

TROY RESOURCES LIMITED

# ASX ANNOUNCEMENT

8 April 2020

## March Quarter Production Update

Troy Resources Limited (**ASX: TRY**) (**Troy** or the **Company**) is pleased to announce production information since the start up at the Karouni Gold Project, Guyana following the shut-down in late 2019.

Mining at the Project restarted on 10 January 2020.

Ore processing restarted on 27 January 2020.

The majority of material mined and process was sourced from the recently discovered Hicks 4 Pit.

	Jan-20	Feb-20	Mar-20	Total
<b>Mining</b>				
Total Tonnes Moved (t)	815,400	755,016	729,029	2,299,445
Ore Tonnes (t)	7,780	59,312	50,735	117,827
Grade (g/t)	2.11	2.74	1.59	2.20
<b>Milling</b>				
Dry Tonnes Processed (t)		56,649	72,238	128,887
Ounces Recovered (oz)		1,227	3,301	4,528

Production results show a measured restart in line with our revised and conservative mine plan.

Mining is currently proceeding at Hicks 4 and Larken while experimental mining of higher grade material from Ohio Creek is being undertaken in support of a resource upgrade at this Prospect.

The operation remains largely unaffected to date by the Coronavirus Pandemic. However, the situation is being monitored closely with all possible protective measures put in place.

A more detailed update on exploration progress will follow with the release of the March Quarterly Report later in April.

*The release was authorised by Managing Director, Ken Nilsson*
