- **The MyFiziq - Evolt integration live on App Store.**
- **Evolt is well entrenched in Fitness, Wellness, Gyms, Clinics and Workplaces.**
- **Evolt has over 500,000 active users with a scan costing \$30-\$50 per scan.**
- **Evolt is an FDA approved medical grade device.**
- **Evolt currently has over 500 active locations and new orders for more than 4,000 Evolt units worldwide.**

MyFiziq Limited (ASX: MYQ) (MyFiziq) is pleased to update shareholders with the release of the Evolt360 application (**Evolt**), which is now available in the Apple App store.

As previously outlined, Evolt is a device/machine-based intelligent body scanning technology purchased and supported by health, fitness, and wellness companies including but not limited to; F45, Anytime Fitness, HCF, and KPMG. These companies and more are looking to provide greater insight into the health of their members and employees. The scans performed by the existing Evolt technology are made available to consumers for between \$30 - \$50 per scan depending on the type of scan performed and level of membership. Evolt has today released the much awaited Evolt Active application with in app body scanning using the MyFiziq technology.

The MyFiziq technology is intended to extend the Evolt reach into the hands of their 500,000 consumers at home. With the new integration, customers of Evolt will be able to download access to the MyFiziq technology, via the Evolt Active app, which is available on the Apple App Store. The Evolt Active application with the MyFiziq in-app scanning capability is being released on iOS initially, with Android to follow.

In addition to the body tracking capabilities, Evolt will be embedding its biometric data into the machine learning data with MyFiziq within the application. Delivering a broader data set than has been made available in any application of its kind to date.

Evolt has developed a unique end-to-end solution that tracks detailed changes in the quality of the activity, body composition and nutrition as well as sophisticated data analytics for its user's body changes, and now the added functionality of tracking circumference change as an additional data set. Evolt is inspiring and educating its users with real-time data to drive and assist in the delivery of personal goals.

In just a few short years, Evolt has become a global player, securing contracts across multiple verticals, from health insurers, health, and fitness retailers to government bodies and some of the world's largest gym chains.

Vlado Bosanac, Chief Executive Officer of MyFiziq, said:

“The launch of Evolt has been much awaited both by MyFiziq and our shareholders. Evolt has committed to targeting an initial 100,000 active users onto the joint offering in the first 12 months and MyFiziq will receive \$2.99 per month per user. This will mark the release of our second consumer application. If the initial target user numbers are achieved, it would see the Company meet an initial break-even position, based on current monthly burn.

The application has been through rigorous testing in readiness for this launch. I am pleased to say the application is performing well on all fronts. The look and feel of the application is a credit to both teams. We are looking forward to supporting Evolt with its launch, users, downloads, and usage.

As Evolt has been granted an FDA medical device approval, we believe this will bring a great deal of interest to both companies as we co-promote this unique and comprehensive capability to multiple business verticals, both current and new.

The FDA medical device approval held by Evolt is of particular benefit to both companies as we share a common interest in distributing the solution to governments, medical organisations, and insurers. The FDA approval brings validity to the device and its functionality is often required in such organisations, when looking to use the device as part of a decision-making process rather than a monitoring device.¹³

About Evolt

Evolt is a technology driven health and wellness company that is powering connected and digital health. Evolt has developed an end-to-end solution that tracks detailed changes in the quality of activity, body composition and nutrition as well as sophisticated data analytics for an individual’s body composition changes.

Evolt is at the forefront of technology and use an evidence-based approach to its development and practical use. We have our own Research and Development Team consisting of highly qualified professionals in the field of exercise science, body composition and nutrition.

About MyFiziq:

MyFiziq has developed and patented a proprietary dimensioning technology that enables its users to check, track, and assess their dimension using only a smartphone privately and accurately.

Our goal is to assist our partners by empowering their consumers with this capability. This in return gives our partners the ability to assess, assist, and communicate outcomes with their consumers when navigating day to day life. Whether this is a personal journey to better health, understanding the risk associated with their physical condition, tracking the changes they are experiencing through training, dieting, or under medical regimes. or simply wanting to be correctly sized for a garment when shopping online. The MyFiziq technology delivers this seamlessly, privately, and cost-effectively in under one minute.

Our partner benefits from our (SAAS) Software as a service pricing solution, that reduces with scale. Integration is made easy with the MyFiziq modular system, based on multiple (SDK's) software development kits, allowing a partner to select the functions, measurements, and displays to suit their individual needs.

MyFiziq has developed this capability by leveraging the power of Computer Vision, Machine Learning, and patented algorithms, to process these images on secure, enterprise-level infrastructure, delivering an end-to-end experience that is unrivaled in the industry. MyFiziq simplifies the collection of measurements and removes the human error present in traditional methods.
