**MONADELPHOUS CONTRACTS UPDATE**

Engineering company Monadelphous Group Limited (ASX: MND) ("Monadelphous" or "the Company") today announced it has secured a number of construction and maintenance contracts in the resources and energy sectors with a combined value of approximately \$150 million.

In the iron ore market in the Pilbara region of Western Australia, the Company has secured the following new work:

- A contract under its existing BHP WAIO Asset Panel Framework Agreement associated with the dewatering of surplus water at Mining Area C;
- A three-year contract with Rio Tinto for the provision of maintenance services and minor projects on its Pilbara marine infrastructure; and
- One-year extensions to its two existing fixed plant maintenance and shutdown crane services contracts with Fortescue Metals Group.

In addition, Monadelphous has been appointed to BHP's WAIO Site Engineering Panel for a further term of two years, to provide civil, structural, mechanical, piping and marine services at BHP's Mine Site and Port Operations in the Pilbara.

In Papua New Guinea, the Company has been awarded a new three-year contract to provide minor capital project services, including civil, mechanical, structural, piping and blast and paint at Newcrest Mining's gold mining operations on Lihir Island. Monadelphous has been providing services at Lihir Island since 2017.

The Company has also secured a four-year contract to continue providing mechanical and electrical maintenance and turnaround services for a customer's midstream operations in the Queensland coal seam gas market.

Monadelphous Managing Director, Rob Velletri, said the Company continues to build on its relationships with long-term customers in both the mining and oil and gas sectors.

"As always, we remain focused on the safe and efficient delivery of high-quality service solutions and we are pleased to continue to be recognised as a partner of choice by our customers" he said.
