## ASX Announcement

21 April 2020

### **Distribution agreement secured with LiveCare for Prizma in the USA**

- **Agreement with LiveCare to distribute and integrate Prizma device into its proprietary Link+ platform**
- **Link+ is a 4G Smart Home Gateway that integrates medical devices into patient's homes to create a leading remote patient monitoring offering**
- **LiveCare is the preferred provider to the Independents Physician Association of America which currently represents 700 organisations in 39 states and over 300,000 physicians and affiliates**
- **Prizma device to be integrated with Link+ in the coming weeks with sales expected shortly thereafter**

Mobile and e-Health company **G Medical Innovations (ASX: GMV) ("G Medical" or the "Company")** is pleased to advise that it has entered into a non-exclusive distribution agreement ("Agreement") with US-based, remote patient solutions company LiveCare Corp. ("LiveCare") ([www.livecareusa.com](http://www.livecareusa.com)), pursuant to which LiveCare will promote the sale of and distribute G Medical's Prizma device in the United States. As part of the Agreement, G Medical will work with LiveCare to integrate the Prizma device into the Link+ platform, which will be offered directly to consumers.

Based in New York, LiveCare is a leader in the remote patient monitoring industry. The organisation has created the Link+ platform, a 4G Smart Home Gateway that integrates an array of medical devices into a patient's home using a simple, touch-free syncing process. The Link+ helps monitor chronic care patients, offers better patient outcomes, reduces healthcare costs and lowers readmission rates.

Link+ is not reliant on Wi-Fi and is always connected to a 4G network. Once a patient uses the home monitoring service or a connected device, all data is transmitted through the Link+ directly to the FDA cleared, LiveCare HIPAA cloud. If there is a decline in the patient's condition, the system will automatically generate an alert to a call centre, which can be escalated as required.

LiveCare was recently selected as the preferred provider of remote patient monitoring for members of The Independent Physician Association of America (TIPAAA), the leading trade association serving independent and integrated physician associations. TIPAAA currently represents approximately 700 organisation and affiliates in 39 states and more than 300,000 physicians.

The Agreement is for an initial period of 3 years, unless notice of termination is provided by either party (which may occur by the provision of 30 days written notice), and will automatically renew for successive 1 year terms thereafter (unless either party provides notice of its intent not to renew the Agreement at least 30 days prior to the applicable anniversary date). There are no minimum sales commitments under the Agreement.

**CEO and Executive Director Dr Yacov Geva said:** "Securing this distribution agreement with such an established and credible partner is a tremendous achievement for G Medical. The agreement marks the Company's ongoing push into a large addressable market and further outlines the Company's potential.

“G Medical and LiveCare are working closely and cooperatively to integrate the Prizma into the Link+ platform. We aim to have this completed as soon as possible, with sales to commence shortly after. Given LiveCare’s footprint and relationships with providers, we anticipate that there may be significant demand for our solution.”

*Approved for release by Yacov Geva, Managing Director.*

**About G Medical products:**

G Medical offers a suite of consumer and professional clinical-grade products (with regulatory approval) that are positioned to streamline healthcare services, improve remote access to medical data, reduce costs, improve quality of care, and make healthcare more personalized and precise. Currently the Company is focusing on two main verticals.

The ‘Prizma’ Medical Smartphone Case is one of two key products developed by G Medical and is aimed at everyday consumers focused on their medical health and wellbeing. The ‘Prizma’ allows consumers to turn their smartphone into a mobile medical monitor to measure a wide range of vital signs, with the added advantage that users are able to store their medical data in the cloud and share it with third parties such as healthcare professionals and family members.

G Medical also offers a professional real-time patient continuous monitoring solution, G Medical’s Vital Signs Monitoring System (VSMS) and G Medical Patch (GMP). This modular solution measures a wide range of vital signs that are automatically presented in a call centre (IDTF) or a hospital setting. The GMP assists in diagnosing patient complaints and conditions remotely, from pre-hospitalisation, hospitalisation and through to post discharge home-based settings.
