PRELIMINARY FINAL REPORT 31 DECEMBER 2019

CONSOLIDATED NOTES TO THE PRELIMINARY FINAL REPORT FOR THE YEAR ENDED 31 DECEMBER 2019

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation

The preliminary final report has been prepared in accordance with ASX Listing Rule 4.3A and the disclosure requirements of ASX Appendix 4E.

This preliminary report has been prepared in accordance with Australian Accounting Standards (AASBs) (including Australian Interpretations) adopted by the Australian Accounting Standard Board (AASB) and the Corporations Act 2001.

a) Basis of Measurement and Reporting Conventions

The financial statements, except for cash flow information, have been prepared on an accruals basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities. The amounts presented in the financial statements have been rounded off to the nearest dollar unless stated otherwise.

This preliminary report is based on accounts which are in the process of being audited. It is likely that the Auditor will issue an Independent Auditor's Report that will contain a Matter of Emphasis drawing attention to a material uncertainty related to going concern. The preliminary report has been prepared on a going concern basis.

b) Adoption of New and Amended Accounting Standards

The Group had to change its accounting policies as a result of the adoption of *AASB 16 Leases* as from 1 January 2019. The impact of the adoption of this Standard and the new accounting policy are disclosed in note 1(c) below.

c) Changes in Accounting Policies

This note explains the impact of the adoption of *AASB 16 Leases* on the Group's consolidated financial statements and discloses the new accounting policies that have been applied from 1 January 2019.

AASB 16 Leases – Accounting Policies applied from 1 January 2019

The Group as a lessee

At inception of a contract, the Group assesses if the contract contains characteristics of a lease. If there is a lease present, a right-of-use asset and a corresponding liability are recognised by the Group where the Group is a lessee. However, all contracts that are classified as short-term leases (i.e. leases with a remaining lease term of 12 months or less) and leases of low-value assets are recognised as an operating expense on a straight-line basis over the term of the lease.

Initially, the lease liability is measured at the present value of the lease payments still to be paid at the commencement date. The lease payments are discounted at the interest rate implicit in the lease. If this rate cannot be readily determined, the Group uses incremental borrowing rate.

Lease payments included in the measurement of the lease liability are as follows:

- fixed lease payments less any lease incentives;
- variable lease payments that depend on the index of the rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the lessee under residual value guarantees;
- the exercise price of purchase options if the lessee is reasonably certain to exercise its options;
- lease payments under extension profits, if the lessee is reasonably certain to exercise the options; and
- payments of penalties for terminating the lease, if the lease term reflects the exercise of options to terminate the lease.

PARAZERO LIMITED
PRELIMINARY FINAL REPORT 31 DECEMBER 2019

CONSOLIDATED NOTES TO THE PRELIMINARY FINAL REPORT FOR THE YEAR ENDED 31 DECEMBER 2019

The right-of-use assets comprise the initial measurement of the corresponding lease liability, any lease payments made at or before the commencement date and initial direct costs. The subsequent measurement of the right-of-use asset is at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the lease term or useful life of the underlying asset, whichever is the shortest.

Where a lease transfers ownership of the underlying asset or the costs of the right-of-use asset reflects that the Group anticipates exercising a purchase option, the specific asset is depreciated over the useful life of the underlying asset.

The Group does not currently have any leases that would require recognition of a right-of-use asset in the currently reporting period.

d) Critical Accounting Estimates and Judgements

The directors evaluate estimates and judgements incorporated into the financial statements based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and within the Group.

Key Estimates and judgements

Fair value of long-term liabilities

The Group measures its liability on governmental grants received, each period, based on discounted cash flows derived from the Group's future anticipated revenues. The grant is repayable upon the Group commencing product commercialisation and generating revenue from sale of products, with repayments being based on 3.5% of each dollar of revenue. As required by AASB 9 *Financial Instruments*, the liability has been recognised at fair value on initial recognition and subject to management's estimate of discount rate and the timing and quantity of future revenues.

At the end of each reporting period, the Group evaluates, based on its best estimate of future sales, whether there is reasonable assurance that the liability recognised, in whole or in part, will not be repaid, if there is such reasonable assurance, the appropriate amount of the liability is derecognized and recorded in profit or loss as an adjustment of research and development expenses. If the estimate of future sales indicates that there is no such reasonable assurance, the appropriate amount of the liability that reflects expected future royalty payments is recognised with a corresponding adjustment to research and development expenses.

NOTE 2: LOSS PER SHARE

(vii) Issue of fully paid ordinary shares at A\$0.06 (~US\$0.0411) each on 5 November 2019 pursuant to a Placement.

(c) Capital Management

Due to the nature of the Group's activities, the Group does not have ready access to credit facilities, with the primary source of funding being equity raisings. Therefore, the focus of the Group's capital risk management is the current working capital position against the requirements of the Group to meet research and development programs and corporate overheads. The Group's strategy is to ensure appropriate liquidity is maintained to meet anticipated operating requirements, with a view to initiating appropriate capital raisings as required. Any surplus funds are invested with major financial institutions.
