

ANNOUNCEMENT 28 January 2020

REPORT FOR THE QUARTER ENDED 31 DECEMBER 2019

UITKOMST COLLIERY GENERATES PLEASING RESULTS

MC Mining Limited ("MC Mining" or the "Company") which operates in South Africa, together with its subsidiaries, hereby provides its update for the three months ended 31 December 2019, the second quarter (the "Quarter") of the Company's 2020 financial year. All figures are denominated in United States dollars unless otherwise stated. Safety metrics are compared to the preceding quarter while financial and operational metrics are measured against the comparable period in the previous financial year. A copy of this report is available on the Company's website, www.mcmining.co.za.

Salient operational features

- Safety initiatives continued at the high-grade Uitkomst metallurgical and thermal coal mine ("Uitkomst Colliery" or "Uitkomst") with two lost-time injuries ("LTIs") recorded during the Quarter (FY2020 Q1: five LTIs);
- Optimisation initiatives and changes in mine management implemented during H2 CY2019 resulted in Uitkomst's run-of-mine ("ROM") coal production for the Quarter increasing 13% compared to the December 2018 period (127,021 tonnes ("t") vs. 112,562t);
- Sales of high-grade metallurgical, thermal and high-ash middlings coal was 24% higher than the comparative period (84,578t vs. 68,359t);
- 8,817t of high-ash middlings coal sold during the Quarter (FY2019 Q2: 0t);
- Continuation of composite debt/equity funding initiatives for the Makhado hard coking coal project ("Makhado Project" or "Makhado");
- Vele semi-soft coking and thermal coal colliery ("Vele Colliery") remained on care and maintenance during
 the Quarter, but the Vele processing plant is expected to be refurbished and recommissioned as part of
 Phase 1 of the Makhado Project; and
- The South African Department of Mineral Resources ("DMR") granted a mining right for the 74% owned Generaal coking and thermal coal project ("Generaal Project"), one of the three projects comprising the Company's Greater Soutpansberg Project ("GSP").

Coal market and financial features

WEB WWW.MCMINING.CO.ZA

EMAIL ADMINZA@MCMINING.CO.ZA

- API4 export thermal coal prices increased from \$59/t in September 2019 to \$83/t in December 2019 with average prices for the Quarter of \$76/t (FY2019 Q2: 96/t);
- Premium hard coking coal ("HCC") prices declined significantly in the second half of CY2019 with average prices during the Quarter of \$139/t (down from \$223/t Q2 FY2019); and
- Available cash at Quarter-end of \$3.5 million (\$5.3 million at the end of September 2019) with restricted cash of \$0.03 million.

David Brown, CEO commented:

"Uitkomst generated extremely pleasing results for the Quarter with the change of mine management and optimisation initiatives implemented at the colliery earlier in H2 CY2019 yielding positive results and ROM coal production improved 13% on the comparative three-months. This follows the 8% improvement in ROM coal production recorded in the September 2019 quarter. The Quarter also witnessed increases in API4 export coal prices accompanied by improved domestic demand for Uitkomst's metallurgical and thermal coal. This resulted in sales for the three months increasing 24% compared to Q2 FY2019, improving operating cash flows and profitability. The colliery continues to assess potential coal marketing opportunities.

The Company had a very successful CY2019 with the completion of key milestones required for the development of our flagship, fully permitted Makhado Project. This included the acquisition of the remaining properties and securing of Phase 1 hard coking and thermal coal off-take agreements. Phase 1 utilises the existing Vele Colliery processing facility as well as previously tested logistics infrastructure and has an internal rate of return in excess of 45% and a payback of less than 2.5 years. The progress facilitated the commencement of the Phase 1 composite debt/equity funding initiatives and resulted in the Company securing a \$17 million term-loan from the IDC, which will contribute to the \$52 million required to develop Phase 1 and reflects their support for the Makhado Project. MC Mining is progressing the remaining Phase 1 funding requirements and anticipates that these will be completed in H1 CY2020 with construction commencing in H2 CY2020."

QUARTERLY COMMENTARY

Uitkomst Colliery – Utrecht Coalfields (70% owned)

The completion of a re-training programme and continued key focus on safety contributed to the improved performance at Uitkomst and the colliery recorded two LTIs during the Quarter (FY2020 Q1: five LTIs).

The optimisation initiatives and management changes implemented during H2 CY2019 continued to yield improvements and ROM coal production was 13% higher than the comparable period (127,021t vs 112,562t).

The ROM coal generated high-grade metallurgical and thermal coal sales of 75,761t compared to 67,606t in Q2 FY2019 and included the sale of carry-over inventory from the previous quarter of 6,815t (FY2019 Q2: 4,414t). Uitkomst sold 8,817t (FY2019 Q2: 0t) of high-ash middlings coal during the Quarter (FY2019 Q2: nil t).

Uitkomst's revenue benefitted from improved production levels as well as higher API4 coal prices compared to the preceding three months. However, the average API4 international thermal coal prices were 21% lower than the comparative period in 2019 (\$76/t vs \$96/t). Production costs per ROM tonne declined from \$49/t to \$36/t, benefitting from the 13% increase in ROM coal production, a 3% weakening of the ZAR:US\$ exchange rate as well as a reduction in mining costs following the implementation of cost control measures.

	Quarter to end-Dec	Quarter to end-Dec	
	2019	2018	% ▲
Production tonnages			
Uitkomst ROM (t)	127 021	112 562	13%
Sales tonnages			
Own ROM (t)	75 761	67 606	12%
Middlings sales	8 817	-	100%
Purchased ROM to blend (t)	-	753	(100%)
	84 578	68 359	24%
Quarter financial metrics			
Revenue/t (\$)	70.25	91.25	(23%)
Revenue/t (ZAR)	1 033	1 306	(21%)
Production cost/ROM tonnes (\$)^	36.08	48.92	(26%)

[^] costs are all South African Rand based

The Uitkomst Colliery has an estimated 15-years life-of-mine ("**LOM**") which includes the development of a north adit (horizontal shaft). The colliery is in the process reassessing options regarding the design of the planned north adit.

Makhado Hard Coking Coal Project – Soutpansberg Coalfield (69% owned)

The fully permitted Makhado Project recorded no LTIs (FY2020 Q1: nil) during the Quarter.

MC Mining's flagship Makhado Project has very favourable economics and the phased development thereof will deliver positive returns for shareholders. Makhado has a LOM in excess of 46 years comprising a nine-year Phase 1 LOM and Phase 2, which will be mined for more than 37 years.

The Company made significant progress in the development of Makhado during CY2019, including securing off-take agreements for the Phase 1 HCC and thermal coal by-product and the construction of the project will position MC Mining as South Africa's pre-eminent HCC producer.

The Makhado Phase 1 construction comprises the development the west pit and modifications to the existing Vele Colliery processing plant and the funding required is some R700 million (\$52 million) and includes the settlement of the existing 2017 IDC loan facility. The Company has progressed the fund raising initiatives to secure the funding for the construction of Phase 1 and anticipates that this will be completed in H1 CY2020 followed by a nine-month construction period, with first coal sales in H1 CY2021. The initial step in the Phase 1 composite debt/equity funding process was the conclusion of a conditional R245 million (\$17.0 million) term loan facility from the Industrial Development Corporation of South Africa Limited ("IDC"). The Company is in the process of various initiatives to raise the balance, including positive discussions with debt providers, current shareholders and potential new shareholders at both group and project level.

Phase 1 is a critical step in the development of Phase 2 of the Makhado Project, which also has significant positive economics, and the Company has already secured off-take agreements for *circa* 50% of the approximately 0.8 million tonnes per annum of Phase 2 HCC.

Vele Semi-Soft Coking and Thermal Coal Colliery - Limpopo (Tuli) Coalfield (100% owned)

The Vele Colliery remained on care and maintenance during the Quarter and no LTIs were recorded during the period (FY2020 Q1: nil).

There were no further developments to report during the Quarter and the Vele processing plant is expected to be refurbished and recommissioned as part of Phase 1 of the Makhado Project

Greater Soutpansberg Project – Soutpansberg Coalfield (74% owned)

The GSP recorded no LTIs (FY2020 Q1: nil) during the Quarter. The GSP is located within close proximity to the Musina-Makhado Special Economic Zone, an area designated by government to focus on, amongst others, energy and metallurgical industries.

The Chapudi, Mopane and Generaal Projects comprise MC Mining's longer-term coking and thermal coal GSP. The mining right applications for the three project areas were submitted to the DMR during 2013 with the Chapudi Project mining right granted in December 2018. The Generaal Project contains over 407 million gross

tonnes *in situ* of inferred coal resources¹ and was granted a mining right by the DMR during the Quarter. The Mopane Project mining right application is at an advanced stage and the Company is hopeful that the granting thereof will occur in the near future.

Markets

The slowdown in the global economy during CY2019 continues to adversely affect metallurgical coal markets with average premium HCC prices during the Quarter of \$139/t (FY2019 Q2: \$223/t). However, HCC prices trended positively post Quarter-end increasing to \$149/t in January 2020. Increased international demand for South African thermal coal resulted in more favorable prices for Uitkomst coal, with average API4 thermal coal prices improving from \$61/t in Q1 FY2020 to \$76/t during the Quarter (FY2019 Q2: \$96/t).

About MC Mining Limited:

MC Mining is an AIM/ASX/JSE listed coal exploration, development and mining company operating in South Africa. MC Mining's key projects include the Uitkomst Colliery (metallurgical coal), Makhado Project (coking and thermal coal). Vele Colliery (coking and thermal coal), and the Greater Soutpansberg Projects (coking and thermal coal).

Forward-Looking Statements

This Announcement, including information included or incorporated by reference in this Announcement, may contain "forward-looking statements" concerning MC Mining that are subject to risks and uncertainties. Generally, the words "will",

¹ The GSP independent Competent Persons Report can be found on the Company's website: http://www.mcmining.co.za/our-business/projects/gsp-mbeu-yashu

"may", "should", "continue", "believes", "expects", "intends", "anticipates" or similar expressions identify forward-looking statements. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements. Many of these risks and uncertainties relate to factors that are beyond MC Mining's ability to control or estimate precisely, such as future market conditions, changes in regulatory environment and the behaviour of other market participants. MC Mining cannot give any assurance that such forward-looking statements will prove to have been correct. The reader is cautioned not to place undue reliance on these forward looking statements. MC Mining assumes no obligation and do not undertake any obligation to update or revise publicly any of the forward-looking statements set out herein, whether as a result of new information, future events or otherwise, except to the extent legally required.

Statements of intention

Statements of intention are statements of current intentions only, which may change as new information becomes available or circumstances change.

MC Mining has ensured that the mineral resources quoted are subject to good governance arrangements and internal control. The Company has engaged external independent consultants to update the mineral resource in accordance with the JORC Code 2012 and SAMREC 2016. The units of measure in this report are metric, with Tonnes (t) = 1,000kg. Technical information that requires subsequent calculations to derive subtotals, totals and weighted averages may involve a degree of rounding and consequently introduce an error. Where such errors occur MC Mining does not consider them to be material.
