

Mining a Cleaner Tomorrow

AGM Presentation | 28 November 2019

Mike Young, CEO

WHY URANIUM?

- Nuclear is the best source of dispatchable, clean electricity with the lowest CO₂ emissions
- Supply-demand dynamics have tipped to chronic undersupply in early '20s
- Next contract cycle started → security of supply trumps price *EVERY TIME*

WHY VIMY?

- Vimy has one of the most advanced uranium projects in the world
 - In 2019 WNA Fuel Report, only 4 projects 'under development' & 6 'planned' incl. Mulga Rock
- Experienced mining, uranium sales, and management team
- First world jurisdiction against a rapidly changing geopolitical backdrop – Russia, Iran, 'Stans
- A significant pipeline of projects targeting 30+ years of supply

BUILDING URANIUM MINES

Advanced projects ready to capture price upside

Mulga Rock – Australia’s largest advanced U project

- 2018 DFS A\$530m NPV (pre-tax) at US\$60/lb vs \$32m market capitalization
- 90Mlbs U_3O_8 resources and 42Mlbs U_3O_8 reserve
- Environmental approval by State and Federal governments and full mining tenure
- Secondary permits, licenses and approvals progressing – mine-ready in 2020
- FID to First production in 2 years

Alligator River Project – high-grade, world-class unconformity uranium deposits

- Mineral Resources and Scoping Study released on Angularli 26Mlbs @ 1.3% U_3O_8 – Tier 1 economics
- Same geology and setting as Athabasca Basin
- Exploration and development on multiple targets provides ongoing news flow and market catalysts
- Potential for large, Tier 1 assets (Jabiluka, Ranger, McArthur River, etc)

Near-term Production:
Mulga Rock Project

Development and
Exploration:
Alligator River Project

BOARD AND MANAGEMENT

Hon. Cheryl Edwardes AM

Non-Executive Chairman

Former State Government Minister holding Ministries of Environment, Labour Relations and Attorney General
Significant experience in mining approvals at Hancock Prospecting's Roy Hill Mine

Mike Young

CEO and Managing Director

Resource geologist with strong background in mine development. Founding Managing Director of BC Iron
First drill hole to first ore on ship in under 4 years

Tony Chamberlain

Non-Executive Director

Former COO Vimy Resources (2014-2019)

Metallurgist with extensive operational and capital experience with several global uranium projects

Julian Tapp

Chief Nuclear Officer

Previous Head of Government Relations and Director of Strategy at Fortescue Metals Group

Expert commodities economist – Chair of the Supply WNA Working Group

David Cornell

Non-Executive Director

Director of Element Capital Pty Ltd

Significant experience providing strategic and corporate advice to listed companies, with a strong focus on transaction services

Scott Hyman

VP Sales and Marketing

US-based uranium marketing professional with significant experience at Dominion Energy buying uranium, then at Cameco Corporation selling uranium.
Strong and deep relationships with US utilities

Marcel Hilmer

CFO and Company Secretary

Significant experience in the resources industry in funding, exploration, mergers and acquisitions

Xavier Moreau

General Manager – Geology and Exploration

21 years experience in uranium exploration with Areva and Vimy. Our living and breathing uranium encyclopedia

COMPANY SNAPSHOT

Capital Structure (ASX:VMY)

	26 November 2019 ⁽¹⁾
Shares on issue	619 million
Share price	\$ 0.050
Market capitalisation	\$ 31 million
Cash	\$ 5.0 million

Significant Shareholders

Vimy Share Price v Uranium Spot Price US\$/lb November 2018 to November 2019

Source: 1. ASX: 26 November 2019 2. U₃O₈ price US\$/lb from TradeTech 20 November 2019

VIMY – AN EARLY MOVER IN CHANGING U MARKET DYNAMICS

- Nuclear power growth estimated at 2.0% CAGR WNA reference case
- Decreasing U supply due to supply-side reaction to unsustainably low prices
- Vimy to capitalise as ‘first mover’ through production, exploration and growth

ELECTRICITY DEMAND

- Global demand expected to increase at 1.5% CAGR – but possibly more with growth of electric vehicles
- Push for clean energy is growing - **IPCC 1.5°C target will NOT BE MET without nuclear**
- Nuclear is second largest source (10%) of world's emissions-free electricity after hydro (18%)
- Nuclear expected to grow at 2.0% CAGR from 373 GWe to 569 GWe by 2040 – 52% increase overall

● ● URANIUM FUNDAMENTALS

- Uranium is used for nuclear power global burn rate ~170 Mlbs p.a.
- Uranium demand is predictable @ ~200 t U_3O_8 per GWe
- First fill requires 3x burn rate
- Utilities run 2-3 years inventories currently running down
 - Nuclear fuel cycle takes ~2 years
- Security of supply trumps price

The Nuclear Fuel Cycle

Supply is dominated by Kazakhstan (Kazatomprom) and Canada (Cameco)

Supply

Consumption is dominated by USA (~28%), France, Russia, China and Korea

Consumption

● ● HIGH DENSITY, SMALL FOOTPRINT

ENERGY CONTENT

Fuel type comparison

URANIUM FUEL

Uranium pellets are inserted into fuel rods which are used in a nuclear reactor to create the steam to drive the turbines that generate electricity.

A single uranium fuel pellet has the same amount of energy as:

 Oil
564 L

 Coal
1000 kg

 Natural gas
481 m³

Source: Nuclear Energy Institute

SMALL FOOTPRINT

Nuclear produces more power with a much smaller footprint

Land required to produce Australia's annual electricity generation (260 TWh)

Energy type	km ²
Nuclear	150
Solar	8000
Hydro	14,000
Wind	33,000

Canadian Nuclear Association,
Nuclear Energy Institute and
MCA calculations

HIGH DENSITY

A lifetime supply of energy

Golf ball

A golf ball-sized amount of uranium in a fast reactor provides a lifetime's amount of energy for one person.

Affordable, reliable, zero emissions electricity for Australian cities

3 Small modular
reactors

1.08 million
average Australian households

MCA calculation based on average household electricity consumption of <8000 kWh per year. Each SMR = 360 MW

Australia's export of ZERO EMISSIONS

Australia's uranium exports in FY2017-18 could generate almost all of Australia's total electricity needs.

Source: Minerals Council of Australia *untapped potential*

● ● REACTOR DEMAND GROWTH BUT... SLOWER SUPPLY GROWTH

Reactor growth
(Reference Case)

- 2.0% CAGR from 373 GWe to 569 GWe by 2040 – 52% increase overall
- Demand growth dominated by China, Middle East, and Russia – non-OECD and BOO model
- Flat growth in OECD but sentiment changing quickly with Climate Change mitigation and failure of intermittent renewables (i.e. France vs Germany)

Supply versus reactor requirements
(Reference Case)

- Structural uranium shortage building
- Long term supply uncertain – “unspecified”
- As inventories drop, security of supply dominates buying and contracts precede buying by 2-3 years

Source: WNA Fuel Report 2019

● ● STRONG DEMAND GROWTH

452

reactors operating in 31 countries

495

new reactors to be built
or under construction

247 Mlbs

additional uranium required annually –
current using 170Mlbs

HISTORY OF URANIUM PRICING

Data source: Cameco

US UTILITY PURCHASES OF U₃O₈ – 2003 to 2018

Uranium purchased by owners and operators of U.S. civilian nuclear power reactors ranked by price and distributed by quantity, 2011–2018 deliveries

thousand pounds U₃O₈ equivalent; dollars per pound U₃O₈ equivalent

Quantity distribution ¹	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018
First	8.5	9.4	10.13	10.41	10.41	11.4	17.84	31.91	34.97	38.24	34.34	30.26	29.68	21.64	18.66	20.69
Second	9.59	10.12	10.94	11.64	11.94	17.55	31.26	40.66	46.48	48.64	41.29	35.11	36.03	28.18	23.10	26.13
Third	9.94	10.82	11.67	12.59	13.29	28.99	39.57	43.6	50.8	51.16	45.89	39.29	38.63	34.60	28.39	28.18

THE URANIUM PRICE CURVE – VIMY STYLE

● ● REALITY OF URANIUM PRICING

Data source: Cameco

LEADING PRICE INDICATORS

Source: CME, Numerco

Conv and SWU are LEADING indicators

- Spot dominated by arbitrage traders
- Speculative in nature – “Cameco bumps”
- Spot:Contract ratio very low vs other metals
- McRiver closure incentivizes conv and SWU
- Increased SWU = decreased underfeeding

Conversion and enrichment have rallied
– things are picking up!

US Utility Inventory Management

- At historic highs >2x burn rate
- 3 years of reducing inventories nudged along by the s.232 FREEZE
- CFO vs CNO vs RISK – “the three-headed beast”
- ✓ Stocks high vs low price → CFO wins
- ✓ Stocks low vs ANY price → CNO wins
- ✓ Unscheduled outage = \$1m / day

Rule No. 1: Thou shalt not run out of fuel!!

US Utility Inventories (Mlbs)

Source: Tribeca 2019 & Vimy Resources

● ● “STREET CONSENSUS” URANIUM OUTLOOK

MULGA ROCK PROJECT, WESTERN AUSTRALIA

- Technically and financially robust DFS completed in 2018. Cash Operating Cost (Years 1-5): US\$25.11/lb
- DFS highlights the simple, low-risk nature of the geology and metallurgy and results in a technically de-risked project
- 15 years LOM – **total production 47Mlbs** (3.5Mlbs annually) with upside for further 5 years
- Uranium is a contract market → +90% sales by contract – *Spot Price irrelevant*
- Pathway to production
 - > Uranium contracting in dominantly US markets → 2020
 - > Project funding → late 2020
 - > Final investment decision → late 2021/early 2022
 - > First production 2023

PEER GROUP – PROJECT READINESS MATRIX

COMPANY: MARKET CAP ⁽¹⁾

Source:

1. Market Cap as of 4 November 2019, FX rate: AUD/CND 1.1

ALLIGATOR RIVER URANIUM PROVINCE

● ● ALLIGATOR RIVER PROJECT OVERVIEW

Drill-ready uranium project in the Northern Territory

Most prospective granted tenure in world-class Alligator River Uranium Province, geologically similar to Athabasca Basin, Canada

- Inferred Resource⁽¹⁾ totaling 0.91Mt @ 1.3% U₃O₈ for 26Mlbs U₃O₈
- Angularli positive Scoping Study, 2018
 - Very positive robust Scoping Study⁽²⁾ with Tier 1 economics
 - 4-year, campaign underground mine
 - 9-year metallurgical plant life
 - Targeting Opex for first quartile AISC
- 2019 drilling at Such Wow confirms large structural system with significant fluid pathways → 20km system requiring follow-up drilling in 2019 and 2020
- October 2019 release highlighted Southern Flank:
 - Multiple significant uranium anomalies below shallow cover
 - Termitaria results validate Vimy's geological models and exploration methods
 - Jabiluka and Angularli-style mineralisation targeted

Source

1. It is common practice for a company to comment on and discuss its exploration in terms of target size and type. The information relating to exploration targets should not be misunderstood or misconstrued as an estimate of Mineral Resources or Ore Reserves.
2. The Scoping Study is a preliminary technical and economic assessment of the potential viability of the Angularli Uranium Deposit. In accordance with the ASX Listing Rules, the Company advises that the Scoping Study is based on low level technical and economic assessments that are not sufficient to support the estimation of Ore Reserves.

ALLIGATOR RIVER – TARGET-RICH ENVIRONMENT

- Impressive pipeline of exploration targets
- Such Wow, Southern Flank, Emu → advanced targets
- 8 greenfield targets and prospects

VÉLO RESOURCES PTY LTD – A NEW BASE METAL PROVINCE

- Vélo (100% Vimy) owns 2,200 km² of EL and EL(A)s with high prospectivity for base metal deposits
- Targeting blind base metals (Zn-Pb-Cu+/-Ag-Au) deposits under cover
- Positive 10-year zinc outlook. Long-term zinc price forecast: US\$2,820/t

BUILDING VALUE

- Production is the pathway to sustainable value
 - *Long term relationships with offtake partners vital*
- Demand building and supply shrinking **but only 10 projects are ‘mine ready’**
- Exploration is the pathway to sustainable growth
- Leverage off local knowledge (Vélo) to add value for shareholders

H1 2020	H2 2020	2021	2022
• Mulga Rock DFS update • Contract negotiations • Alligator River exploration results and planning	• Uranium contracting • Project funding • Exploration at Southern Flank	• Mulga Rock Final Investment Decision and commence construction • Alligator River updated Resources and technical reports	• Complete construction at Mulga Rock • Production at + 1 year • Alligator River - commence DFS

Thank you

MULGA ROCK – RESOURCE AND RESERVE

Mineral Resource released to ASX on 11 July 2017

Deposit	Resource Estimate Classification	Cut-off grade (ppm U ₃ O ₈)	Tonnes (Mt)	U ₃ O ₈ (ppm)	Total metal U ₃ O ₈ (Mlb)
Mulga Rock East	Measured	150	5.2	1,100	12.6
	Indicated	150	16.8	800	29.6
	Inferred	150	15.5	420	14.3
Sub-total			37.4	680	56.4
Mulga Rock West	Indicated	150	2.2	680	3.2
	Inferred	150	31.7	440	30.4
Sub-total			33.8	450	33.6
Total Resource			71.2	570	90.1

- Mulga Rock Project now at 90.1Mlbs U₃O₈ being 71.2Mt at 570ppm U₃O₈
- **High-grade at Mulga Rock East comprises 25Mlbs at 1,500ppm U₃O₈**
- A 30% increase in Mulga Rock East resource since November 2016
- 50% of the global Mineral Resource is in Measured and Indicated status

- Ore Reserves now at 42.3Mlbs U₃O₈ from 22.7Mt at 845ppm U₃O₈
- Maiden Proved Ore Reserve of 12.3Mlbs from 5.3Mt at 1,055ppm U₃O₈
- Ore Reserve metal increases 36% from last update in November 2016
- Vimy expects material improvements in project economics

Ore Reserve released to ASX on 4 September 2017

Deposit / Resource	Classification	Cut-off grade (ppm U ₃ O ₈)	Tonnes (Mt)	U ₃ O ₈ (ppm)	Total metal U ₃ O ₈ (Mlb)
Mulga Rock East					
Ambassador	Proved	150	5.3	1,055	12.3
	Probable	150	14.1	775	24.0
Princess	Probable	150	1.7	870	3.3
Sub-total			21.1	850	39.6
Mulga Rock West					
Shogun	Probable	150	1.6	760	2.7
Sub-total			1.6	760	2.7
Total Reserve			22.7	845	42.3

Maiden Mineral Resource released to ASX on 20 March 2018

Deposit	Resource Estimate Classification	Cut-off grade (% U_3O_8)	Tonnes (Mt) ¹	U_3O_8 (%) ²	U_3O_8 (Mlbs)
Angularli	Inferred	0.15	0.91	1.29	25.9

1. t = metric dry tonnes; appropriate rounding has been applied and rounding errors may occur.
2. Using chemical U_3O_8 composites from drill core
3. Vimy: 75%

Exploration Target released to ASX on 20 March 2018

Project Area	Tonnes Range (Mt) ¹	Grade Range (% U_3O_8)	Metal Range (Mlb U_3O_8)
Angularli	1.2 - 1.8	0.75 - 1.5	20 - 60

1. t = metric dry tonnes
2. Appropriate rounding has been applied, and rounding errors may occur
3. Vimy: 75%

The potential quantity and grade of the Exploration Target is conceptual in nature. It is important to note that there has been insufficient exploration to estimate a Mineral Resource and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

It is not recommended that any person makes any investment decision in relation to Vimy based on this presentation. To the extent that this presentation contains "forward-looking statements" they are only subjective predictions and are subject to inherent risks and uncertainties which could cause outcomes to differ materially from those expressed, implied or projected in such forward-looking statements. No representation or warranty, express or implied, is made by Vimy that the material contained in this presentation is accurate, reliable, relevant or complete, or will be achieved or prove to be correct.

To the extent permitted by law, Vimy and its officers, employees, related bodies corporate, agents and advisers, disclaim any responsibility for the accuracy or completeness of the material contained in this presentation and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error or omission therefrom. Vimy accepts no responsibility to update any person regarding any inaccuracy, omission or change in information in this presentation or any other information made available to a person nor any obligation to furnish the person with any further information. All amounts expressed are in A\$ unless stated otherwise.

Not an offer: This presentation is for information purposes only and does not constitute or form any part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any securities in Vimy in any jurisdiction. This presentation and its contents must not be distributed, transmitted or viewed by any person in any jurisdiction where the distribution, transmission or viewing of this document would be unlawful under the securities or other laws of that or any other jurisdiction. The securities of Vimy have not been registered with the U.S. Securities and Exchange Commission or listed on any U.S. Stock Exchange.

Cautionary statements: The information in this presentation that relates to the Mulga Rock Project Definitive Feasibility Study (DFS), including production targets and forward-looking financial information based on the production targets, was released to the ASX on 30 January 2018. Vimy confirms that all the material assumptions underpinning the production targets and forward-looking financial information in the DFS continue to apply and have not materially changed.

No new information: The Mulga Rock Project Uranium Resource Estimate referred to in this presentation was released to the ASX on 12 July 2017. Vimy is not aware of any new information, or data, that affects the information in that announcement and confirms that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

The Mulga Rock Project Uranium Reserve Estimate referred to in this presentation was released to the ASX on 4 September 2017. Vimy is not aware of any new information, or data, that affects the information in that announcement and confirms that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

The Angularli Deposit Resource Estimate and Exploration Target referred to in this presentation was released to the ASX on 20 March 2018.

Vimy is not aware of any new information, or data, that affects the information in those announcements and that all material assumptions and technical parameters underpinning the estimate and target continue to apply and have not materially changed.
