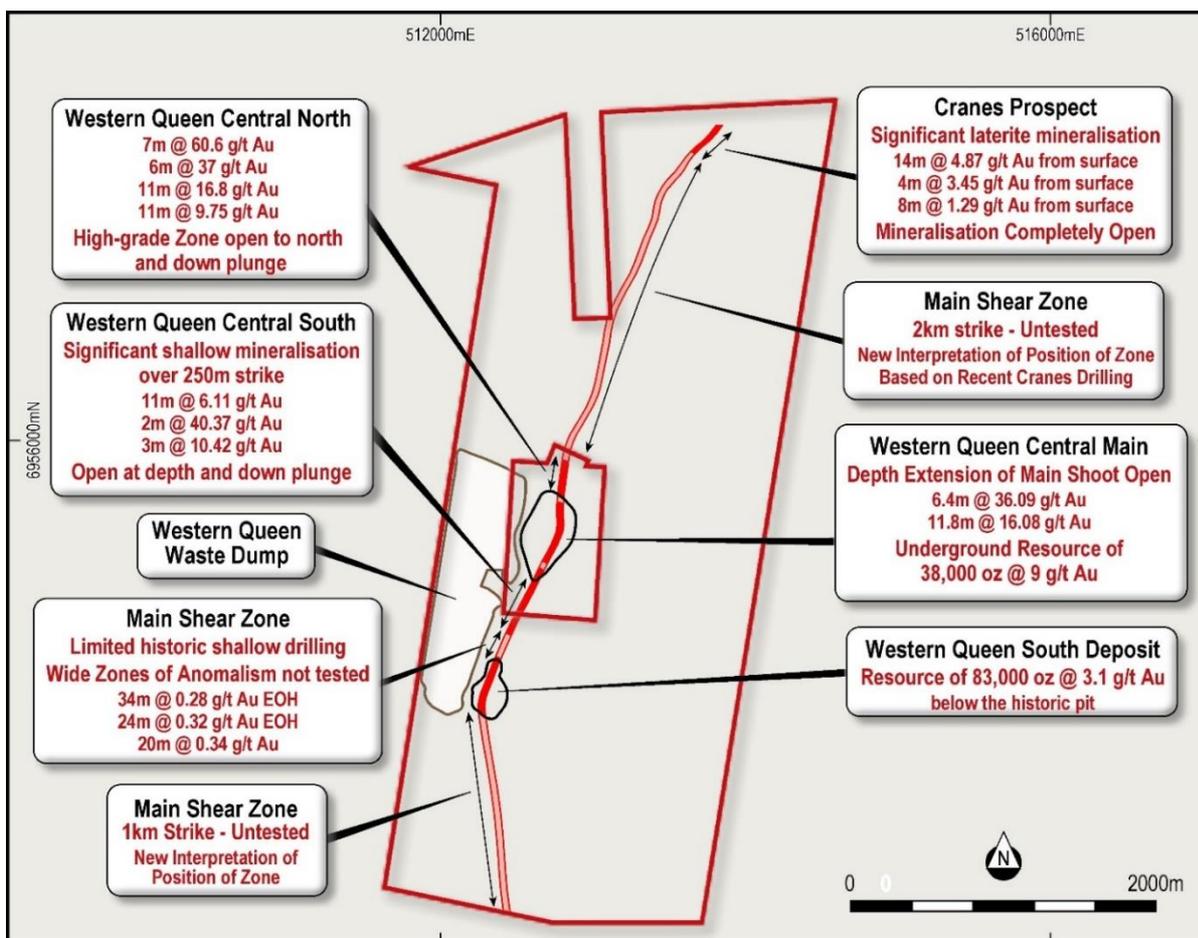

Image 5 – Location of High Order Area/Targets

1. Western Queen Central

- Down plunge of main high-grade shoot
- Down plunge and up plunge of newly identified high-grade zones
- North extension to pit - 200m strike – open to the north and at depth
- South extension to pit - 250m strike – open to the south and at depth

2. Western Queen South

- Near pit extensions

3. Cranes Prospect

- Completely open 200m strike – high-grade laterite and basement

4. Main Shear Zone

- Between Western Queen Central and Cranes – 2km strike
- South of Western Queen South – 1km strike
- Central Zone between Western Queen Central & Western Queen South

About Rumble Resources Ltd

Rumble Resources Ltd is an Australian based exploration company, officially admitted to the ASX on the 1st July 2011. Rumble was established with the aim of adding significant value to its current mineral exploration assets and will continue to look at mineral acquisition opportunities both in Australia and abroad.

Competent Persons Statement

The information in this report that relates to Exploration Results and Mineral Resources is based on information compiled by Mr Brett Keillor, who is a Member of the Australasian Institute of Mining & Metallurgy and the Australian Institute of Geoscientists. Mr Keillor is an employee of Rumble Resources Limited. Mr Keillor has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Keillor consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Refer previous ASX announcements on 4 November 2019 and 6 August 2019 for further detail in respect of the Western Queen Gold Project.

Western Queen Gold Deposit							
Mineral Resource Estimate (2.0g/t Au cut-off)							
Deposit	Indicated		Inferred		Total		
	Tonnes	Au	Tonnes	Au	Tonnes	Au	Au
	t	g/t	t	g/t	t	g/t	ounces
WQ South	243,000	3.5	590,000	2.9	832,000	3.1	83,000
WQ Central	-	-	130,000	9.0	130,000	9.0	38,000
Total	243,000	3.5	719,000	4.0	962,000	3.9	120,000
